Brooklyn, N. Y.

THE A B C OF IRON.

By CHAS. W. SISSON.

CLOTH.

Price Reduced to $1.00.

CONTENTS.

IRON—WHAT IS IT?

A description of the metal and its uses, showing in what combinations it is found and the principal sources.

PIG IRON.

An account of the blast furnace process by which the ores are reduced to pig iron.

CONSTITUENTS OF IRON.

A description of the elements in pig metal which influence cast iron. Described in chapters on CARBON IN CAST IRON, PHOSPHORUS IN CAST IRON, SILICON IN CAST IRON, MANGANESE IN CAST IRON, SULPHUR IN CAST IRON.

NUMBERING OF PIG IRON.

Showing the character and analysis of different grades of pig iron, appearance of fracture and the uses to which the several grades are adapted.

GRADING OF IRON.

Should it be by analysis or by fracture?

HOW TO REDUCE COST OF MIXTURE.

STEEL.

PHYSICAL PROPERTIES OF METALS DEFINED.

Table of shrinkage of Castings. Weights of castings from patterns, etc.

STATISTICS.

Showing the varieties and production of iron ore, pig iron, pig iron and steel products, railroad mileage and equipment, etc., etc., etc.

EARLY HISTORY AND MANUFACTURE OF IRON.

Brief history of the manufacture and uses of iron from earliest times, being principally extracts from Mr. James M. Swank's "HISTORY OF IRON IN ALL AGES."

HUNT, HELM & FERRIS, Sole Manufacturers,
HARVARD, ILL.

Vagaries of Sanitary Science. By F. L. DIBBLE, M.D. The author claims that the whole sanitary movement thus far has no resemblance to scientific investigation. Much sanitary nonsense has been foisted on the people. He submits investigations on air, water, soil, sewer gas, cemeteries, public funerals, meat, milk, filth and fecal diseases, typhoid fever, yellow fever, cholera, diphtheria, epidemics, boards of health and vital statistics. His purpose is to show the true nature of diseases and the means of avoiding them scientifically. 1893. 462 pages, cloth.....$2.00

Small moulded work a specialty. Send for estimates for moulds and work.

An Experienced Engineer's Manner of Using

Dixon's Lubricating Graphite.

I feed Dixon's pure flake graphite into the steam chest with cups made from piping, as per sketch. In the nipple indicated by arrows I drive in a brass plug and drill a $\frac{1}{16}$ in. hole. I fill the cup once in three days and the steam takes care of the graphite. I have reduced the feed of cylinder oil one-half of the amount formerly used. I put one cup on each high pressure steam chest and the exhaust carries the graphite over into the low pressure cylinder and over into the air pump. It is used three times and discharged into the river. It is not worth trying to save it to use over, as I have heard some say they do. I hope engineers generally will make themselves better acquainted with graphite and learn the difference between Dixon's pure flake graphite and the ordinary commercial plumbago.

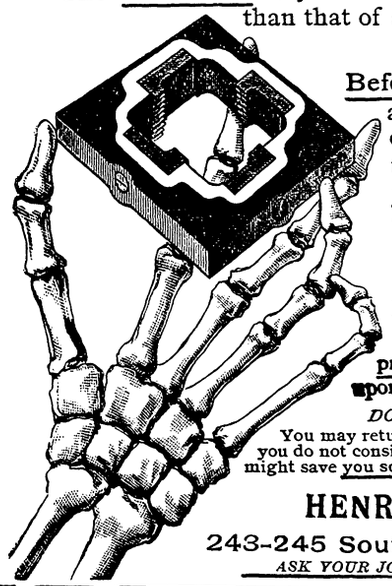
A New Screw Plate. THE FULL MOUNTED LIGHTNING

These plates have a stock with each die. The dies are our celebrated adjustable Lightning dies. Each stock is of correct length and weight to suit size of die. Several sizes of dies may be in use out of the same set at the same time. Send for catalogue.



Made by WILEY & RUSSELL MFG. CO., Greenfield, Mass., U. S. A. Send for new catalogue.

Maule's "Skeleton" Pipe Die

Two "Points" about it—only 2 (There are plenty more, but we only mention these two here.)

1

The First Cost to you of MAULE'S "SKELETON" PIPE DIE is less than that of any other Pipe-Threading Die—and

2

Before it becomes dull from use it will cut as many perfect threads as the best solid die extant, and when it is dull, you don't throw it away and buy a new one—Oh, no! You simply sharpen the cutters on a common grindstone, and so make it practically as good as it was at first, and this sharpening process may be repeated a number of times.

A sample One-inch "Skeleton" Pipe Die, either 2⅜ or 2½ x ¾ thick, by mail, postage prepaid, will cost you 62 cents, and will be sent upon receipt of a Postal note for that amount.

DO NOT SEND US ANY POSTAGE STAMPS.

You may return such sample to us, at our expense, if, after seeing it, you do not consider it worth the price. Don't the above sound as if it might save you some money—if TRUE?

5-ton Ridgway Crane in Foundry Diamond State Iron Co., Wilmington, Del.

Steam-Hydraulic Elevator.

SAFE, RAPID, SURE

— AND —

Not Costly.

The Crane that is perfection for the exacting requirements of a Foundry is the Crane for all places.

Give full particulars and get circulars and prices.

CRAIC RIDGWAY & SON,
Coatesville, Pa.

Ridgway Balanced Steam-Hydraulic Crane.

The Greatest Foundry Crane Known.

Are you noting the letters printed here from week to week?

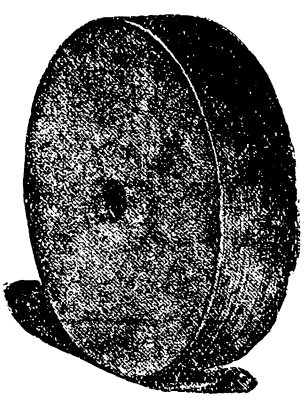
Simply Great! Aren't They?

Here's one from the Newest and Largest Foundry in the State of Indiana.

When that ***BOOM*** sets in and you must get Cranes you'll know which to get.

GAAR, SCOTT & CO.
Engines, &c.

RICHMOND, IND., April 12th, 1893.



MESSRS. CRAIG RIDGWAY & SON,
Coatesville, Pa.

Dear Sirs:—We have five of your Cranes in use in our new foundry. We find them capable for the heaviest lifting and equally adapted for nicety of performance when drawing a pattern from the flask and in all similar operations. They are convenient and do not take severe effort on the part of anybody to accomplish a great variety of useful results which we secure every day from their use. We do not hesitate to recommend them very highly and we do not see anything to hinder a valuable future for them and consequent advantage to yourself. We are very glad to add our testimony in this manner to the genuineness of all you claim for the Ridgway Balanced Crane and recommend it to public favor.

Very truly,
GAAR, SCOTT & CO.

Highest Award

FOR

Supreme Excellence

TO

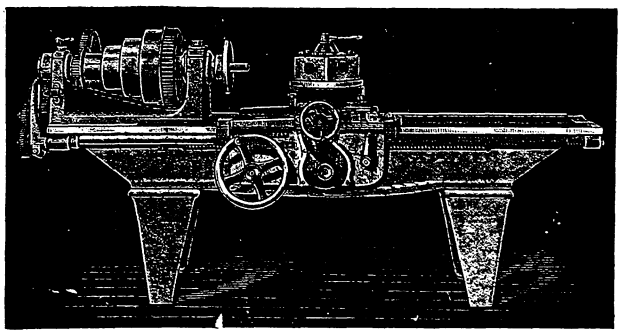
The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS,

At the *World's Columbian Exposition* at Chicago. A medal and diploma worded:

"Supreme excellence in material, method in manufacture, and quality of finished product; elasticity and smoothness combined with holding power in clinch.

It allows the use of very small nails."

There is nothing beyond "supreme excellence," nor is there anything comprised in a horse nail, except the "material from which it is made," "the method of manufacture," and "quality of finished product."



Putnam nails, by their "elasticity," give slightly to the expansion and contraction of the hoof while the horse is in motion; by their "smoothness," do not enlarge the nail holes in the hoof, while their "supreme excellence," in "holding power in the clinch," enables them to hold the shoe in the hardest service until worn out.

By the "use of small nails," large holes are avoided and money saved to the smith.

Thus it will be seen that the officials of the *World's Columbian Exposition* recognize what qualities go to make up a good horse nail and that only the "Putnam" contains them all.

ARE YOU HERE TO MAKE MONEY?

IF SO, THE PRICES WE ARE MAKING ON

OIL HEATERS AND GAS STOVES

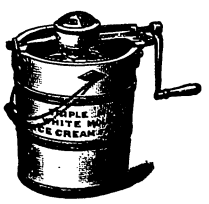
WILL INTEREST YOU.

B. & B. Stoves are the Leaders.

B. & B. Combination Oil Heaters and Cook Stoves are a great success, as proven by the many testimonials received from all parts of the country.

Every Stove is mounted on rollers, and can easily be moved from room to room. *They can be used in place of a range in the kitchen or in place of a base-burner in the parlor.* They are thoroughly well adapted to fill all requirements, *combining as they do all the qualities of a first-class Oil Heater and an elegant Parlor Cook Stove.*

If you happen to have one of them upstairs, *the tank can easily be removed and taken down to the kitchen to be filled,* and again replaced in the Stove.



Those who have used the old style Stove with tanks fastened in them as tight as if cast in the iron will appreciate this feature. They can be fitted with our 2-hole, 3-hole or 4-hole Extension Tops for regular 8-inch ware. We want your trade, and if you will give us a chance to quote you prices we will have it.

HOLIDAY GOODS.

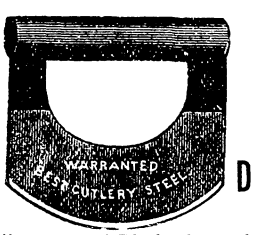
Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.



We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

DISSTON'S Improved Saw Clamp
AND FILING GUIDE.

ESPECIALLY DESIGNED TO ASSIST THOSE NOT SKILLED IN THE ART OF SAW FILING TO FILE A SAW CORRECTLY.

CUT No. 1.

Cut No. 1 shows a saw and the attachment in proper position for filing the first side; and Cut No. 2 shows the saw and attachment reversed and in position to file the second side. There are three marks on one of the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position No. 1, and the other designates when it is in position as shown in No. 2. The third, or centre, marks show when it is in position for filing Rip Saws.

CUT No. 2.

To obtain the correct position, loosen the wing nut and move the guide around to the point desired; after tightening wing nut, loosen screw in file handle, then turn handle until file gives the shape tooth wanted.

A good way is to select a tooth of correct shape and let file down into it, tighten set screw in handle, then file a tooth to see if the shape suits. If not turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth, see cut No. 1; when one side is filed, reverse saw and attachment and adjust as in No. 2, and file the other teeth. For Rip Saws, place the file at right angles with the saw and file every tooth. Always keep the file as nearly horizontal as possible.

This filing guide is sold only attached to our No. 3 Improved Clamp or Vise, and not sold separately. We recommend this as the best saw clamp on the market, being quickly and easily adjusted, and not liable to get out of order.

Write for price including No. 3 Clamp, Filing Guide, File and Handle complete. Packed one in a wooden box

THE FILES THAT LEAD THEM ALL.

THE BEST EQUIPPED FILE WORKS IN THE WORLD.

The fact that we alone use the improved File Machinery recently invented by Alfred Weed, and the even heat of natural gas, enables us to produce a file that will cut faster and wear longer than any on the market.

Just Published.—THIRD REVISED EDITION.

THE IRON AGE STANDARD HARDWARE LISTS

FOR USE IN PRICE BOOKS.

Compiled by R. R. WILLIAMS, Hardware Editor of The Iron Age.

This pamphlet contains the principal standard Hardware price-lists in as clear and compact an arrangement as possible, so as to permit their being advantageously cut out and inserted in the price book. In order to make them adapted to this use they are printed on thin and tough paper of fine quality and on only one side of the paper.

Saucepans and Round Boilers.

	Plain	Turned.	Tin'd or En'd.
Pints.			
1	$0.30	.35	.39
1½	.32	.37	.44
2	.35	.39	.48
3	.42	.47	.56
Quarts.			
2	.50	.56	.63
2½	.53	.59	.68
3	.55	.62	.73
4	.60	.68	.84
5	.65	.75	.96
6	.70	.81	1.11
7	.75	.84	1.21
Gallons.			
2	.85	.96	1.31
2½	1.05	1.18	1.56
3	1.20	1.35	1.70

The success of the effort to give the lists in small space is illustrated in many of the lists, in which a clear and condensed arrangement is secured. For instance, the wrench list occupies but 3 inches by ¼ inch, while the list of Stove Hollow Ware, in very small space, gives the list prices on a large and important line of goods which often occupy several pages in catalogues. In several lists, such as Strap and T Hinges and Butts, a new arrangement is adopted, which is regarded as presenting these lists in a very convenient as well as condensed form.

As is obvious from the lists herewith reproduced, the shape and size of the different lists varies greatly, the aim being to give each list the smallest and most convenient arrangement possible. None of the lists are, however, more than 3½ x 6 inches in size, very few of them being as large as this and most of them very much smaller. In use it is intended that they shall be trimmed closely before they are inserted in price books, when they may be attached either by one edge close to the hinge of the book, as will, perhaps, be most convenient with the larger lists, permitting the use of the entire page for memoranda, or the smaller lists may be pasted on the page in connection with the entries in regard to discounts, freights, &c. Many of the lists are so compact in arrangement as when thus inserted to leave ample room for recording quotations.

Stove Hollow Ware. Ground and Unground.

POTS, KETTLES, ETC. (CAST IRON.)

No.....	6	7	8	9	10	11
Pots.....	$0.65	.75	.85	1.00	1.25	1.75
Kettles.....	.55	.65	.70	.85	1.00	1.40
T Kettles.....	.75	.80	.90	1.00	1.25	....
Spiders.....	.27	.30	.35	.40	.50	.60
Griddles Round	.22	.25	.27	.30	....	....
" Long..	.40	.50	.60	.75	....	....

SCOTCH AND YANKEE BOWLS.

No ...	1	2	3	4	5	6
Scotch Bowls..	$0.35	.40	.45	.50	.60	.70
Yankee Bowls.	.35	.45	.55	.65	.75	.90

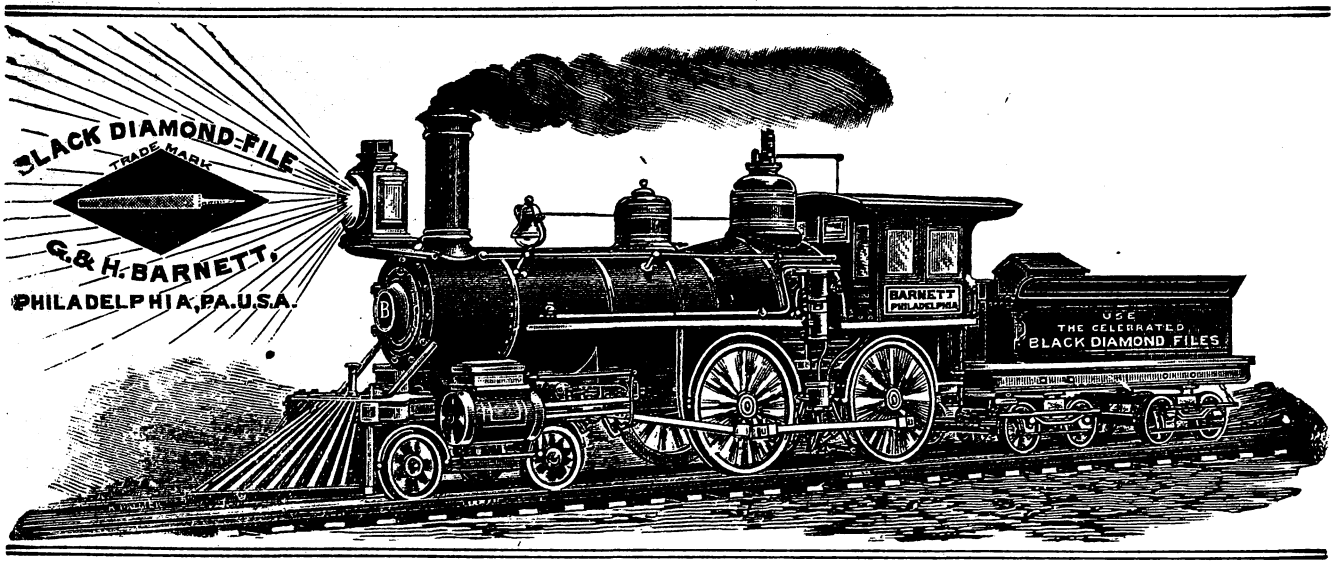
Wrenches. Standard List.

Inches.	6	8	10	12	15	18	21
Black...	$9.00	$10.00	$12.00	$14.00	$24.00	$30.00	$36.00
Bright..	10.00	11.00	14.00	16.00	26.00	32.00	38.00

Some merchants use this pamphlet for reference, checking off invoices, etc., as it gives the leading lists in a more convenient form than they can otherwise be obtained. The lists are, however, intended primarily to be cut out and inserted in price books, and *can be used in connection with any of The Iron Age Hardware Price Books.*

Glue Pots. Tinned or Enameled

No. 4/0....	$4.50	No. 2	$8.40
3/0....	5.00	3.....	10.26
2/0....	5.50	4	12.42
0	6.00	5.....	14.58
1	6.75	6.	16.94



That the Standard Hardware Price Lists meet a want of the trade is evident from the fact that a Third edition is already called for.

EVERY HARDWAREMAN SHOULD HAVE A COPY. Price 25 cts.

BAILEY

Single Spiral Double Cutter Auger Bits and Augers.

We have purchased from the assignee of the Bailey Auger Bit Co. the entire stock of their auger bits, car bits and augers, and offer them at prices that defy competition. Note why this bit is superior to many others.

The large receptacle in the spiral is so arranged as to hold the chip back from the wall of the hole, and force it up and directly out, thus making it impossible to choke and easily turned by the operator. It is a rapid cutter, because it has a double threaded screw point, put on by a machine specially designed for that purpose, which causes the point to cut its way into wood, and thus obtain a firmer hold. In quality of steel, workmanship and style of tool it has no equal.

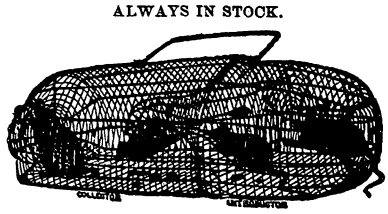
Reliable Torches are what you want.

Made either for Oil or Gasoline.



These Torches are particularly adapted for use in Factories, Foundries, Machine Shops, Rolling Mills, Blacksmith Shops, Warehouses, &c. They make a strong white light, are free from smoke and are not affected by wind or rain. They are convenient and portable. These Torches can be run at an expense of about one-half cent to one cent per hour, burning a bright, steady light which is ten times greater than the light of an ordinary gas burner.

Enough Said!

SOLD BY ALL HARDWARE DEALERS. SEND FOR CATALOGUE.

Branch Office and Warehouse with J. C. McCARTY & Co., 97 Chambers Street, New York.

"SHUT DOWN! What's the Matter?"

"BELT BROKE AGAIN!"

"See here, Mr. Foreman, if you don't have fewer stoppages I'll——"

"Stop, Mr. Proprietor, the fault is yours. Quit buying belts that crack, peel, open between plies, stretch and break, and I'll give you a smooth run. You think it economy to buy cheap belts from Worthless & Co. Why! the time lost and trouble and annoyance caused by shut-downs would pay the difference between good and bad belts ten times over. Why don't you buy Cleveland's 'Shield High Grade,' sold by Reliable & Co.? It has an established reputation, has been thoroughly tested, and is in use in all the large mills and elevators here. You take no chances on it. Besides, a strong warrantee is indelibly branded upon it, such as no manufacturer would dare put on a poor belt. You remember that threshing machine man, whose engine we repaired, said he had a Cleveland High Grade Belt in use over five years, and if it will stand such severe work, it certainly will ours."

Trade  Mark.

LABEL INDELIBLY STAMPED ON EVERY 30 FEET OF BELT.

We are the only manufacturers who indelibly stamp a warrantee on each and every belt (see copy of label) and it remains as long as the belt lasts; and who give a written guarantee (see fac-simile). Our threshing machine belts have made a wonderful record, and our endless belts have given splendid service, the splice being as strong as the solid part of the belt. Suction Hose for Portable Engines and all other purposes.

We Want Your Trade.
Send for 60-page Catalog.
Write for Prices and Samples

GUARANTEE.

We Guarantee *our "Shield High Grade" Belt to be made of best long staple, 30 & 32-oz. cotton duck; To be the most durable, because it is made of best materials, by special machinery; To be the best selling belt, because it has the best reputation, a cleaner record of long service, and because its warrantee is stronger, bolder, broader than any other, and is irrevokable, protecting both dealer and consumer. We further guarantee that, should any belt, under fair and reasonable service, fail or give out from any defect in material or manufacture, to replace same free of charge, on return to us.*

Witness *our hand and seal.*

STEEL HORSE SHOES.

SHOENBERGER & CO., PITTSBURGH, PA.,

After numerous and costly experiments have succeeded in manufacturing a special quality of soft homogeneous steel, specially adapted to the manufacture of Horse and Mule Shoes, and are now making from this steel Extra Swaged, and Government Pattern Horse and Mule Shoes. They give the best of satisfaction everywhere and we furnish them to the trade at the same prices as the regular iron shoe sold by ourselves and our competitors. We are at present making our Roadster Pattern Horse Shoes out of Iron, but we will make them of Steel also within a short time.

The advantages are that, being made of vastly superior material, they will never show signs of red-shortness or cold-shortness, will never split in the crease and will always show a much finer finish than any iron shoe.

We make the Steel Shoes lighter than the Iron, giving more shoes to the keg, as follows:

No. 1, 15 more shoes to the keg.
" 2, 14 " " " "
" 3, 10 " " " "
" 4, 8 " " " "

And other sizes in proportion.

No. 2 EXTRA SWAGED HIND.

We also beg to say that we have introduced improved machinery into our new factory and have doubled our capacity, and are now prepared to furnish the best shoe, either iron or steel, ever offered to the trade.

We would also call your attention to our Improved Steel Toe Calk, equal to any in the market. To secure the best wearing qualities use sand or borax in welding on a calk and cool off at a dark red, or still better, cool off without plunging in water. We make sizes numbers 1, 2, 3, 4, 5 and 6, packed in 25-pound boxes.

Write to us for information and prices, or apply to jobbers and dealers, who sell them everywhere.

Ventilation and Heating. By JOHN S. BILLINGS A.M., M.D. In preparing this volume my object has been to produce a book which will not only be useful to students of architecture and engineering, and be convenient for reference by those engaged in the practice of these professions, but which can also be understood by non-professional men who may be interested in the important subjects of which it treats; and hence technical expressions have been avoided as much as possible, and only the simplest formulæ have been employed. It includes all that is practically important of my book on the Principles of Ventilation and Heating, the last edition of which appeared in 1889; but it is substantially a new work, with numerous illustrations of recent practice. Over 600 pages, 21 illustrations.....$6.00

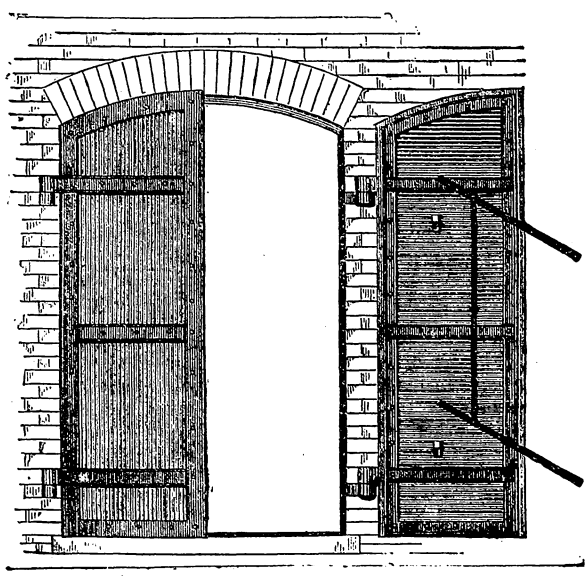
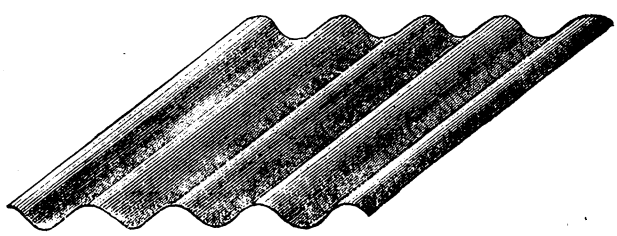
THE BERLIN IRON BRIDGE CO.,



Engineers, Architects and Builders in Iron and Steel,

Office and Works,



EAST BERLIN, CONN.

This illustration (taken direct from a photograph) shows the construction adopted by us for heavy floors in Pulp and Paper Mills, Machine Shops, Elevators, etc., where the floor loads are very excessive. Heavy Iron Girders supported by Iron Posts extend across the building carrying the floor joist. To support the ends of these girders, we often use iron posts placed in the brick side walls. Where loads are excessive and the width of the building is extreme, this construction particularly commends itself.

The above illustration shows our regular pattern of Double thickness Corrugated iron shutters, composed of two plates of corrugated iron (with corrugations running at right angles to each other) built into a heavy angle iron frame, thoroughly supported by bands, flanges, hinges and latch bars, forming a fire proof shutter which will not warp twist or bend when exposed to the most severe heats.

We are prepared to furnish Corrugated Iron, painted both sides, all sizes and gauges. Our Oil Finished Corrugated Iron is superior in lasting qualities to any in the market.

The Leading Authority on Business Law.

PARSONS'

THE LAWS OF BUSINESS,

For all the States and Territories of the Union.

By Theophilus Parsons, LL.D.

864 pages, 6 x 9 inches; full leather $4.50

This is a work almost indispensable to every business man, as a guide in transactions which are occurring constantly.

It constitutes a library of law on daily business affairs and is used for constant reference by many of the leading concerns throughout the country.

The volume treats fully and clearly of contracts, sales, agency, agreements and assessments, stoppage and transitu, considerations, limitations, notes and bills of exchange, interest and usury. Embraces chapters on commercial law in general, bonds, assignments, guaranty, the statute of frauds, receipts and releases, payment, partnership, arbitration, carriage of goods and passengers by railroad and other carriers hotel keepers, patents, copyrights, statute of limitations, the law of place, shipping, marine, fire and life insurance, deeds of land, mortgages of land, mortgages of personal property, leases, liens of mechanics and material men, the recovery of debts, wills, executors and administrators, guardians, and the legal rights of farmers, &c. Also abstracts of the laws of all the States and Territories relating to the collection of debts, usury, the execution and acknowledgment of deeds, witness required to wills, holidays and days of grace, mechanics' liens, chattel mortgages, and nearly 300 approved forms which have been tested in courts.

THE COST OF MANUFACTURES

——) AND THE (——

ADMINISTRATION OF WORKSHOPS,

Public and Private.

BY CAPT. HENRY METCALFE.

322 Pages; 6¼ x 9½ inches. CLOTH, $5.00

This work is an effort to correct some of the wrong, and consequently unprofitable, methods of conducting manufacturing establishments, and proposes plans for more correct ones. A system of mechanical bookkeeping, based on the card catalogue method, dispensing with the use of books, by which the cost of manufactures may be promptly determined, either in gross or detail, as to component parts and operations thereon. Comprising a simple method of recording all dealings with material which relate to its procurement, expenditure or possession. Applied, with numerous practical illustrations, to the trust, accountability for public property and funds required of the U. S. Ordnance Department, with a review of its present practice. Illustrated with tables, forms of cards, etc.

HIGGS WATER VALVE

FOR GAS FURNACES AND PRODUCERS.

Used for reversing the gas from one end of the furnace to the other. It is kept cool by water in an upper and lower chamber, and the butterfly or flapper, which prevents it from burning, warping or leaking and by its use saves from 20 to 25 per cent of fuel, saves wasting of iron in the furnace by the shortage of gas caused by the leaking of the valve. Will last for years.

THE A B C OF IRON.

By CHAS. W. SISSON.

CLOTH.

Price Reduced to $1.00.

CONTENTS.

IRON—WHAT IS IT?

A description of the metal and its uses, showing in what combinations it is found and the principal sources.

PIG IRON.

An account of the blast furnace process by which the ores are reduced to pig iron.

CONSTITUENTS OF IRON.

A description of the elements in pig metal which influence cast iron. Described in chapters on CARBON IN CAST IRON, PHOSPHORUS IN CAST IRON, SILICON IN CAST IRON, MANGANESE IN CAST IRON, SULPHUR IN CAST IRON.

NUMBERING OF PIG IRON.

Showing the character and analysis of different grades of pig iron, appearance of fracture and the uses to which the several grades are adapted.

GRADING OF IRON.

Should it be by analysis or by fracture?

HOW TO REDUCE COST OF MIXTURE.

STEEL.

PHYSICAL PROPERTIES OF METALS DEFINED.

Table of shrinkage of Castings. Weights of castings from patterns, etc.

STATISTICS.

Showing the varieties and production of iron ore, pig iron, pig iron and steel products, railroad mileage and equipment, etc., etc., etc.

EARLY HISTORY AND MANUFACTURE OF IRON.

Brief history of the manufacture and uses of iron from earliest times, being principally extracts from Mr. James M. Swank's "HISTORY OF IRON IN ALL AGES."

The Whiting Cupola.

Many of our friends say we are too modest in our claims for the "Whiting" and their reports and letters certainly verify the assertion It melts faster and better than we claim.

You should send for circulars and letters and see what can be done in a cupola when it is properly designed.

Green River Bolt-Cutting, Nut-Tapping and Pipe-Threading Machines with

OPENING DIES.

This machine has the very great advantage of opening-dies, which do not need to be adjusted, but stand always ready for work and instantly release the bolt when threaded, without being run back over the screw, thereby saving nearly enough time to thread another bolt, and also saving much wear on the dies. By simply turning the hand wheel the dies separate and the work can be taken out.

There are so many sizes of dies in a pr. of holders that it requires but an instant to change from one size to another. This makes it possible to thread a lot of bolts of different sizes almost as quick as if all were of the same size. Each die cuts a full thread at one operation, and the hollow spindle allows a screw of any desired length to be cut.

We know of no machine which can approach it for quickness and convenience in threading bolts or pipe. We cannot recommend it too highly to any one in need of a perfect bolt-cutter and pipe-threader.

SEND FOR CATALOGUE.

Wiley & Russell Mfg. Co.

Engines, &c.

RICHMOND, IND., April 12th, 1893.

MESSRS. CRAIG RIDGWAY & SON,
Coatesville, Pa.

Dear Sirs:—We have five of your Cranes in use in our new foundry. We find them capable for the heaviest lifting and equally adapted for nicety of performance when drawing a pattern from the flask and in all similar operations. They are convenient and do not take severe effort on the part of anybody to accomplish a great variety of useful results which we secure every day from their use. We do not hesitate to recommend them very highly and we do not see anything to hinder a valuable future for them and consequent advantage to yourself. We are very glad to add our testimony in this manner to the genuineness of all you claim for the Ridgway Balanced Crane and recommend it to public favor.

Very truly,
GAAR, SCOTT & CO.

Locations for Factories.

The Industrial Department of the Chicago, Milwaukee & St. Paul Railway has charge of matters pertaining to the development of the territory traversed by the railroad and the directing of manufacturers to points best suited to their particular requirements.

Eight States are traversed by the 6,150 miles of the Chicago, Milwaukee & St. Paul Railway's tracks, namely: Illinois, Wisconsin, Northern Michigan, Iowa, Missouri, Minnesota, South Dakota and North Dakota.

The company is daily in touch with the people in its territory, and from the number and varied nature of the industries locating and springing up on the line, and its acquaintance with the natural resources, has the facilities at hand to promptly furnish manufacturers with reliable information as to locations adapted to particular industries.

LUIS JACKSON,
Industrial Commissioner,
C., M. & St. P. R'y, 160 Adams Street, Chicago, Ill.

LUXURY ON WHEELS.

The "Electric" trains of the **Cincinnati, Hamilton & Dayton R. R.** and "**Monon**" **Route** between **Cincinnati and Chicago** are provided with the latest product of the Pullman Co. built expressly for this service. There are 10 compartments in each car, which may be converted at will into complete drawing rooms, most beautifully and harmoniously decorated, lighted by the Pintsch gas system, and are positively the most modernly equipped sleeping cars in the world. This is the only line running Pullman Vestibule and Dining Cars between the cities named. THE World's Fair Route. See that your ticket reads **C., H. & D. and Monon Route.**

ARE YOU HERE TO MAKE MONEY?

IF SO, THE PRICES WE ARE MAKING ON

OIL HEATERS AND GAS STOVES

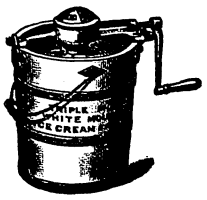
WILL INTEREST YOU.

B. & B. Stoves are the Leaders.

B & B. Combination Oil Heaters and Cook Stoves are a great success, as proven by the many testimonials received from all parts of the country.

Every Stove is mounted on rollers, and can easily be moved from room to room. *They can be used in place of a range in the kitchen or in place of a base-burner in the parlor.* They are thoroughly well adapted to fill all requirements, *combining as they do all the qualities of a first-class Oil Heater and an elegant Parlor Cook Stove.*

If you happen to have one of them upstairs, *the tank can easily be removed and taken down to the kitchen to be filled,* and again replaced in the Stove.



Those who have used the old style Stove with tanks fastened in them as tight as if cast in the iron will appreciate this feature. They can be fitted with our 2-hole, 3-hole or 4-hole Extension Tops for regular 8-inch ware. We want your trade. and if you will give us a chance to quote you prices we will have it.

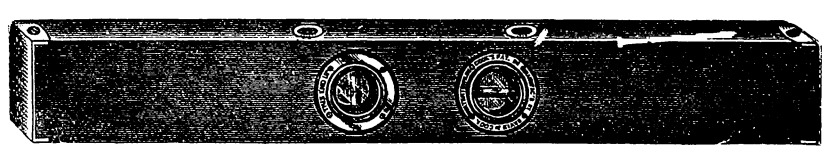
HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

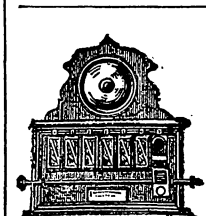
These two machines are taking the place of all others, and are now the most in demand throughout the world.



No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.



Price of Rogers Saw, complete, $3.50.

DISSTON'S Improved Saw Clamp
AND FILING GUIDE.

ESPECIALLY DESIGNED TO ASSIST THOSE NOT SKILLED IN THE ART OF SAW FILING TO FILE A SAW CORRECTLY.

CUT No 1.

Cut No. 1 shows a saw and the attachment in proper position for filing the first side; and Cut No. 2 shows the saw and attachment reversed and in position to file the second side. There are three marks on one of the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position No. 1, and the other designates when it is in position as shown in No. 2. The third, or centre, marks show when it is in position for filing Rip Saws.

CUT No. 2.

To obtain the correct position, loosen the wing nut and move the guide around to the point desired; after tightening wing nut, loosen screw in file handle, then turn handle until file gives the shape tooth wanted.

A good way is to select a tooth of correct shape and let file down into it, tighten set screw in handle, then file a tooth to see if the shape suits. If not turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth, see cut No. 1; when one side is filed, reverse saw and attachment and adjust as in No. 2, and file the other teeth. For Rip Saws, place the file at right angles with the saw and file every tooth Always keep the file as nearly horizontal as possible.

This filing guide is sold only attached to our No. 3 Improved Clamp or Vise, and not sold separately. We recommend this as the best saw clamp on the market, being quickly and easily adjusted, and not liable to get out of order.

Write for price including No. 3 Clamp, Filing Guide, File and Handle complete. Packed one in a wooden box

The fact that we alone use the improved File Machinery recently invented by Alfred Weed, and the even heat of natural gas, enables us to produce a file that will cut faster and wear longer than any on the market.

Highest Award

FOR

Supreme Excellence

TO

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS,

PUTNAM HOT FORGED & HAMMER POINTED.

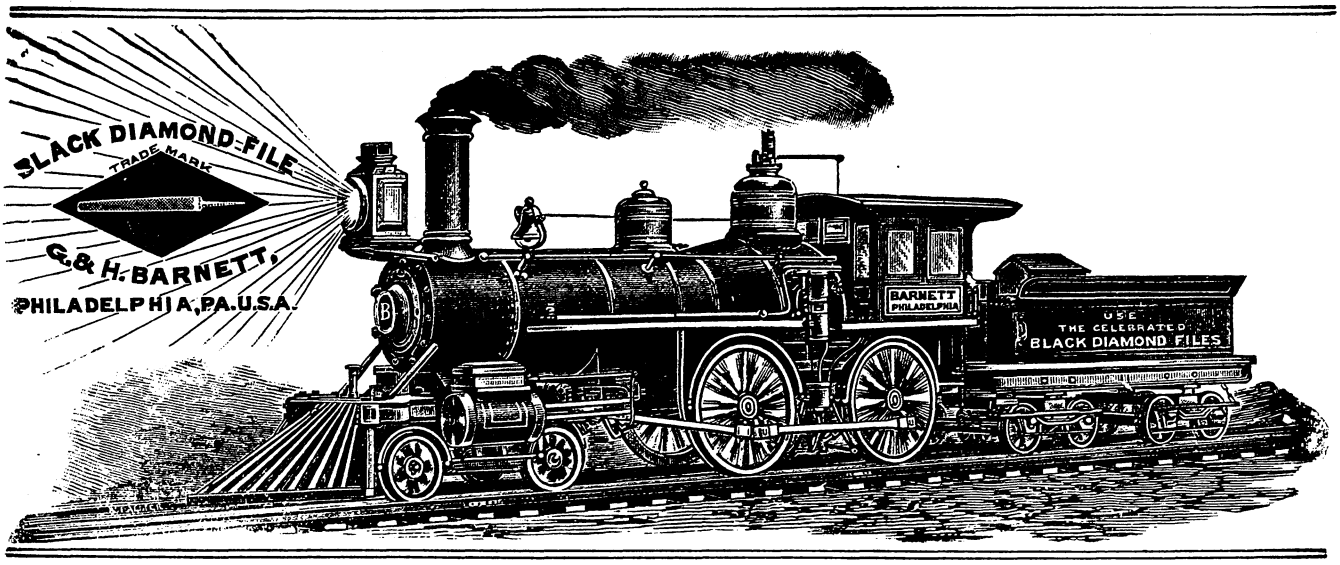
At the *World's Columbian Exposition* at Chicago. A medal and diploma worded:

"Supreme excellence in material, method in manufacture, and quality of finished product; elasticity and smoothness combined with holding power in clinch.

It allows the use of very small nails."

There is nothing beyond "supreme excellence," nor is there anything comprised in a horse nail, except the "material from which it is made," "the method of manufacture," and "quality of finished product."

Putnam nails, by their "elasticity," give slightly to the expansion and contraction of the hoof while the horse is in motion; by their "smoothness," do not enlarge the nail holes in the hoof, while their "supreme excellence," in "holding power in the clinch," enables them to hold the shoe in the hardest service until worn out.



By the "use of small nails," large holes are avoided and money saved to the smith.

Thus it will be seen that the officials of the *World's Columbian Exposition* recognize what qualities go to make up a good horse nail and that only the "Putnam" contains them all.

THERE IS NOTHING NEW

TO SAY ABOUT THIS KNIFE EXCEPT

IT IS GROUND SHARP

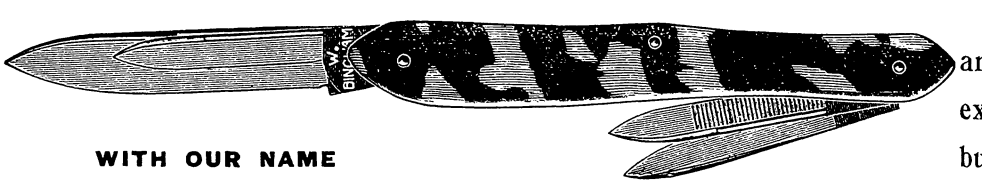
WE DON'T KNOW HOW TO IMPROVE IT.

Blade is made of steel especially prepared for the purpose, and it is made just right; finish excellent; shape unsurpassed; the handle just fits the hand.

GENERAL APPEARANCE IRREPROACHABLE.

Made in sizes from 5 inch to 8 inch; a strictly first-class butcher knife at a moderate price.

WE HAVE OTHER BUTCHER KNIVES,



4½ to 14 inch blade, that will cut as well, for less money. Also Table Knives and Forks, Carvers, Butcher Steels, Bread Knives, Cheese Knives, Butter Spades, Apple, Kitchen, Putty, Cigar, Shoe Knives, &c., &c., in great variety. We aim to make the best and sell at reasonable prices.

AZTEC COIN METAL has no plating to wear off. Made of solid metal. Easily kept clean.

THE HOLMES & EDWARDS SILVER CO.. - Bridgeport, Conn.

SOLID COLUMBIAN SILVER FLAT WARE, a Substitute for SOLID SILVER.

WARRANTED FOR 25 YEARS.

There is no plating to wear off and no rusty edges. The cost is no more than silver plated goods. Hotels and restaurants appreciate this great change, which will, no doubt, in time revolutionize the steel knife trade. We ask the trade not to confound this metal with silver metals, nickel silver or any other quack named goods which are flooding the market at the present time.

BAILEY

Single Spiral Double Cutter Auger Bits and Augers.

We have purchased from the assignee of the Bailey Auger Bit Co. the entire stock of their auger bits, car bits and augers, and offer them at prices that defy competition. Note why this bit is superior to many others.

The large receptacle in the spiral is so arranged as to hold the chip back from the wall of the hole, and force it up and directly out, thus making it impossible to choke and easily turned by the operator. It is a rapid cutter, because it has a double threaded screw point, put on by a machine specially designed for that purpose, which causes the point to cut its way into wood, and thus obtain a firmer hold. In quality of steel, workmanship and style of tool it has no equal.

Reliable Torches are what you want.

Made either for Oil or Gasoline.

These Torches are particularly adapted for use in Factories, Foundries, Machine Shops, Rolling Mills, Blacksmith Shops, Warehouses, &c. They make a strong white light, are free from smoke and are not affected by wind or rain. They are convenient and portable. These Torches can be run at an expense of about one-half cent to one cent per hour, burning a bright, steady light which is ten times greater than the light of an ordinary gas burner.

STEEL HORSE SHOES.

SHOENBERGER & CO., PITTSBURGH, PA.,

After numerous and costly experiments have succeeded in manufacturing a special quality of soft homogeneous steel, specially adapted to the manufacture of Horse and Mule Shoes, and are now making from this steel Extra Swaged, and Government Pattern Horse and Mule Shoes. They give the best of satisfaction everywhere and we furnish them to the trade at the same prices as the regular iron shoe sold by ourselves and our competitors. We are at present making our Roadster Pattern Horse Shoes out of Iron, but we will make them of Steel also within a short time.

The advantages are that, being made of vastly superior material, they will never show signs of red-shortness or cold-shortness, will never split in the crease and will always show a much finer finish than any iron shoe.

We make the Steel Shoes lighter than the Iron, giving more shoes to the keg, as follows:

No. 1, 15 more shoes to the keg.
" 2, 14 " " " "
" 3, 10 " " " "
" 4, 8 " " " "

And other sizes in proportion.

No. 2 EXTRA SWAGED FRONT.

We also beg to say that we have introduced improved machinery into our new factory and have doubled our capacity, and are now prepared to furnish the best shoe, either iron or steel, ever offered to the trade.

We would also call your attention to our Improved Steel Toe Calk, equal to any in the market. To secure the best wearing qualities use sand or borax in welding on a calk and cool off at a dark red, or still better, cool off without plunging in water. We make sizes numbers 1, 2, 3, 4, 5 and 6, packed in 25-pound boxes.

Write to us for information and prices, or apply to jobbers and dealers, who sell them everywhere.

Cobb & Drew, Plymouth, Mass.
Grand Crossing Tack Co., Grand Crossing, Ill.
Nat. Screw & Tack Co., Cleveland O.
Phillips, E. & Sons, South Hanover.
Trufant, W. E., Whitman, Mass.

Taps and Dies.
Butterfield & Co., Derby Line, Vt.
Carpenter, J. M., Tap & Die Co., Pawtucket, R. I.
Manning, Maxwell & Moore, 111 Liberty St., N. Y.
Wells Bros. & Co., Greenfield, Mass.
Wiley & Russell Mfg. Co., Greenfield, Mass.

Testing Laboratories.
Riehle Bros. Testing Mch. Co., Philadelphia.

Testing Machines.
Riehle Bros. Testing Mch. Co., Phila.

Theatrical Hardware.
Wollensak, J. F., Chicago, Ill.

Thill Springs.
Frost Thill Spring Co., Boston, Mass.
Sabin Machine Co., Montpelier, Vt.

Time Record.
Scattergood, H. W., Phila., Pa.

Tinners' Hardware.
Berger Bros., Philadelphia, Pa.

Tinning Process.
Sands, Thomas, Nashua, N. H.

Tin Plate Machinery.
Lloyd Booth Co., Youngtown, Ohio.

Tinware.
Am. Stamping Co., 104 & 106 John St.,

Tire Upsetters.
Butts & Ordway, Boston, Mass,

Toe Calks, Steel.
Burke, P. F., Boston, Mass.

Tool Chests.
Am. Tool Co., 200 W. Houston St., N.Y.

Tools.
Brown, R. H. & Co., New Haven, Conn.
Frasse Co., 19 Warren St., New York.
Mayhew, H. H. Co., Shelburne Falls, Mass.
Millers Falls Co., 93 Reade, N. Y.
Richardson, C. F. & Son, Athol, Mass.
Standard Tool Co., Athol, Mass.
Stanley Rule & Level Co., 29 Chambers,
Starrett, L. S., Athol, Mass.

Tools, Blacksmith and Wheelwrights.
Buffalo Forge Co., Buffalo, N. Y.
Butts & Ordway Boston, Mass.
Champion Blower & Forge Co., Lancaster, Pa.
Plumb, Fayette R. Philadelphia, Pa.
Wiley & Russell Mfg. Co., Greenfield, Mass.

Tools, Steam and Gas Fitters'
Saunders' Sons, D., Yonkers, N. Y.

Torches, Oil and Gasolene.
Dangler Stove & Mfg. Co., Cleveland, O.
Schneider & Trenkamp Co., Cleveland, Ohio.

Transom Lifters.
Wollensak, J. F. Chicago, Ill.

Trucks. *Manufacturers of.*
Berger Bros., Philadelphia, Pa.
Boston & Lockport Block Co., Boston, Mass., and Lockport, N. Y.
Clark, G. P., Windsor Locks, Conn.
Lansing Wheelbarrow Co. Lansing Mich.

Tubes, Seamless Drawn Copper.
Ansonia Brass & Copper Co., 19 and 21 Cliff, N. Y.
Randolph & Clowes, Waterbury, Conn.

Tubes, Steel.
Ellwood Shafting & Tube Co., Ellwood City, Pa.
Leng's John S. Son & Co., 4 Fletcher St., New York.

Tumbling Barrels.
Henderson Bros., Waterbury, Conn.

Turnbuckles.
Cleveland City Forge & Iron Co., Cleveland, O.
Merrill Bros., Brooklyn, E. D.

Twist Drills. *Makers of.*
Cleveland Twist Drill Co., Cleveland.
Morse Twist Drill & Machine Co., New Bedford, Mass.
New Process Twist Drill Co., Taunton, Mass.
Standard Tool Co., Cleveland.

Valves, Gas, Water and Steam.
Best, Fox & Co., Pittsburgh, Pa.
Chapman Valve Mfg. Co., Boston.
Eynon-Evans Mfg. Co., Philadelphia, Pa.
Jenkins Bros., 71 John, N. Y.
McNab & Harlin Mfg. Co., 56 John N. Y.
Mason Regulator Co., Boston, Mass.

Ventilator Appliances.
Howard & Morse, 45 Fulton, N. Y.

Vise Jaws.
Newark Mch. Tool Co., Newark, N. J.

Vises.
Capital Mch. Tool Co., Auburn, N. Y.
Hollands Mfg. Co., Erie, Pa.
Howard Iron Works, Buffalo, N. Y
Millers Falls Co., 93 Reade St., N. Y.
Prentiss Vise Co., 44 Barclay N. Y.
Van Wagoner & Williams Co., 14 Warren St., N. Y.

Wagon Jacks.
Boston & Lockport Block Co., Boston, Mass., and Lockport, N. Y.
Covert Mfg. Co., West Troy, N. Y.
Covert's Saddlery Works, Farmer, N. Y

Washers.
Haskell, Wm. H. Co., Pawtucket, R. I.
Milton Mfg. Co., Milton, Pa.
Sternbergh, J. H. & Son, Reading, Pa.

Water Meters.
Worthington, Henry R., 86 & 88 Liberty St., N. Y.

Water Wheels.
Poole, Robt. & Son Co., Baltimore, Md.

Wheelbarrows.
Akron Tool Co., Akron, O.
Amer. Steel Scraper Co., Sidney, Ohio.
Cockburn Barrow & Mch. Co., Jersey City, N. J.
Kilbourne & Jacobs Mfg. Co., Columbus, Ohio.
Lansing Wheelbarrow Co., Lansing, Mich.
Sidney Steel Scraper Co., Sidney, O.
Sweatt Mfg. Co., Minneapolis, Minn.

Whips.
American Whip Co., Westfield, Mass,

Window Cord, *Makers of.*
Samson Cordage Works, Boston, Mass

Wire, *Manufacturers of.*
Consolidated Steel & Wire Co., St. Louis, Mo.
Gautier Steel Department of Cambria Iron Co., Johnstown, Pa.
Miller & Van Winkle, Brooklyn, N. Y.
New Castle Wire Nail Co., New Castle, Pa.
New Haven Wire Mfg. Co., New Haven, Conn.
Salem Wire Nail Co., Salem, O.
Trenton Iron Co., Trenton, N. J.
Washburn & Moen Mfg. Co., Worcester
Wetherell Bros., 93 Liberty St., N. Y.
Wolff, R. H. & Co., Ltd., 118th St. and Harlem River, N. Y.
Wright & Colton Wire Cloth Co. Worcester, Mass

Wire Cloth.
Barnum, E. T., Detroit, Mich.
Clinton Wire Cloth Co., Clinton, Mass.
Darby, Edward & Sons, Philadelphia.
Estey, W. S., 65 Fulton, N. Y.
Gilbert & Bennett Mfg. Co., 42 Cliff.
Howard & Morse, 45 Fulton, N. Y.
N. J. Wire Cloth Co., Trenton, N. J.
Prentiss, Geo. W. & Co., Holyoke, Mass.
Reliance Wire & Iron Wks. Milwaukee Wis.
Scheeler & Sons, Buffalo, N. Y.
Wickwire Bros., Cortland, N. Y.
Wright & Colton Wire Cloth Co., Worcester, Mass.
W. S. Tyler Wire Works Co., Cleve'd.

Wire Cutters.
King, J. M. & Co., Watertown, N. Y.

Wire Dies.
McFarland, Wm., Trenton, N. J.
Newton & Shipman, 88 John, N. Y.

Wire Fences.—*See Fencing, Iron and Wire.*

Wire Goods, *Manufacturers of.*
Darby, Edward & Sons, Phila.
Gilbert & Bennett Mfg. Co., 42 Cliff St., N. Y.
Ludlow-Saylor Wire Co., St. Louis.
Ossawan Mills Co., Norwich, Conn.
Scheeler & Sons, Buffalo, N. Y.
Wickwire Bros, Cortland, N. Y.
Williamson, C. T. Wire Novelty Co. Newark, N. J.

Wire Machinery.
Am. Tool Wks., Cleveland, O.
Manville, E. J. Mch. Co., Waterbury, Ct.
Morgan Construction Co., Worcester Mass.
Waterbury Mch. Co., Waterbury, Conn

Wire Straightening and Cutting Machinery.
Adt, John & Son, New Haven, Conn.

Wire Nails.
Consolidated Steel & Wire Co., St. Louis, Mo.
Indiana Wire Fence Co., Crawfordsville, Ind.
Kilmer Mfg. Co., Newburg, N. Y.
New Castle Wire Nail Co., New Castle Pa.
Phillips, E. & Sons, South Hanover Mass
Phillips, Townsend & Co., Phil., Pa.
Salem Wire Nail Co., Salem, O.
Whitney, A. R. & Co., New York City

Wire Rods. Steel.
Consolidated Steel & Wire Co., St. Louis, Mo.
New Castle Wire Nail Co., New Castle Pa.
Washburn & Moen Mfg. Co., Worcester, Mass.
Whitney, A. R. & Co., 17 B'way, N. Y.
Wolff, R. H. & Co., Ltd., 118th Street and Harlem River, N. Y

Wire Rope, Iron and Steel *Makers.*
Broderick & Bascom Rope Co., St. Louis, Mo.
California Wire Works, San Francisco
Hazard Mfg. Co., Wilkesbarre, Pa.
A. Leschen & Sons Rope Co., St. Louis
Trenton Iron Co., Trenton, N. J.
Washburn & Moen Mfg. Co., Worcester Mass.
Williamsport Wire Rope Co., Williamsport, Pa.

Wood-Working Machinery.
Seneca Falls Mfg. Co., Seneca Falls, N. Y

Wrenches, *Manufacturers of.*
Bemis & Call Hardware & Tool Co. Springfield, Mass.
Billings, Spencer & Co., Hartford, Conn
Capitol Mfg. Co., Chicago, Ills.
Coes Wrench Co., Worcester, Mass.
Keystone Mfg. Co., Buffalo, N. Y.
Trimont Mfg. Co., Roxbury, Mass.
Williams, J. H., Brooklyn, N. Y.

Wringers.
Colby Wringer Co., Montpelier Vt.
Peerless Mfg. Co., Cleveland, Ohio.

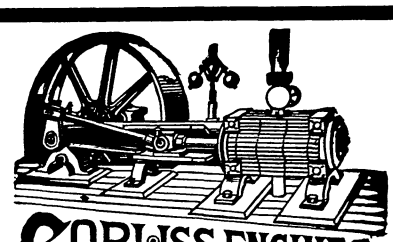
96-102 Reade Street, NEW YORK.

Stanley's Patent Duplex Levels.



These Levels have the ordinary form of leveling-glass, set in the top surface of the Stock; as three-fourths of the uses of a Level are best secured by looking down upon the instrument from above.

For any uses by which an observation of the glass, sidewise, may be found convenient, an additional leveling-glass is set in the side, at the opposite end from the Plumb.

Both glasses are protected by Brass Discs; can be seen from either side; and are inserted in the Level, with the least possible removal of wood from the Stock.

Manufactured by STANLEY RULE & LEVEL CO., New Britain, Conn.
SOLD BY ALL HARDWARE DEALERS.

THE A B C OF IRON.

By CHAS. W. SISSON.

CLOTH.

Price Reduced to $1.00.

CONTENTS.

IRON—WHAT IS IT?

A description of the metal and its uses, showing in what combinations it is found and the principal sources.

PIG IRON.

An account of the blast furnace process by which the ores are reduced to pig iron.

CONSTITUENTS OF IRON.

A description of the elements in pig metal which influence cast iron. Described in chapters on CARBON IN CAST IRON, PHOSPHORUS IN CAST IRON, SILICON IN CAST IRON, MANGANESE IN CAST IRON, SULPHUR IN CAST IRON.

NUMBERING OF PIG IRON.

Showing the character and analysis of different grades of pig iron, appearance of fracture and the uses to which the several grades are adapted.

GRADING OF IRON.

Should it be by analysis or by fracture?

HOW TO REDUCE COST OF MIXTURE.

STEEL.

PHYSICAL PROPERTIES OF METALS DEFINED.

Table of shrinkage of Castings. Weights of castings from patterns, etc.

STATISTICS.

Showing the varieties and production of iron ore, pig iron, pig iron and steel products, railroad mileage and equipment, etc., etc., etc.

EARLY HISTORY AND MANUFACTURE OF IRON.

Brief history of the manufacture and uses of iron from earliest times, being principally extracts from Mr. James M. Swank's "HISTORY OF IRON IN ALL AGES."

H. O. CANFIELD,

MOULDED RUBBER GOODS FOR MECHANICAL PURPOSES.

BRIDGEPORT, CONN.

Small moulded work a specialty. Send for estimates for moulds and work.

September 30, 1893.

I am using Dixon's Perfected Lubricating Graphite on a 12 x 22 x 36 Cooper Tandem, feeding it dry by using an old tallow cup, filling it once every day (it holds about 3 oz.); just before starting I open the valve on the cup, and the steam does the rest.

By using graphite I am able to run six days with one quart of cylinder oil of fair quality. We intend putting cups on all the engines, so as to use graphite on them all.

I have not had a chance to see the inside of the cylinder, but as soon as I do you will hear from me again: for, *if there was ever a good thing manufactured, Dixon's Lubricating Graphite is the thing.*

October 25, 1893.

To-day I have taken off the heads from our tandem engine, and I find the cylinders are in the finest condition after a run of six months. All the parts are as bright as can be, yet show no signs of wear or cutting—thanks to Dixon's pure flake graphite. I consider this graphite the handiest article in an engine room for anything that sticks or squeaks or needs lubricating. Use Dixon's flake graphite is my advice.

Very truly yours, CHAS. N. SHAW,
Asst. Engineer Lowell & Suburban Railway Power House,
Lowell, Mass.

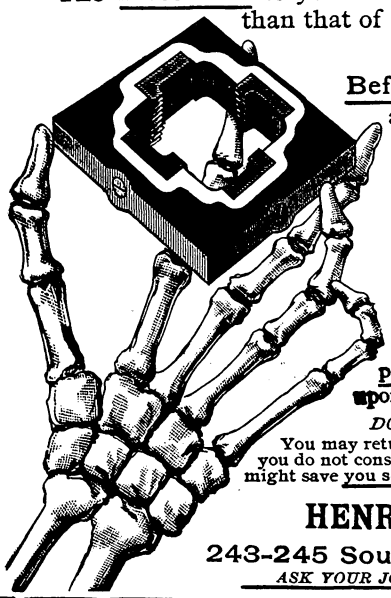
Screw Plates, Screw-Cutting Machinery, Taps, Dies, Reamers, Drills, Drilling Machines, Hand Punching Presses, Tire Shrinkers, Tire Benders, &c. Send for catalogue.



Made by WILEY & RUSSELL MFG. CO., - Greenfield. Mass, U S. A.

Maule's "Skeleton" Pipe Die

Two "Points" about it—only 2 (There are plenty more, but we only mention these two here.)

1

The First Cost to you of MAULE'S "SKELETON" PIPE DIE is less than that of any other Pipe-Threading Die—and

2

Before it becomes dull from use it will cut as many perfect threads as the best solid die extant, and when it is dull, you don't throw it away and buy a new one—Oh, no! You simply sharpen the cutters on a common grindstone, and so make it practically as good as it was at first, and this sharpening process may be repeated a number of times.

A sample One-inch "Skeleton" Pipe Die, either 2⅜ or 2½ x ¾ thick, by mail, postage prepaid, will cost you **62 cents,** and will be sent upon receipt of a Postal note for that amount.

DO NOT SEND US ANY POSTAGE STAMPS.

You may return such sample to us, at our expense, if, after seeing it, you do not consider it worth the price. Don't the above sound as if it might save you some money—if TRUE?

5-ton Ridgway Crane in Foundry Diamond State Iron Co., Wilmington, Del.

Steam-Hydraulic Elevator.

SAFE, RAPID, SURE

—AND—

Not Costly.

The Crane that is perfection for the exacting requirements of a Foundry is the Crane for all places.

Give full particulars and get circulars and prices.

CRAIG RIDGWAY & SON,
Coatesville, Pa.

Ridgway Balanced Steam-Hydraulic Crane.

The Greatest Foundry Crane Known.

Another Big Foundry Adopts It.

The large, handsome and most modern foundry of the country now being erected by the J. I. Case Co. at Racine, Wis., will be equipped with only the latest and best labor saving machinery to be had.

The Cranes used, of course, will be the Ridgway Steam-Hydraulic. The order for these and a lot of our patent one ton air hoists has been placed with us.

When the best money making establishments in the country are adopting, in this way, the Ridgway Crane, what more need be said?

Read what the finest foundry in Chicago says:

FRASER & CHALMERS,
Mining Machinery.

CHICAGO, ILL., April 11, 1893.

MESSRS. CRAIG, RIDGWAY & SON,
Coatesville, Pa.

Dear Sirs:—Replying to your favor of the 6th, asking whether the Steam-Hydraulic Crane furnished for our new foundry at 12th and Rockwell Streets has been satisfactory or not, we beg to say that we have found the Crane highly satisfactory in every respect. We consider it the best Crane made to-day for general foundry use and it is also well adapted for other uses. We should be glad to have you refer anybody to us who may wish to hear directly from us as to our opinion of the Crane. Yours truly,

FRASER & CHALMERS, C. E. Billin, Supt.

A New Foundry Crane.

A Veritable "SAFETY" Traveling Crane.

This SAFETY Crane was designed by us in answer to a demand for a SMOOTH RUNNING Crane.

No Jumping of Chains. No Jarring of Load.

No Loss of Sand. No "Breaking Down of Mould."

Read accompanying letter of well known house of Isaac A. Sheppard & Co.

ISAAC A SHEPPARD & CO.
Excelsior Stove Works and Hollow Ware Foundry.
N. E. Cor. Fourth Street and Montgomery Avenue.
Philadelphia, September 18, 1893.

Messrs. Edwin Harrington, Son & Co.
Fifteenth & Pennsylvania Ave. Philada.

Gentlemen:-

In reply to your inquiry of the 14th. inst., we would say that we are greatly pleased with the special foundry crane which you recently erected in our foundry. It is, in every way, perfectly adapted to the use for which it was intended, and lifts a mould absolutely without jar, so that we have not had the least trouble with the breaking down of a mould at the critical point. For a light foundry crane, we hardly see how it can be improved upon.

Very truly yours,

Isaac A Sheppard & Co

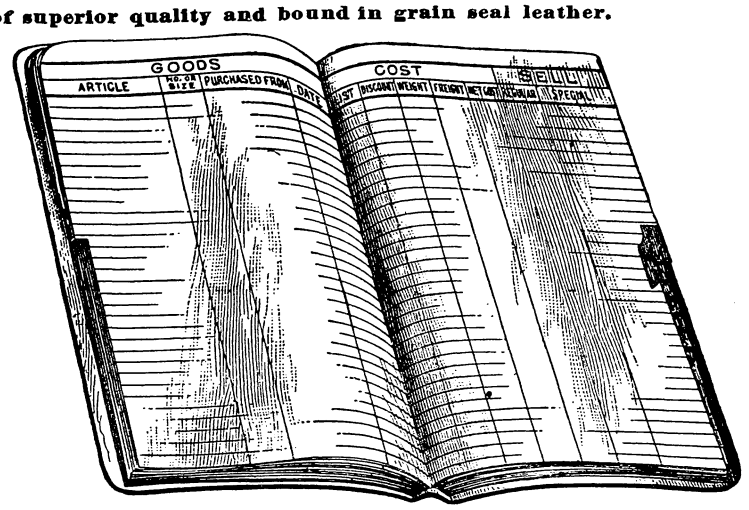
IMPROVED EDITION OF THE IRON AGE

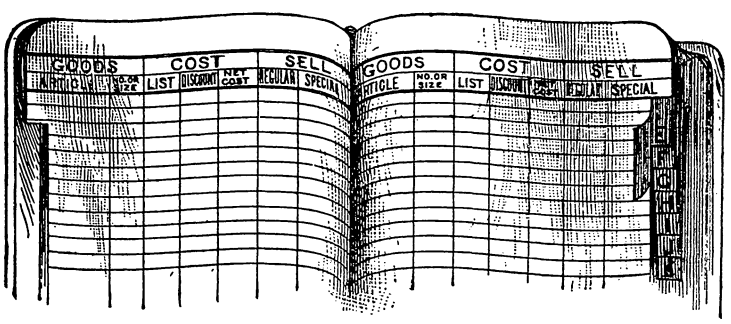
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of the Iron Age.



These Books are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses as an element of cost. Under the heading of selling prices, the regular and any special price, or remarks in regard to the goods are given place. This book goes into considerable detail in describing the goods and cost prices. It has been arranged in accordance with the views of many Hardwaremen whose methods are careful and exact.



Size, 4 x 7 in.; grain seal leather.

FOUR EDITIONS:

A, 200 pages,	$1.00
A F, 200 pages with flap,	1.25
A 2, 400 pages,	1.50
A F 2, 400 pages with flap,	1.75

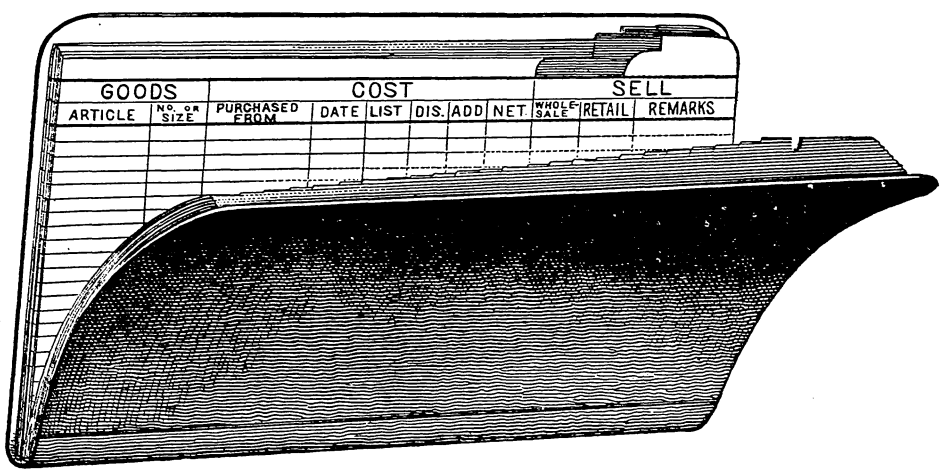
Hardware Price Book A.

Hardware Price Book B.

In this book each page is complete, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. It is adapted for office or store use, and by the use of familiar abbreviations, sufficiently large for the convenient and concise record of prices.

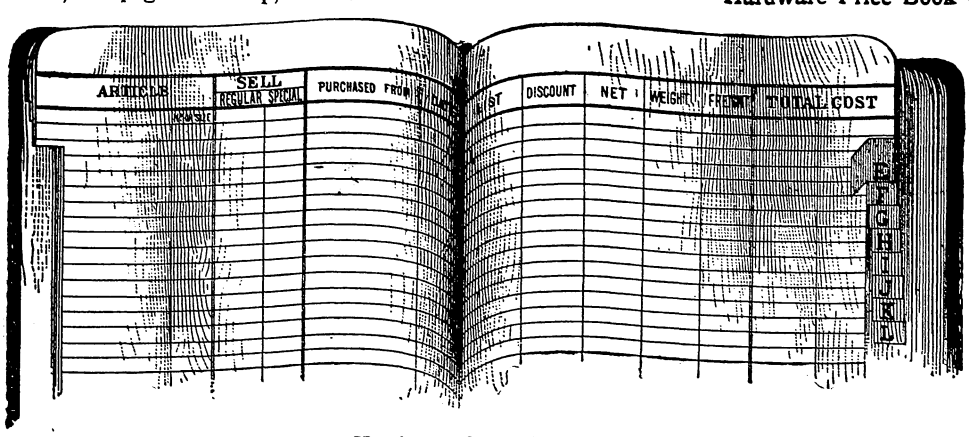
Size, 4 x 7 in.; grain seal leather.

FOUR EDITIONS:



B, 200 pages	$1.00
B F, 200 pages with flap,	1.25
B 2, 400 pages,	1.50
B F 2, 400 pages with flap,	1.75

The headings in Book C run across the top, in a line parallel with the hinge. In this way a very complete record can be kept on a single page. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses which it is desirable to include in the cost. Under the selling prices space is left for the wholesale price, the retail price, and also for any remarks in regard to cost of the goods, desirability of pushing them, or other matters.



Size, 4½ x 7¾ in.; grain seal leather.

FOUR EDITIONS.

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Hardware Price Book C.

Hardware Price Book D.

Price Book D will recommend itself particularly for desk and store use, and for salesmen on the road.

The name of the article, its number or size and the selling price are the first to meet the eye on the left-hand page, as embodying information desired when the selling price is required. The other headings follow in convenient order, by which a detailed memorandum regarding the goods may be kept, the whole being seen at a glance. A number of pages at the back of the book are arranged for memoranda, which will be found a great convenience. This arrangement is adapted to the requirements of the trade in this direction.

Size 5¼ x 8 in.; grain seal leather.

FOUR EDITIONS.

D, 200 pages,	$2.00
D F, 200 pages, with flap,	2.50
D 2, 400 pages.	3.00
D F 2, 400 pages, with flap,	3.50

Sent, post-paid, on receipt of price by **DAVID WILLIAMS, Publisher, 96-102 Reade St., New York.**

ARE YOU HERE TO MAKE MONEY?

IF SO, THE PRICES WE ARE MAKING ON

OIL HEATERS AND GAS STOVES

WILL INTEREST YOU.

B. & B. Stoves are the Leaders.

B. & B. Combination Oil Heaters and Cook Stoves are a great success, as proven by the many testimonials received from all parts of the country.

Every Stove is mounted on rollers, and can easily be moved from room to room. *They can be used in place of a range in the kitchen or in place of a base-burner in the parlor.* They are thoroughly well adapted to fill all requirements, *combining as they do all the qualities of a first-class Oil Heater and an elegant Parlor Cook Stove.*

If you happen to have one of them upstairs, *the tank can easily be removed and taken down to the kitchen to be filled,* and again replaced in the Stove.

Those who have used the old style Stove with tanks fastened in them as tight as if cast in the iron will appreciate this feature. They can be fitted with our 2-hole, 3-hole or 4-hole Extension Tops for regular 8-inch ware. We want your trade, and if you will give us a chance to quote you prices we will have it.

ASK FOR OUR NEW 80-PAGE CATALOGUE.

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

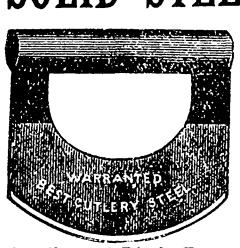
Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.



Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

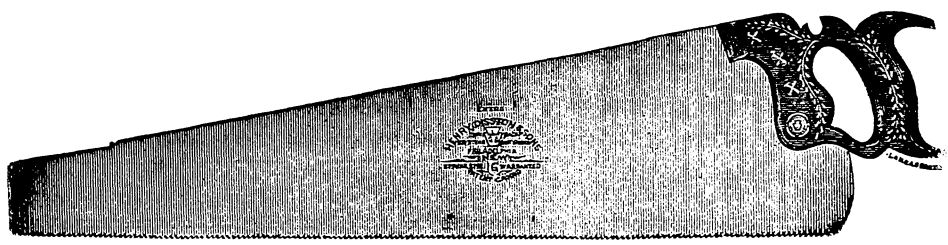
"If you want a Saw it is best to get one with a name on it which has a reputation.
A man who has made a reputation for his goods knows its value as well as its cost and will maintain it."—HENRY DISSTON.

THE SAWS THAT LEAD THEM ALL

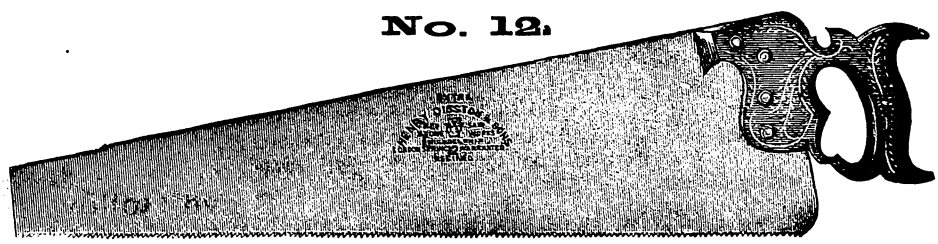
"THE SAW;" HOW TO CHOOSE IT, AND HOW TO KEEP IN ORDER, Sent Free on Receipt of Name and Post Office Address.



DISSTON & SONS' PATENT D-8 HAND SAW.

This Saw combines all the valuable improvements in Hand Saws that have been made by us of late. The first and most important is the hollow or skew back, the success of which can best be attested by the number sold. The peculiar shape of the butt or heel, coupled with the new method of fastening to the handle, give a full stroke of the blade without fear of catching or hooking in the work ; and as the handle is put further on the blade you have a full stop on the proper point and a greater command over your Saw, by reason of being two inches nearer the point, which must give more power.

The Saw being let into the handle on a circle, has a perfect bearing, which, with the new screws, makes it stronger and almost impossible to work loose, and avoids the unsightly gap that is seen on the back of the old style handle. All the above features are patented.



Our New No. 16 Premium Saw.

THIRD REVISED EDITION.

THE IRON AGE STANDARD HARDWARE LISTS

FOR USE IN PRICE BOOKS.

Compiled by R. R. WILLIAMS, Hardware Editor of The Iron Age.

This pamphlet contains the principal standard Hardware price-lists in as clear and compact an arrangement as possible, s as to permit their being advantageously cut out and inserted in the price book. In order to make them adapted to this us they are printed on thin and tough paper of fine quality and on only one side of the paper.

The success of the effort to give the lists in small space is illustrated in many of the lists, in which a clear and condensed arrangement is secured. For instance, the wrench list occupies but 3 inches by ¼ inch, while the list of Stove Hollow Ware, in very small space, gives the list prices on a large and important line of goods which often occupy several pages in catalogues. In several lists, such as Strap and T Hinges and Butts, a new arrangement is adopted, which is regarded as presenting these lists in a very convenient as well as condensed form.

As is obvious from the lists herewith reproduced, the shape and size of the different lists varies greatly, the aim being to give each list the smallest and most convenient arrangement possible. None of the lists are, however, more than 3½ x 6 inches in size, very few of them being as large as this and most of them very much smaller. In use it is intended that they shall be trimmed closely before they are inserted in price book when they may be attached either by one edge close to the hinge of the book, as will, perhaps, be mo convenient with the larger lists, permitting the use of the entire page for memoranda, or the smaller lis may be pasted on the page in connection with the entries in regard to discounts, freights, &c. Many the lists are so compact in arrangement as when thus inserted to leave ample room for recording quotations

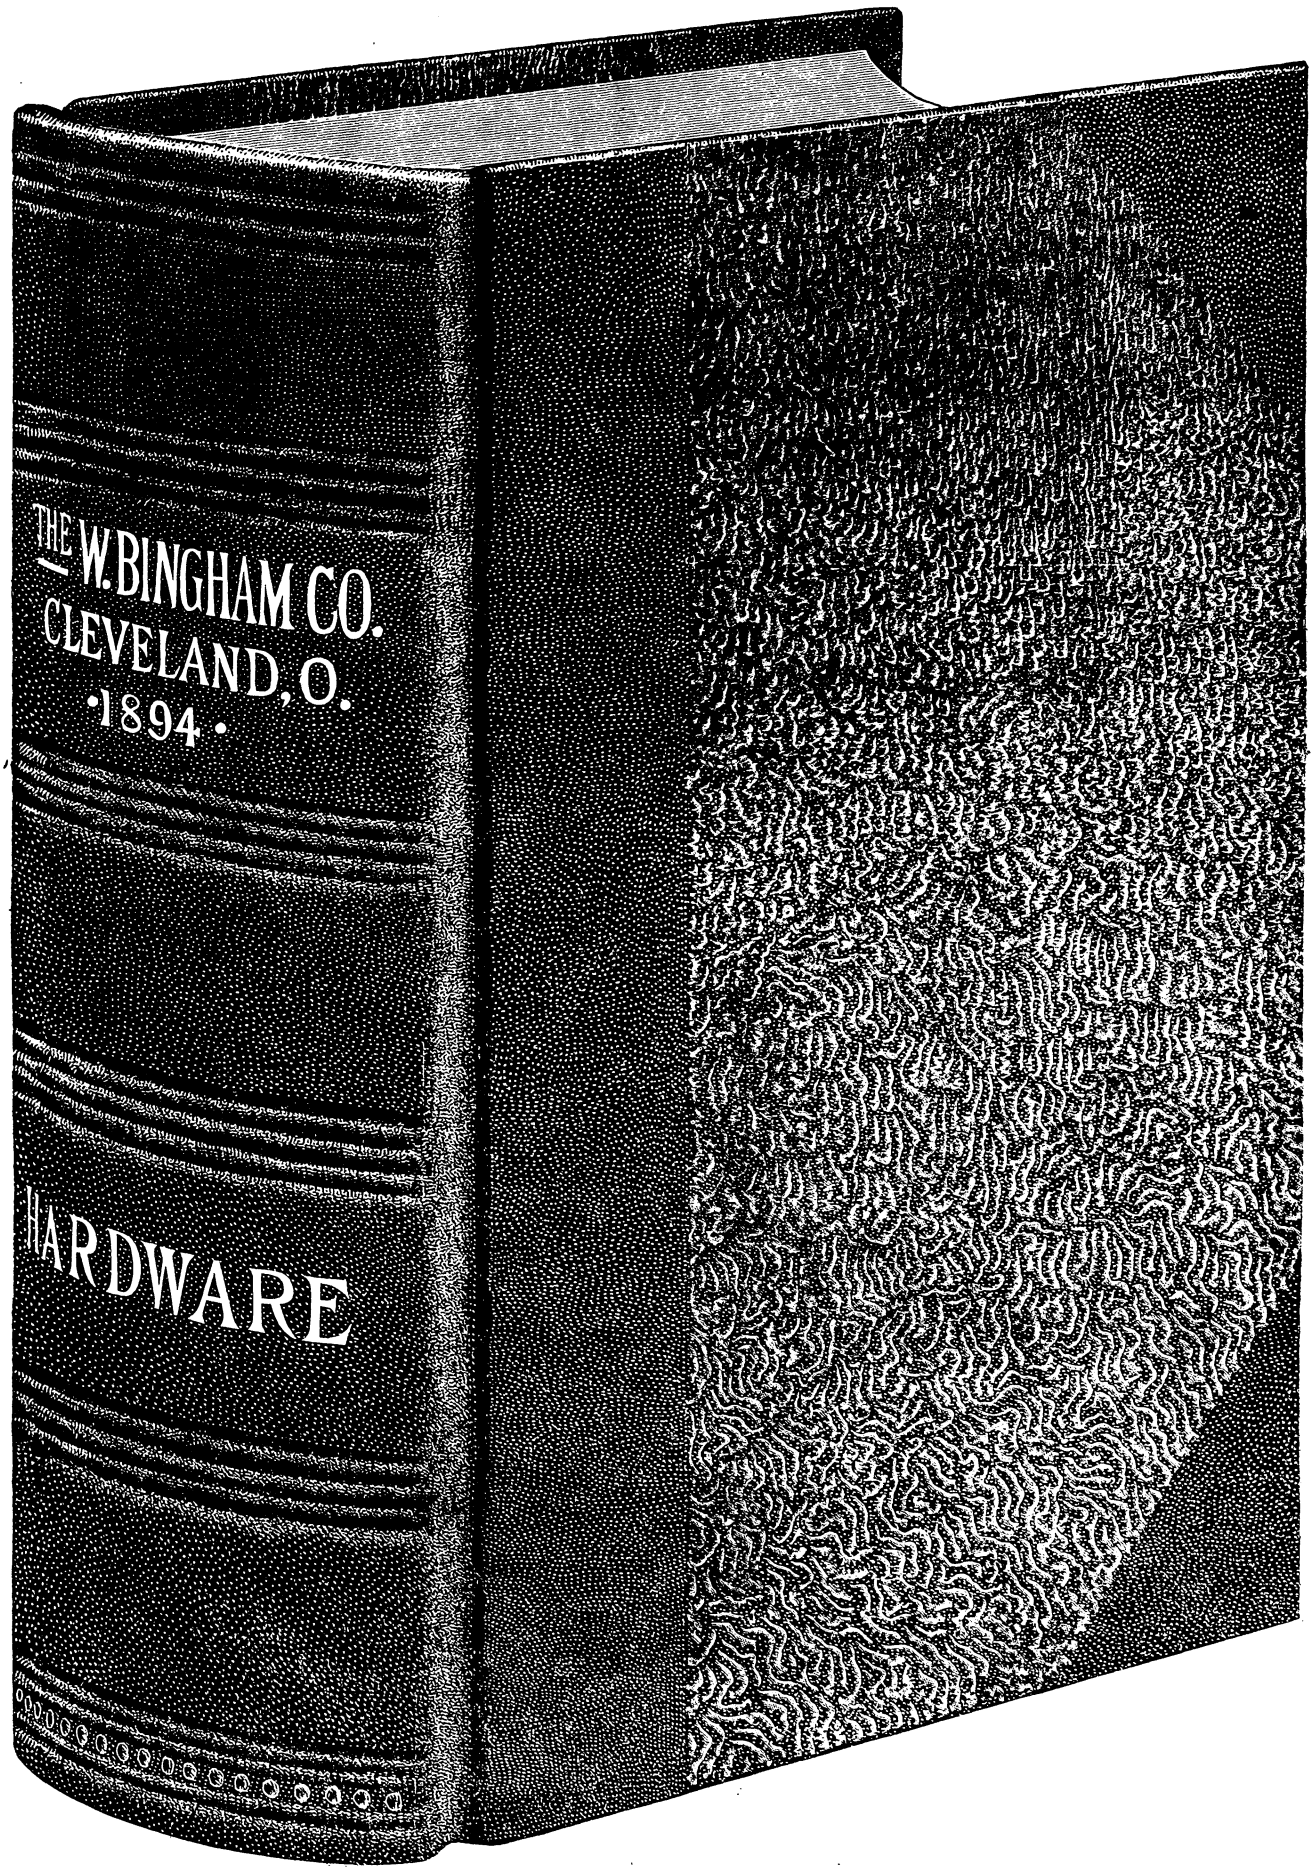
See Opposite Page.

Hardware dealers have been vieing with each other for the past few years to see who could get out the largest catalogue, until the books have become so cumbersome that they are a burden. It has been our aim in issuing our 1894 catalogue to reverse the order of things, and to see how **SMALL** a book we could get out and at the same time illustrate our complete line of hardware and do it distinctly and comprehensively. How well we have succeeded we will leave it for our friends to judge. On the opposite page is a full size cut of the book. It contains 1476 pages besides the index, and weighs 5 lb. 10 oz.

Each of our Customers is Entitled to One Copy Free of Charge, which will be sent upon request, with the first order. We have a few extra copies for sale at Ten Dollars each to those who wish a handy illustrated price book. Orders will be filled in turn as received.



Respectfully,

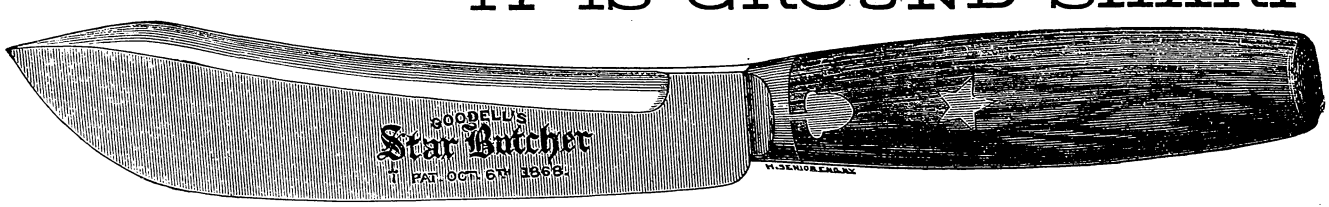
—OUR CLAIMS ARE:—



EXTRA QUALITY OF STEEL IN BLADES. SUPERIORITY IN GRINDING AND FINISH. STRENGTH AND DURABILITY

Made in Plain Steel or Heavily Plated Blades, Hand Burnished.

THERE IS NOTHING NEW

TO SAY ABOUT THIS KNIFE EXCEPT

IT IS GROUND SHARP

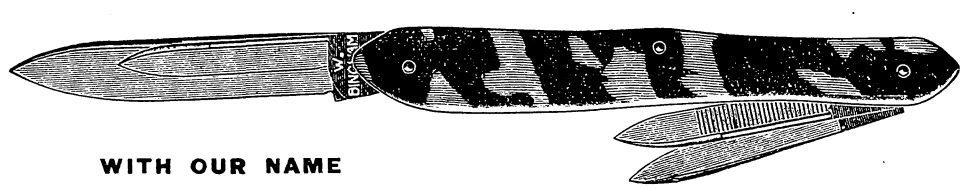
WE DON'T KNOW HOW TO IMPROVE IT.

Blade is made of steel especially prepared for the purpose, and it is made just right; finish excellent; shape unsurpassed; the handle just fits the hand.

GENERAL APPEARANCE IRREPROACHABLE.

Made in sizes from 5 inch to 8 inch; a strictly first-class butcher knife at a moderate price.

WE HAVE OTHER BUTCHER KNIVES,



4½ to 14 inch blade, that will cut as well, for less money. Also Table Knives and Forks, Carvers, Butcher Steels, Bread Knives, Cheese Knives, Butter Spades, Apple, Kitchen, Putty, Cigar, Shoe Knives, &c., &c., in great variety. We aim to make the best and sell at reasonable prices.

BAILEY

Single Spiral Double Cutter Auger Bits and Augers.

We have purchased from the assignee of the Bailey Auger Bit Co. the entire stock of their auger bits, car bits and augers, and offer them at prices that defy competition. Note why this bit is superior to many others.

The large receptacle in the spiral is so arranged as to hold the chip back from the wall of the hole, and force it up and directly out, thus making it impossible to choke and easily turned by the operator. It is a rapid cutter, because it has a double threaded screw point, put on by a machine specially designed for that purpose, which causes the point to cut its way into wood, and thus obtain a firmer hold. In quality of steel, workmanship and style of tool it has no equal.

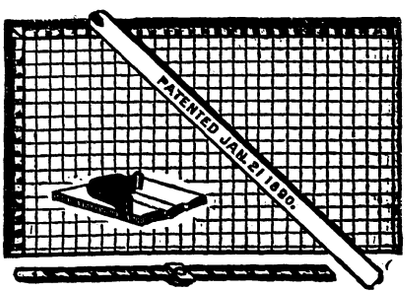
THE UNSINGER MFG. CO. Fremont, Ohio.

ARCTIC ICE DOGS.



These Ice Dogs, or Creepers, designed to secure safe footing on slippery pavements, are the simplest and best ever invented. They consist of a very light, malleable casting of the best quality of iron, fitted for the sole of the shoe and fastened to the foot by means of a toe-strap and an endless elastic band drawn high over the heel, thus holding the dog to its place, and being easy of adjustment, is very quickly put on or taken off.

There are two sizes, for ladies and gentlemen respectively, and the peculiar adjustment attaches them equally well to boots, shoes or rubbers, without difficulty or delay.

Retail at **50c.** per pair. Liberal discount to dealers.

PHILLIPS SCREENS
Are Reliable.

YOU will remember that last season there was a great scarcity of Wire Cloth, of Window and Door Screens and of all Screen goods.

In the hurry and rush many very poor goods were marketed. This condition of things was partially owing to the delay of buyers in placing specifications.

Assuming that you are able to profit from experience, we think you will take it kindly and perhaps act on our suggestion that

NOW IS THE BEST TIME TO BUY

SCREEN GOODS.

Aside from the fact that, notwithstanding his former experience, now is the time when the manufacturer rushes around, crazy to get orders at any price, and in consequence better prices are obtainable now than later, early specifications enable the maker of season goods to secure material and to shape his product to fit his orders.

We did not "lose our head" last fall. Sufficient orders were obtained at fair prices to enable us to run our factory to its full capacity, 4,000 to 5,000 screens per day. There was no rush and hurry, except in our department of "Screens to Order," and for a short time in our Screen Door Department. Our customers received good goods in reasonable time.

On account of the hard times and for other reasons, some screen makers will cut down their product for next year. In anticipation of the usual shortage, we have bought more largely than ever of lumber and wire cloth, a very large share of which is already in stock at the factory, which has been running since September 15th.

Buyers of Phillips Screens will secure for the coming season a well known, reliable article and a reasonable certainty of getting goods on time if specified for early.

SOLD BY THE BETTER CLASS OF JOBBERS.

Phillips Screens

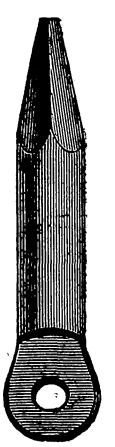
The Great Copper Trusts are Broken.

The *exorbitant* and *ruinous figure* to which copper had been driven by the trust caused us to desist from manufacturing the *Adjustable Soldering Copper Irons* for the time being.



The demand for the goods from old customers, and the many orders we were thus unable to fill, is good evidence that it is the *only soldering iron* that meets the demands of the *Tinsmith* and *Plumber*.

With new and improved machinery we are once more in a position to receive and fill orders with the *best soldering iron in the market*. It is a complete tool in every respect, and can be as easily adjusted at any angle while hot as cold. The handle can be used indefinitely, as when the copper is worn out it can be *replaced* in the *same handle*, making the iron as good as new and at about *half the cost* of the ordinary soldering iron. These *soldering irons*, like our other goods, are guaranteed *first class* in every respect, and if for any reason they are not satisfactory or do not meet with ready sale, the purchaser can return them and we will replace with other goods of our make or refund the money.

Thus the dealer runs no risk in handling these goods, as we assume it all ourselves.

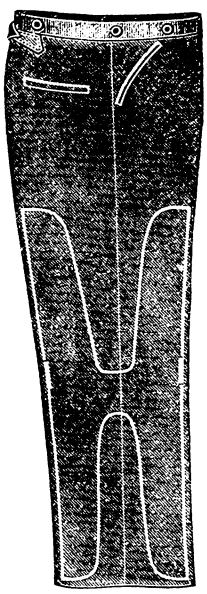
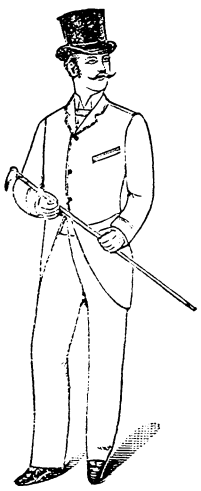
COVERT PANTS STRETCHER.





Before Using.

Stretcher Ready for Use

Patented.

After Using.

GENTLEMEN using the Covert "Pants Stretcher" will find that their pantaloons will be restored to their original shape and length.

It removes all **WRINKLES and BAGGING AT THE KNEES,** and gives them the appearance of having just left the tailor's hands.

It is also very useful for holding the pants in a convenient position for brushing and cleaning.

The invention is simplicity itself, and cannot get out of order, and can be adjusted in the pants in a few seconds.

It adapts itself to the gradual yielding of the fabric, and cannot injure the garment.

It being applied inside the pants, it does not leave any mark on the exterior, as is the case with other stretchers where clamps are used.

It is made of steel wire, light and compact, and being made in sections can be packed in a valise when traveling. Sold by the trade, or

Sample pair sent by mail to any address, free of postage, on receipt of $1.00.

THE IMPROVED "GEM" POST HOLE AUGER.

Opened for Emptying.

Is the most desirable Auger ever offered to the public.

The blades are attached direct to the steel handles. The weight is reduced by four pounds, yet is stronger. Will work in any kind of soil that any other auger will, and in many places where other augers will not work. Sent on trial, and if not satisfactory it may be returned at our expense. The shape of the bits is such at the point as to allow the same to be closed so close as to be able to remove very fine dirt or sand from the hole. The auger may be placed in boring position, or in closed, to remove dirt from hole, or opened up in emptying position at will of operator, without the use of any spring or removing his hands from handles. Nothing like it; nothing equal to it. It is made in all sizes from five inches up to ten inches Get prices and discounts at once.

Respectfully,

Closed for removing dirt from hole.

For Sale by the Hardware Trade.

THE ENTERPRISE MFG. CO. OF PA., Third and Dauphin Streets, Philadelphia.
Branch Office and Warehouse with J. C. McCARTY & Co., 97 Chambers Street, New York.

"SHUT DOWN! What's the Matter?"

"BELT BROKE AGAIN!"

"See here, Mr. Foreman, if you don't have fewer stoppages I'll——"
"Stop, Mr. Proprietor, the fault is yours. Quit buying belts that crack, peel, open between plies, stretch and break, and I'll give you a smooth run. You think it economy to buy cheap belts from Worthless & Co. Why! the time lost and trouble and annoyance caused by shut-downs would pay the difference between good and bad belts ten times over. Why don't you buy Cleveland's 'Shield High Grade,' sold by Reliable & Co.? It has an established reputation, has been thoroughly tested, and is in use in all the large mills and elevators here. You take no chances on it. Besides, a strong warrantee is indelibly branded upon it, such as no manufacturer would dare put or a poor belt. You remember that threshing machine man, whose engine we repaired, said he had a Cleveland High Grade Belt in use over five years, and if it will stand such severe work, it certainly will ours."

Trade  Mark.

LABEL INDELIBLY STAMPED ON EVERY 30 FEET OF BELT.

We are the only manufacturers who indelibly stamp a warrantee on each and every belt (see copy of label) and it remains as long as the belt lasts; and who give a written guarantee (see fac-simile). Our threshing machine belts have made a wonderful record, and our endless belts have given splendid service, the splice being as strong as the solid part of the belt. Suction Hose for Portable Engines and all other purposes.

We Want Your Trade.
Send for 60-page Catalog.
Write for Prices and Samples.

GUARANTEE.

We Guarantee *our "Shield High Grade" Belt to be made of best long staple, 30 & 32-oz. cotton duck; To be the most durable, because it is made of best materials, by special machinery; To be the best selling belt, because it has the best reputation, a cleaner record of long service, and because its warrantee is stronger, bolder, broader than any other, and is irrevokable, protecting both dealer and consumer. We further guarantee that, should any belt, under fair and reasonable service, fail or give out from any defect in material or manufacture, to replace same free of charge, on return to us.*

Witness *our hand and seal.*

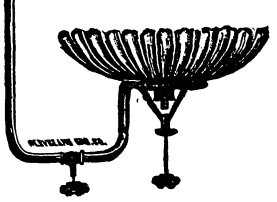
LIGHT YOUR DARK SHOPS CHEAPLY.

Give your men plenty of Light and they will do double work.

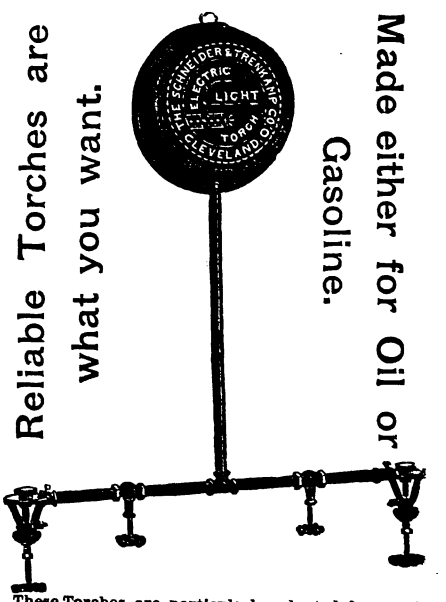


The Wall Torch has been used for several years as a means of illumination in **Mills, Foundries, Machine and Car Shops, Tunnels, Street Stands, Band Stands, Smith Shops,** etc.

While there are many cheap, inferior torches made which injure the sale of a good article, and condemn the **Torch** in general, our "Incandescent" Wall Torches are recognized as the best, and are now in use in the largest manufacturing establishments in the country giving **PERFECT SATISFACTION,** as is evidenced by the **DUPLICATE ORDERS** we receive from year to year.

They burn 150° Coal Oil, or 74° Naphtha, requiring a different burner for each.

In ordering be careful to state which is desired.



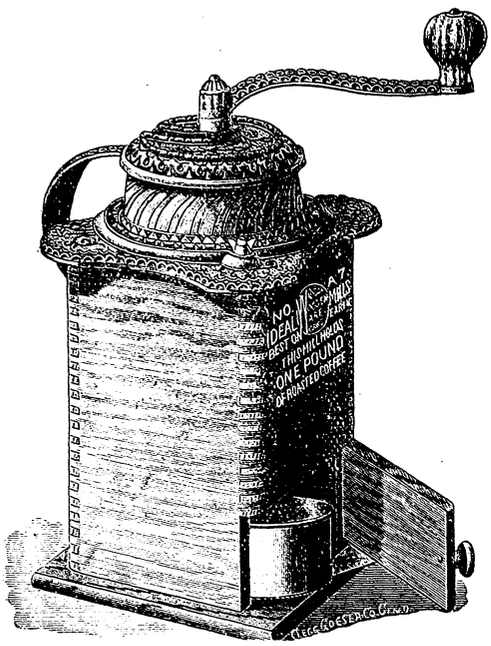
Price, for Single Torch, complete, $2 each.

SPECIAL PRICE QUOTED FOR QUANTITIES.

THE STANDARD LIGHTING CO.,

100 to 118 Perkins Ave., - - - - Cleveland, Ohio,

Reliable Torches are what you want.



Made either for Oil or Gasoline.

These Torches are particularly adapted for use in Factories, Foundries, Machine Shops, Rolling Mills, Blacksmith Shops, Warehouses, &c. They make a strong white light, are free from smoke and are not affected by wind or rain. They are convenient and portable. These Torches can be run at an expense of about one-half cent to one cent per hour, burning a bright, steady light which is ten times greater than the light of an ordinary gas burner.

Write us for prices. A liberal discount given to the trade. Manufactured by

THE SCHNEIDER & TRENKAMP CO.,
Nos. 479 to 497 Case Ave., Cleveland, Ohio.

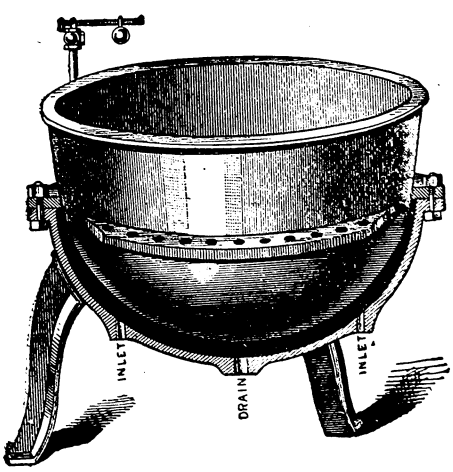
BRIDGEPORT, CONN.



THE GIANT PADLOCK.

Centennial Award. "Superior in Every Respect."

This is one of the best selling locks in the market, and affords the dealer a large profit. It is thoroughly and strongly made—of the best material—very handsome in appearance, and every Lock is warranted. Orders solicited.

THE GIANT METAL SASH CHAIN

is a substitute for cord in hanging weights to windows. It is manufactured by us only, and by automatic machinery, patented and owned exclusively by ourselves, and whereby we secure uniformity of construction and quality. We have been to great expense in producing a metal having all the qualities and conditions requisite for making suitable chain for this purpose, and to prevent other chain of the same pattern of link and of the same general appearance, but made from an inferior metal, being offered as the same thing, we patented the word "Giant" as a Trade-Mark, as applied to either metal or chain. Trade-Mark Registered April 16, 1878, and October 22, 1878, and our metal is therefore known in the market as "Giant Metal," and our chain as "Giant Metal Sash Chain."

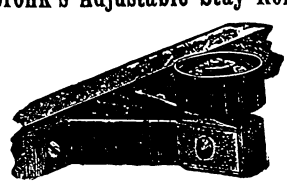
Double Braced Steel Track, 4, 6, 8 and 10 feet lengths, 10c. per foot.

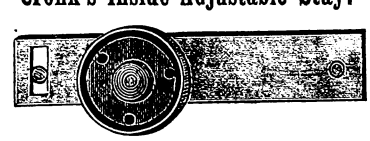
We are the original makers of steel covered hangers and all others are imitations. Beware of infringements, as we shall protect our rights.



In our Steel Covered Hangers we have all the desirable features of the Best Hangers in the market, and with that we combine the cover for wheels SO NO ICE OR SNOW can reach the wheels, and making this cover as we do, we stiffen it so it is the strongest Hanger in the market, and we believe it is just perfect. Would be glad to have you try a small order and satisfy yourself.

Double-Braced  Steel Rail.

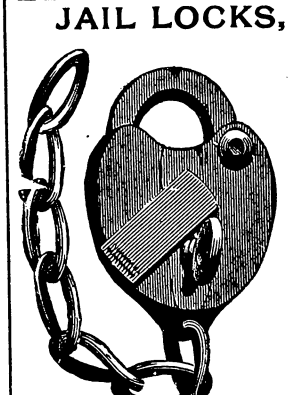
PATENTED JUNE 12, 1888.



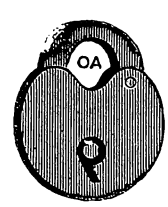
This rail being double-braced and double-riveted is the strongest rail in the market. Being braced both ways it will not sag. The joint is made so it is perfectly solid. It comes complete and ready for use, requiring only screws and screw driver for any man or boy to put it up in short order. It can be used for any grooved wheel Hanger, and a heavy door will not make it spring or tremble. Guaranteed to hold a door weighing 2,000 pounds, and used in connection with our Anti-Friction Hanger will work perfectly on large or small doors.

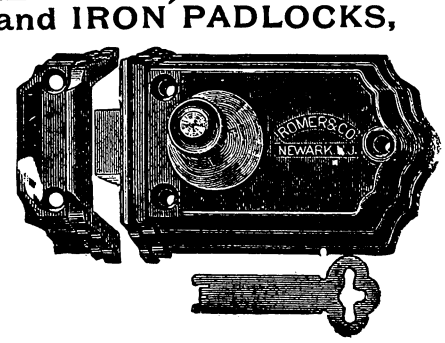
Cronk's Adjustable Stay Roller.

Made of wrought steel strap; cast block with slot adjusted by loosening bolt.



Cronk's Inside Adjustable Stay.





Is cheap, simple and durable, and much better than a cleat nailed on the floor, for this avoids all friction and leaves no place for dirt to accumulate. $2.00 per doz. No inside door can be properly hung without this stay.

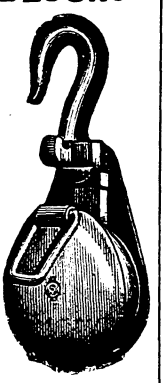
WHY USE WOODEN OR HEAVY STEEL BLOCKS

WHEN THE STEEL AND IRON

TACKLE BLOCKS

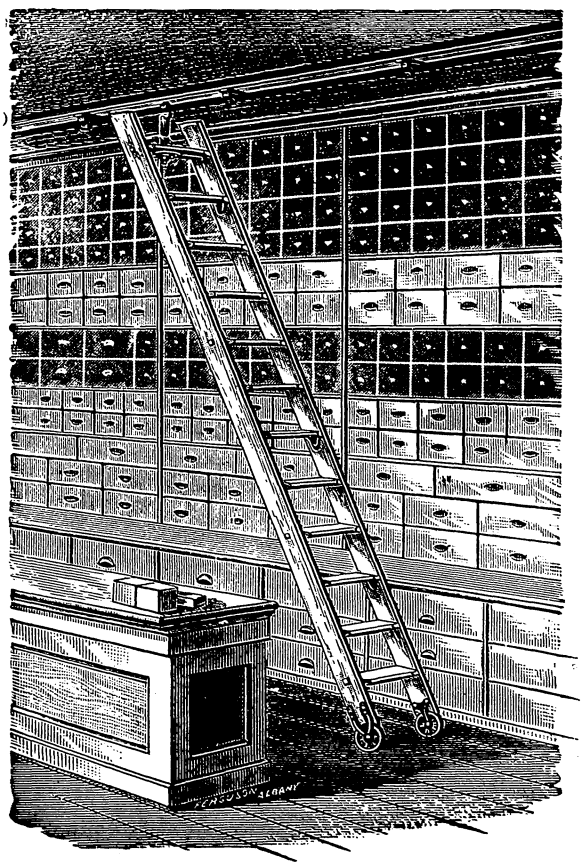


—MADE BY—

The Cleveland Block Co.

CLEVELAND, OHIO, U. S. A.,

ARE BETTER IN EVERY WAY.



No waste material. Every ounce of weight in the line of strength. No clumsy outside straps or bolts. As light as wooden blocks and vastly more durable. They wear, but never break. Sheaves interchangeable.

STEEL HORSE SHOES.

SHOENBERGER & CO., PITTSBURGH, PA.,

After numerous and costly experiments have succeeded in manufacturing a special quality of soft homogeneous steel, specially adapted to the manufacture of Horse and Mule Shoes, and are now making from this steel Extra Swaged, and Government Pattern Horse and Mule Shoes. They give the best of satisfaction everywhere and we furnish them to the trade at the same prices as the regular iron shoe sold by ourselves and our competitors. We are at present making our Roadster Pattern Horse Shoes out of Iron, but we will make them of Steel also within a short time.

The advantages are that, being made of vastly superior material, they will never show signs of red-shortness or cold-shortness, will never split in the crease and will always show a much finer finish than any iron shoe.

We make the Steel Shoes lighter than the Iron, giving more shoes to the keg, as follows:

No. 1, 15 more shoes to the keg.
" 2, 14 " " " "
" 3, 10 " " " "
" 4, 8 " " " "

And other sizes in proportion.

No. 2 EXTRA SWAGED HIND.

We also beg to say that we have introduced improved machinery into our new factory and have doubled our capacity, and are now prepared to furnish the best shoe, either iron or steel, ever offered to the trade.

We would also call your attention to our Improved Steel Toe Calk, equal to any in the market. To secure the best wearing qualities use sand or borax in welding on a calk and cool off at a dark red, or still better, cool off without plunging in water. We make sizes numbers 1, 2, 3, 4, 5 and 6, packed in 25-pound boxes.

Write to us for information and prices, or apply to jobbers and dealers, who sell them everywhere.

Highest Award

FOR

Supreme Excellence

TO

The PUTNAM Hot=Forged and Hammer=Pointed Horse NAILS,

PUTNAM HOT FORGED & HAMMER POINTED.

At the *World's Columbian Exposition* at Chicago. A medal and diploma worded:

"Supreme excellence in material, method in manufacture, and quality of finished product; elasticity and smoothness combined with holding power in clinch.

It allows the use of very small nails."

There is nothing beyond "supreme excellence," nor is there anything comprised in a horse nail, except the "material from which it is made," "the method of manufacture," and "quality of finished product."

Putnam nails, by their "elasticity," give slightly to the expansion and contraction of the hoof while the horse is in motion; by their "smoothness," do not enlarge the nail holes in the hoof, while their "supreme excellence," in "holding power in the clinch," enables them to hold the shoe in the hardest service until worn out.

By the "use of small nails," large holes are avoided and money saved to the smith.

Thus it will be seen that the officials of the *World's Columbian Exposition* recognize what qualities go to make up a good horse nail and that only the "Putnam" contains them all.

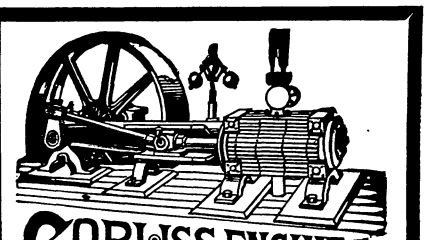
Sent, post-paid, on receipt of price, by

DAVID WILLIAMS, - - Publisher and Bookseller,

96-102 Reade Street, NEW YORK.

Stanley's Patent Duplex Levels.



These Levels have the ordinary form of leveling-glass, set in the top surface of the Stock; as three-fourths of the uses of a Level are best secured by looking down upon the instrument from above.

For any uses by which an observation of the glass, sidewise, may be found convenient, an additional leveling-glass is set in the side, at the opposite end from the Plumb.

Both glasses are protected by Brass Discs; can be seen from either side; and are inserted in the Level, with the least possible removal of wood from the Stock.

Manufactured by STANLEY RULE & LEVEL CO., New Britain, Conn.

SOLD BY ALL HARDWARE DEALERS.

CORLISS ENGINES

MACHINISTS

IRON FOUNDERS, BOILER MAKERS.

ROBT. WETHERILL & CO.

— ON —

METALLURGY.

A Treatise on the Metallurgy of Iron.

Containing outlines of the history of iron manufacture, methods of assay and analyses of iron ores, processes of manufacture of iron and steel, &c. By H. Bauerman, F. G. S., associate of the Royal School of Mines. Fifth edition, revised and enlarged. Illustrated with numerous wood engravings from drawings by J. B. JORDAN. 515 pages; cloth.....$2

The Metallurgy of Steel.

Volume I. By HENRY M. HOWE, A.M., S.B., mining and metallurgical engineer; illustrated with many engravings and plates. 383 pages; 11 x 14 inches.....$10

Handbook for Charcoal Burners.

Translated from the Swedish of G. Svedelius by PROF. R. B. ANDERSON, and edited with notes by PROF. W. J. L. NICODEMUS, C.E.; 23 wood engravings; 217 pages; cloth..$1.50

The Metallic Alloys.

A practical guide for the manufacture of all kinds of alloys, amalgams and solders, used by metal workers; together with their chemical and physical properties and their application in the arts and the industries; with an appendix on the coloring of alloys. Translated and edited chiefly from the German of A. KRUPP and ANDREAS WILDBERGER, with extensive additions by WM. T. BRANNT; illustrated by 16 engravings; 428 pages; cloth.....$2.50

The Metal Worker's Handy Book of Receipts and Processes.

Being a collection of chemical formulas and practical manipulations for the working of all the metals and alloys, including the decoration and beautifying of the articles manufactured therefrom, as well as their preservation. Edited from various sources by WILLIAM T. BRANNT. 530 pages; cloth.$2.50

Electro-Plating.

A practical hand-book on the deposition of copper, silver, nickel, gold, aluminum, brass, platinum, &c. With descriptions of the chemicals, materials, batteries and dynamo machines used in the art. Second edition; carefully revised, with additions. By J. W. URQUHART; 220 pages; cloth.....$2

Steel and Iron.

Comprising the practice and theory of the several methods pursued in their manufacture, and of their treatment in the rolling mills, the forge and the foundry. By WILLIAM HENRY GREENWOOD, F.C.S. With 97 diagrams; 536 pages; cloth.....$2

Aluminum.

Its history, occurrence, properties, metallurgy and applications, including its alloys. By JOSEPH W. RICHARDS, M.A., A.C., instructor in metallurgy at the Lehigh University. Second edition, revised and greatly enlarged. Illustrated by 23 engravings and two diagrams; 511 pages; cloth.....$5

THE A B C OF IRON.

By CHAS. W. SISSON.

CLOTH.

Price Reduced to $1.00.

CONTENTS.

IRON—WHAT IS IT?

A description of the metal and its uses, showing in what combinations it is found and the principal sources.

PIG IRON.

An account of the blast furnace process by which the ores are reduced to pig iron.

CONSTITUENTS OF IRON.

A description of the elements in pig metal which influence cast iron. Described in chapters on CARBON IN CAST IRON, PHOSPHORUS IN CAST IRON, SILICON IN CAST IRON, MANGANESE IN CAST IRON, SULPHUR IN CAST IRON.

NUMBERING OF PIG IRON.

Showing the character and analysis of different grades of pig iron, appearance of fracture and the uses to which the several grades are adapted.

GRADING OF IRON.

Should it be by analysis or by fracture?

HOW TO REDUCE COST OF MIXTURE.

STEEL.

PHYSICAL PROPERTIES OF METALS DEFINED.

Table of shrinkage of Castings. Weights of castings from patterns, etc.

STATISTICS.

Showing the varieties and production of iron ore, pig iron, pig iron and steel products, railroad mileage and equipment, etc., etc., etc.

EARLY HISTORY AND MANUFACTURE OF IRON.

Brief history of the manufacture and uses of iron from earliest times, being principally extracts from Mr. James M. Swank's "HISTORY OF IRON IN ALL AGES."

The Iron-Masters' LABORATORY

Exclusively for the

Analysis of Ores of Iron, Pig and Manufactured Iron, Steels, Limestone, Clays, Slags and Coal for Practical Metallurgical Purposes.

Branch Office, 339 Walnut St., Philadelphia.

All Analytical Work at Warrenton, Virginia.

J. BLODGET BRITTON.

This laboratory was established in 1866, at the instance of a number of practical Iron Masters, expressly to afford prompt and reliable information upon the chemical composition of the substances above mentioned, for smelting and refining purposes, the object being to make it at once a convenient, practically useful, and comparatively inexpensive adjunct to the Furnace, Forge and Rolling Mill.

PAYNE'S BUSINESS EDUCATOR,

600 pages, bound in cloth, $2.

Every business man should have some knowledge of the State and general laws of the country, especially those affecting the collection of accounts, rates of interest, &c. He should be able to draw up many of the simpler papers, such as leases, contracts, &c. He should be familiar with the different forms of legal papers used in business, and, above all, he should be an easy and pleasant letter-writer. All these points are carefully treated in Payne's Business Educator.

Among the subjects specially discussed are:

Commercial Correspondence.—Over 150 models of letters are given, covering every phase of business correspondence.

Legal Forms Used in Business.—Articles of copartnership; notice of dissolution, form of assignment; short form of deed; bill of sale; power of attorney; lease; surety; will; notes—promissory, negotiable, non-negotiable and demand; exchange—inland and foreign; acceptance; due bill; receipt; bills of lading; private cost marks, &c.

Dictionary of Mercantile Terms.—Giving a full and clear explanation of terms used in business.

Titles.—Official, military, scholastic, naval and professional titles used in the United States.

Useful Hints for Measuring Land.

Legal Rates of Interest, foreign coin, weights and measures compared with American standards.

Rules for Punctuation.

Rules of Order for deliberative assemblies and debating societies.

Interest Tables, and tables of weight and measures, &c.

How to Use a Typewriter, with lessons for practice.

Exercise in Practical Penmanship.

Laws and Forms.—An epitome of the laws of the United States and of the different States of the Union, which will be found invaluable to those who are forced to appeal to the law, as well as to that large class who wish to avoid it. The whole is alphabetically arranged, so as to make reference easy. Forms are given for a great number of legal papers, &c.

Dictionary of synonyms; marks of account; list of abbreviations; French, Spanish, Latin and Italian words and phrases, &c.

Making in all the most complete self-educator published.

BOOKS

—ON—

Mechanical and Steam Engineering.

The Slide Valve Practically explained.

Embracing simple and complete practical demonstrations of the operation of each element in a slide-valve movement, and illustrating the effects of variations in their proportions by examples carefully selected from the most recent and successful practice. By JOSHUA ROSE, M. E. Illustrated by 35 engravings; 100 pages; cloth.....$1

Twenty Years with the Indicator.

Being a practical text book for the engineer or the student, with no complex formulæ. By THOMAS PRAY, JR., consulting, constructing, civil and mechanical engineer, &c. Newly arranged; complete in one volume; 284 pages; cloth.....$2.50

The English and American Mechanic.

An every-day handbook for the workshop and factory, containing several thousand receipts, rules and tables indispensable to the mechanic, the artisan and the manufacturer. By B. FRANK VAN CLEVE. A new enlarged edition by EMORY EDWARDS, M.E. 476 pages, illustrated; cloth.....$2

A Treatise on Belts and Pulleys

Embracing full explanations on fundamental principles, proper disposition of pulleys, rules for determining widths of leather and vulcanized rubber belts and belts running over covered pulleys; strength and proportions of pulleys, drums, &c.; together with the principles and necessary rules for rope gearing and transmission of power by means of metallic cables. By J. HOWARD CROMWELL, Ph. B., author of a Treatise on Toothed Gearing; 271 pages; cloth...$1.50

Constructive Steam Engineering.

A descriptive treatise, embracing engines, pumps and boilers and their accessories and appendages. By JAY M. WHITHAM, M. E., C.E. 900 pages; 795 illustrations, many of which are full page and folding plates; cloth.....$10

The American Steam Engineer.

Theorctical and practical, with examples of the latest and most approved American practice in the design and construction of steam engines and boilers of every description. For the use of engineers, machinists, boiler makers and students. By EMORY EDWARDS, M.E. Illustrated by 77 engravings; 419 pages; cloth.....$2.50

Modern Steam Engines.

An elementary treatise upon the steam engine, written in plain language, for use in the workshop, as well as in the drawing office, giving full explanations of the construction of modern steam engines, including diagrams, showing their actual operation; together with complete but simple explanations of the operations of various kinds of valves, valve motions and link motions, &c., thereby enabling the ordinary engineer to clearly understand the principles involved in their construction and use, and to plot out their movements upon the drawing board. By JOSHUA ROSE, M.E. Illustrated by 422 engravings; 321 pages, 10 x 12 inches; cloth.....$6

A Treatise on Toothed Gearing,

Containing complete instructions of designing, drawing and constructing spur wheels, bevel wheels, lantern gear, screw gear, worms, &c., and the proper formation of tooth profiles. For the use of machinists, pattern makers, draftsmen, designers scientific schools, &c. With many plates. By J. HOWARD CROMWELL, Ph.B. Third edition; 245 pages; cloth.....$1.50

Stationary Steam Engines.

Especially adapted to electric lighting purposes. Treating of the development of steam engines—the principles of construction and economy, with description of moderate speed and high speed engines. By Prof. R. H. THURSTON. Fourth edition; 177 pages; cloth.....$1.50

THE WORKS MANAGER'S HANDBOOK

OF

MODERN RULES, TABLES AND DATA

For Civil and Mechanical Engineers, Millwrights and Boiler Makers; Tool Makers, Machinists and Metal Workers; Iron and Brass Founders, etc., etc.

BY

WALTER S. HUTTON,

CIVIL AND MECHANICAL ENGINEER.

The Author having been in the habit of compiling Rules and Data for his own use in the construction of a great variety of modern Engineering Work, and having found his notes extremely useful, decided to publish them, after revising them to date, believing that a practical work, suited to the Daily Requirements of Modern Engineers, would be favorably received by the public.

The rapid sale of the previous Editions, and the continued favor the Work has received, show that it has been of considerable service to Engineers.

In issuing a Fourth Edition, many alterations and improvements have been made, including the following amongst other additions, viz.: New matter relating to Steam Engines—Gas Engines—Pumps—Water Supply, etc., etc.

"The author treats every subject from the point of view of one who has collected workshop notes for application in workshop practice rather than from the theoretical or literary aspect, and the work contains a great deal of that kind of information which is gained only by practical experience, and is seldom written in books."—*The Engineer.*

"The volume is an exceedingly useful one, brimful with engineers' notes, memoranda and rules, and well worthy of being on every mechanical engineer's bookshelf. There is valuable information on every page. It should be in every workshop manager's library."—*Mechanic World.*

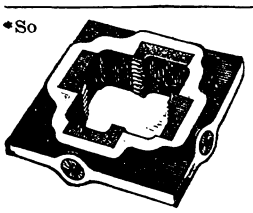
Don't Buy

*Maule's "Skeleton" Pipe Die

If You Wish to Avoid

A Pipe-Threading Die extremely easy of operation by reason of the **proper clearance** of its cutters;



Of surpassing **durability** secured by the accurate and uniform **temper** of said Cutters;

Having Cutters that when dull may be removed in a moment, and **sharpened on a grindstone or emery wheel;**

Of phenomenal **cheapness,** arising from **small first cost** coupled to **excellence** of quality.

If by chance you do not think these points, or the saving of money, objectionable,

*So

Send us a **Postal Note for 62 Cents** (do not send us any postage stamps), and we will mail you a sample one-inch Die, either 2⅜ or 2½ x ¾ thick, which we hereby agree to take back if not to your satisfaction.

5-ton Ridgway Crane in Foundry Diamond State Iron Co., Wilmington, Del.

Steam-Hydraulic Elevator.

SAFE, RAPID, SURE

— AND —

Not Costly.

The Crane that is perfection for the exacting requirements of a Foundry is the Crane for all places.

Give full particulars and get circulars and prices.

CRAIG RIDGWAY & SON,
Coatesville, Pa.

Ridgway Balanced Steam-Hydraulic Crane.

The Greatest Foundry Crane Known.

Another Big Foundry Adopts It.

The large, handsome and most modern foundry of the country now being erected by the J. I. Case Co. at Racine, Wis., will be equipped with only the latest and best labor saving machinery to be had.

The Cranes used, of course, will be the Ridgway Steam-Hydraulic. The order for these and a lot of our patent one ton air hoists has been placed with us.

When the best money making establishments in the country are adopting, in this way, the Ridgway Crane, what more need be said?

Read what the finest foundry in Chicago says:

FRASER & CHALMERS,
Mining Machinery.

CHICAGO, ILL., April 11, 1893.

MESSRS. CRAIG, RIDGWAY & SON,
Coatesville, Pa.

Dear Sirs:—Replying to your favor of the 6th, asking whether the Steam-Hydraulic Crane furnished for our new foundry at 12th and Rockwell Streets has been satisfactory or not, we beg to say that we have found the Crane highly satisfactory in every respect. We consider it the best Crane made to-day for general foundry use and it is also well adapted for other uses. We should be glad to have you refer anybody to us who may wish to hear directly from us as to our opinion of the Crane. Yours truly,

FRASER & CHALMERS, C. E. Billin, Supt.

GOODWIN'S
Improved Bookkeeping
AND
Business Manual.

By J. H. GOODWIN.

Sixteenth edition; Forty-first Thousand; Four Thousand Testimonials; Richly bound in cloth, price, $3.00.

"I find that your book contains many important points never brought out before in a work of its kind. I consider it invaluable to the fraternity of bookkeepers in general, and in particular to those who are connected with the offices of large mercantile houses.'—W. H. RUSSELL, head bookkeeper for The H. B. Claflin Company, importers and jobbers of dry goods, New York City.

"Through the adoption of your system I have effected a saving in my work of at least one-third."—A. B. MUNN, bookkeeper for Miller, Coleman & Co., planing mill and lumber, Scranton, Pa.

"Am following your directions and have lessened my labor *one-half*. I admire your system in every respect."—JAMES H. LOVELESS, bookkeeper for C. C. McCarthy, wholesale boots and shoes, Columbus, Ohio.

"After a few days' study of your valuable work I changed my books from Single Entry (as they had been kept for 10 years) to your system of Double Entry, and am greatly pleased with it."—W.T. CHANDLER, general merchandise, Ash Grove, Mo.

"Am especially interested in the article on 'At Houses (wholesale),' and consider it the perfection of elaboration and detail. Even after an experience of nearly thirty-one years with this firm as manager, I find a great deal of valuable information in this article. The price of your book is a mere song when compared with its great value in material."—CHARLES E. BRADY, manager of entry rooms and private accountant for E. S. Jaffray & Co., importers of dry goods, New York City.

"I knew nothing about Double Entry Bookkeeping before I purchased your book, and had had no office experience. By following the instructions in your book I have been able not only to keep my books, but also to make all my Trial Balances, Balance Sheets, Partnership Statements, etc."—J. A. DALRYMPLE, of J. A. Dalrymple & Co., Haverhill, Mass.

"'Tis the most complete work I have seen. I strongly recommend it to the accountant, or to anybody who is desirous of mastering the art of bookkeeping. I would not part with the copy now in my possession for **$500**, if I did not know where I could procure another copy of the same work."—N. TOMNEY, bookkeeper for Graham, Horn & Co., Vermillion Bay, Ontario, Canada.

"Your book *far surpasses* my expectations, containing, as it does, so much valuable information."—CHAS. W. SIMMONS, with the Standard Oil Company, Cleveland, Ohio

Locations for Factories.

The Industrial Department of the Chicago, Milwaukee & St. Paul Railway has charge of matters pertaining to the development of the territory traversed by the railroad and the directing of manufacturers to points best suited to their particular requirements.

Eight States are traversed by the 6,150 miles of the Chicago, Milwaukee & St. Paul Railway's tracks, namely: Illinois, Wisconsin, Northern Michigan, Iowa, Missouri, Minnesota, South Dakota and North Dakota.

The company is daily in touch with the people in its territory, and from the number and varied nature of the industries locating and springing up on the line, and its acquaintance with the natural resources, has the facilities at hand to promptly furnish manufacturers with reliable information as to locations adapted to particular industries.

LUIS JACKSON,
Industrial Commissioner,
C., M. & St. P. R'y, 160 Adams Street,
Chicago, Ill.

ARE YOU HERE TO MAKE MONEY?

IF SO, THE PRICES WE ARE MAKING ON

OIL HEATERS AND GAS STOVES

WILL INTEREST YOU.

B. & B. Stoves are the Leaders.

B. & B. Combination Oil Heaters and Cook Stoves are a great success, as proven by the many testimonials received from all parts of the country.

Every Stove is mounted on rollers, and can easily be moved from room to room. *They can be used in place of a range in the kitchen or in place of a base-burner in the parlor.* They are thoroughly well adapted to fill all requirements, *combining as they do all the qualities of a first-class Oil Heater and an elegant Parlor Cook Stove.*

If you happen to have one of them upstairs, *the tank can easily be removed and taken down to the kitchen to be filled,* and again replaced in the Stove.

Those who have used the old style Stove with tanks fastened in them as tight as if cast in the iron will appreciate this feature. They can be fitted with our 2-hole, 3-hole or 4-hole Extension Tops for regular 8-inch ware. We want your trade, and if you will give us a chance to quote you prices we will have it.

ASK FOR OUR NEW 80-PAGE CATALOGUE.

HOLIDAY GOODS.

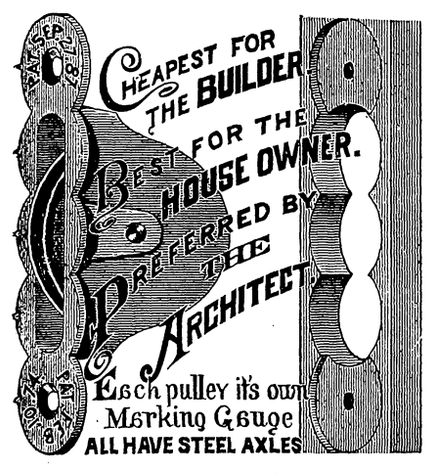
Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

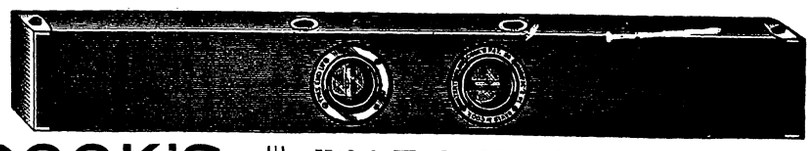
These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.



We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.



Price of Rogers Saw, complete, $3.50.

DISSTON'S Improved Saw Clamp
AND FILING GUIDE.

ESPECIALLY DESIGNED TO ASSIST THOSE NOT SKILLED IN THE ART OF SAW FILING TO FILE A SAW CORRECTLY.

CUT No. 1.

Cut No. 1 shows a saw and the attachment in proper position for filing the first side; and Cut No. 2 shows the saw and attachment reversed and in position to file the second side. There are three marks on one of the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position No. 1, and the other designates when it is in position as shown in No. 2. The third, or centre, marks show when it is in position for filing Rip Saws.

CUT No. 2.

To obtain the correct position, loosen the wing nut and move the guide around to the point desired; after tightening wing nut, loosen screw in file handle, then turn handle until file gives the shape tooth wanted.

A good way is to select a tooth of correct shape and let file down into it, tighten set screw in handle, then file a tooth to see if the shape suits. If not turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth, see cut No. 1; when one side is filed, reverse saw and attachment and adjust as in No. 2, and file the other teeth. For Rip Saws, place the file at right angles with the saw and file every tooth Always keep the file as nearly horizontal as possible.

This filing guide is sold only attached to our No. 3 Improved Clamp or Vise, and not sold separately. We recommend this as the best saw clamp on the market, being quickly and easily adjusted, and not liable to get out of order.

Write for price including No. 3 Clamp, Filing Guide, File and Handle complete. Packed one in a wooden box

THERE IS NOTHING NEW
TO SAY ABOUT THIS KNIFE EXCEPT
IT IS GROUND SHARP

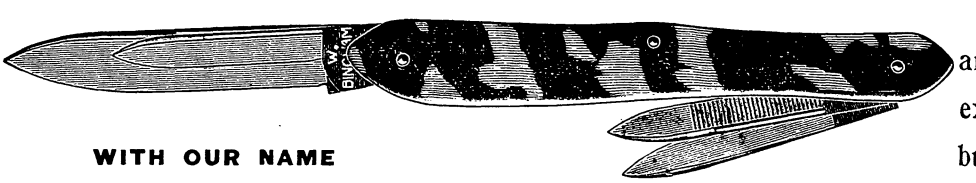
WE DON'T KNOW HOW TO IMPROVE IT.

Blade is made of steel especially prepared for the purpose, and it is made just right; finish excellent; shape unsurpassed; the handle just fits the hand.

GENERAL APPEARANCE IRREPROACHABLE.

Made in sizes from 5 inch to 8 inch; a strictly first-class butcher knife at a moderate price.

WE HAVE OTHER BUTCHER KNIVES,



4½ to 14 inch blade, that will cut as well, for less money. Also Table Knives and Forks, Carvers, Butcher Steels, Bread Knives, Cheese Knives, Butter Spades, Apple, Kitchen, Putty, Cigar, Shoe Knives, &c., &c., in great variety. We aim to make the best and sell at reasonable prices.

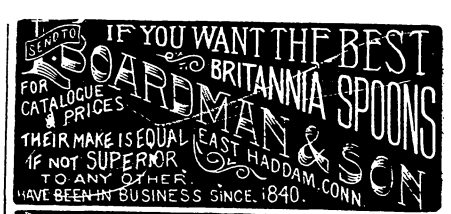
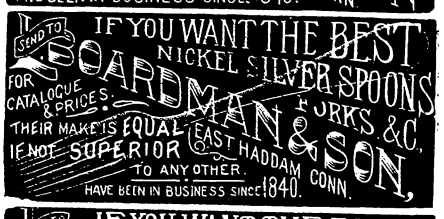
BAILEY

Single Spiral Double Cutter Auger Bits and Augers.



We have purchased from the assignee of the Bailey Auger Bit Co. the entire stock of their auger bits, car bits and augers, and offer them at prices that defy competition. Note why this bit is superior to many others.



The large receptacle in the spiral is so arranged as to hold the chip back from the wall of the hole, and force it up and directly out, thus making it impossible to choke and easily turned by the operator. It is a rapid cutter, because it has a doubl threaded screw point, put on by a machine specially designed for that purpose, which causes the point to cut its way into wood, and thus obtain a firmer hold. In quality of steel, workmanship and style of tool it has no equal.

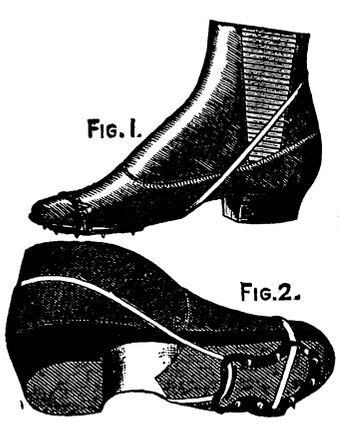

FIG. I.

FIG. 2.

ARCTIC ICE DOGS.

These Ice Dogs, or Creepers, designed to secure safe footing on slippery pavements, are the simplest and best ever invented. They consist of a very light, malleable casting of the best quality of iron, fitted for the sole of the shoe and fastened to the foot by means of a toe-strap and an endless elastic band drawn high over the heel, thus holding the dog to its place, and being easy of adjustment, is very quickly put on or taken off

There are two sizes, for ladies and gentlemen respectively, and the peculiar adjustment attaches them equally well to boots, shoes or rubbers, without difficulty or delay.

Retail at 50c. per pair. Liberal discount to dealers.

Highest Award

FOR

Supreme Excellence

TO

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS,

PUTNAM HOT FORGED & HAMMER POINTED.

At the *World's Columbian Exposition* at Chicago. A medal and diploma worded:

"Supreme excellence in material, method in manufacture, and quality of finished product; elasticity and smoothness combined with holding power in clinch.

It allows the use of very small nails."

There is nothing beyond "supreme excellence," nor is there anything comprised in a horse nail, except the "material from which it is made," "the method of manufacture," and "quality of finished product."

Putnam nails, by their "elasticity," give slightly to the expansion and contraction of the hoof while the horse is in motion; by their "smoothness," do not enlarge the nail holes in the hoof, while their "supreme excellence," in "holding power in the clinch," enables them to hold the shoe in the hardest service until worn out.

By the "use of small nails," large holes are avoided and money saved to the smith.

Thus it will be seen that the officials of the *World's Columbian Exposition* recognize what qualities go to make up a good horse nail and that only the "Putnam" contains them all.

STEEL HORSE SHOES.

SHOENBERGER & CO., PITTSBURGH, PA.,

After numerous and costly experiments have succeeded in manufacturing a special quality of soft homogeneous steel, specially adapted to the manufacture of Horse and Mule Shoes, and are now making from this steel Extra Swaged, and Government Pattern Horse and Mule Shoes. They give the best of satisfaction everywhere and we furnish them to the trade at the same prices as the regular iron shoe sold by ourselves and our competitors. We are at present making our Roadster Pattern Horse Shoes out of Iron, but we will make them of Steel also within a short time.

No. 2 EXTRA SWAGED FRONT.

We also beg to say that we have introduced improved machinery into our new factory and have doubled our capacity, and are now prepared to furnish the best shoe, either iron or steel, ever offered to the trade.

We would also call your attention to our Improved Steel Toe Calk, equal to any in the market. To secure the best wearing qualities use sand or borax in welding on a calk and cool off at a dark red, or still better, cool off without plunging in water. We make sizes numbers 1, 2, 3, 4, 5 and 6, packed in 25-pound boxes.

Write to us for information and prices, or apply to jobbers and dealers, who sell them everywhere.

Models, *Makers of*
Franklin, H. H. Mfg. Co., Syracuse, N. Y.

Molding Sand.
Obermayer, S. Co., Cincinnati, O.

Motors, Water and Electric.
C. & C. Electric Co., 402 and 404 Greenwich St., N. Y.
Dallett, Thos. H. & Co., Phila., Pa.

Nail Machinery.
Pittsburgh Mfg. Co., Pittsburgh, Pa.

Nails (Cut) and Spikes.
Borden & Lovell, 70 West, N. Y.
Cumberland Nail & Iron Co., Phila.
Oxford Iron Co., 81 Washington,
Pottstown Iron Co., Pottstown, Pa
Riverside Iron Wks, Wheeling, W. Va.

Neck Yokes.
Johnson, S. C., Racine, Wis.

Nickel Platers' Supplies.
Colburn Electric Mfg. Co., Fitchburg, Mass.
Zucker & Levett Chemical Company. 10 to 14 Grand St., N. Y

Norway Shapes, *Rollers of.*
Rowland, William & Harvey, Framford, Philadelphia

Novelty Manufacturers.
Franklin, H. H. Mfg., Syracuse, N. Y.

Nut Machines.
Dunham Nut Mch. Co., Unionville, Ct

Nuts, Bolts, &c., *Makers of.*
American Bolt Co., Lowell, Mass.
American Screw Co., Providence, R.
Blake & Johnson, Waterbury, Conn.
Haskell, Wm. H. Co., Pawtucket. R. I
Mt. Carmel Bolt Co., Mt. Carmel, Conn.
Port Chester Bolt and Nut Co., Port Chester, N. Y.
Russell, Burdsall & Ward, Port Chester
Sternbergh, J. H. & Son, Reading, Pa
Wilson, J. Fred., Worcester, Mass.
Wm. H. Haskell Co., Pawtucket. R. I.

Oilers.
Wilmot & Hobbs Mfg. Co., Bridgeport, Conn.

Oil Stones.
Pike Mfg. Co., Pike Station, N. H.

Oil Stoves.
Glazier Stove Co., Chelsea, Mich.

Ores.
Wister, Francis, Philadelphia, Pa.

Ox Shoes.
Scranton Forging Co., Scranton, Pa.

Packing.
Morrison, Robt., St. Louis, Mo.
N. Y. Belting & Packing Co. Ltd., N.Y.

Padlocks.
Ames Sword Co., Chicopee, Mass.
Fraim, E. T., Lancaster, Pa.
Hillebrand & Wolf, Phila., Pa.
Miller Lock Co., Philadelphia, Pa.

Paint.
Dixon, Jos. Crucible Co., Jersey City, N.J

Paint Burners.
Dangler Stove & Mfg. Co., Cleveland, O

Paint Cans.
Wilmot & Hobbs Mfg. Co., Bridgeport, Conn.

Pants Stretcher.
Covert Mfg. Co., West Troy, N. Y.

Patent Solicitors.
Howson & Howson, Phila. & Wash'gton.
Jenner, H. W. T., Washington, D. C.
Stocking, E. B., Washington, D. C.

Perforated Metal.
Clinton Wire Cloth Co., Clinton, Mass.
Harrington & King Perforating Co. Chicago, Ill.
Hendrick Mfg. Co., Ltd., Carbondale, Pa.

Phosphor Bronze.
Phosphor Bronze Smelting Co., Limited, 512 Arch, Philadelphia.

Phosphor Tin.
Crescent Phosphorized Metal Co., Philadelphia, Pa.
Crosby Steam Gage & Valve Co., Boston, Mass.
Halk & Naumann, 516 Pearl, N. Y.

Picks and Mattocks.
Plumb, Fayette R., Philadelphia, Pa.

Pig Iron.
Houston, C. B. & Co., Philadelphia, Pa
Montour Iron & Steel Co., Danville, Pa.
Naylor & Co., 45 Wall, N. Y.
Pilling & Crane, Philadelpnia, Pa.
Samuel, Frank, Philadelphia, Pa.

Pig Iron Storage.
Am. Pig Iron Storage Warrant Co., 44 Wall, N. Y.

Pile Drivers.
Vulcan Iron Wks., Chicago, Ill.

Pipe, Bent.
National Pipe Bending Co., New Haven

Pipe Cutting and Threading Machines.
Bignall & Keeler Mfg. Co. St. Louis, Mo.
Merrill Mfg. Co., Toledo, O.
Pancoast Henry B. & Co., Philadelphia,
Saunder's Sons, D., Yonkers, N. Y.

Pipe Grips.
Prentiss Vise Co., 44 Barclay. N. Y,

Pipes, Fittings, &c., *Makers of.*
McNab & Harlin Mfg. Co., N. Y.

Pipe, Water and Gas. *Makers of.*
Cumberland Nail & Iron Co., Phila, Pa
Donaldson Iron Co., Emaus, Pa.
Riverside Iron Works, Wheeling, W Va.
Wood, R. D. & Co., Philadelphia, Pa.

Plane Irons, *Manufacturers of.*
Buck Bros., Millbury, Mass.

Planes, *Manufacturers of.*
Stanley Rule & Level Co., N. Y.

Plated Ware.
Boardman H. & Son, New Haddam Ct
Holmes & Edwards Silver Co., Bridgeport. Conn.
Rogers & Hamilton, Waterbury, Ct.
Upson & Hart Co., Unionville, Ct.

Plate, Iron and Steel, *Mfrs of*
Ætna-Standard Iron & Steel Co., Bridgeport, O.
Lukens Iron & Steel Co., Coatesville, Pa.
Mahoning Valley Iron Co., Youngstown, Ohio.
Moorhead-McLean Co., Pittsburgh, Pa.
McIlvain & Sons, Reading, Pa.
Pottstown Iron Co., Pottstown, Pa.

The Leading Authority on Business Law.

PARSONS'

THE LAWS OF BUSINESS,

For all the States and Territories of the Union.

By Theophilus Parsons, LL.D.

864 pages, 6 x 9 inches: full leather $4.50

This is a work almost indispensable to every business man, as a guide in transactions which are occurring constantly.

It constitutes a library of law on daily business affairs and is used for constant reference by many of the leading concerns throughout the country.

The volume treats fully and clearly of contracts, sales, agency, agreements and assessments, stoppage and transitu, considerations, limitations, notes and bills of exchange, interest and usury. Embraces chapters on commercial law in general, bonds, assignments, guaranty, the statute of frauds, receipts and releases, payment, partnership, arbitration, carriage of goods and passengers by railroad and other carriers hotel keepers, patents, copyrights, statute of limitations, the law of place, shipping, marine, fire and life insurance, deeds of land, mortgages of land, mortgages of personal property, leases, liens of mechanics and material men, the recovery of debts, wills, executors and administrators, guardians, and the legal rights of farmers, &c. Also abstracts of the laws of all the States and Territories relating to the collection of debts, usury, the execution and acknowledgment of deeds, witness required to wills, holidays and days of grace, mechanics' liens, chattel mortgages, and nearly 300 approved forms which have been tested in courts.

The Iron-Masters' LABORATORY

Exclusively for the
Analysis of Ores of Iron, Pig and Manufactured Iron, Steels, Limestone, Clays, Slags and Coal for Practical Metallurgical Purposes.

Branch Office, 339 Walnut St., Philadelphia.

All Analytical Work at Warrenton, Virginia.

J. BLODGET BRITTON.

This laboratory was established in 1866, at the instance of a number of practical Iron Masters, expressly to afford prompt and reliable information upon the chemical composition of the substances above mentioned, for smelting and refining purposes, the object being to make it at once a convenient, practically useful, and comparatively inexpensive adjunct to the Furnace, Forge and Rolling Mill.

PAYNE'S BUSINESS EDUCATOR,

600 pages, bound in cloth, $2.

Every business man should have some knowledge of the State and general laws of the country, especially those affecting the collection of accounts, rates of interest, &c. He should be able to draw up many of the simpler papers, such as leases, contracts, &c. He should be familiar with the different forms of legal papers used in business, and, above all, he should be an easy and pleasant letter-writer. All these points are carefully treated in Payne's Business Educator.

Among the subjects specially discussed are:

Commercial Correspondence.—Over 150 models of letters are given, covering every phase of business correspondence.

Legal Forms Used in Business.—Articles of copartnership; notice of dissolution, form of assignment; short form of deed; bill of sale; power of attorney; lease; surety; will; notes—promissory, negotiable, non-negotiable and demand; exchange—inland and foreign; acceptance; due bill; receipt; bills of lading; private cost marks, &c.

Dictionary of Mercantile Terms.—Giving a full and clear explanation of terms used in business.

Titles.—Official, military, scholastic, naval and professional titles used in the United States.

Useful Hints for Measuring Land.

Legal Rates of Interest, foreign coin, weights and measures compared with American standards.

Rules for Punctuation.

Rules of Order for deliberative assemblies and debating societies.

Interest Tables, and tables of weight and measures, &c.

How to Use a Typewriter, with lessons for practice.

Exercise in Practical Penmanship.

Laws and Forms.—An epitome or the laws of the United States and of the different States of the Union, which will be found invaluable to those who are forced to appeal to the law, as well as to that large class who wish to avoid it. The whole is alphabetically arranged, so as to make reference easy. Forms are given for a great number of legal papers, &c.

Dictionary of synonyms; marks of account; list of abbreviations; French, Spanish, Latin and Italian words and phrases, &c.

Making in all the most complete self-educator published.

BOOKS

—ON—

Mechanical and Steam Engineering.

The Slide Valve Practically explained.

Embracing simple and complete practical demonstrations of the operation of each element in a slide-valve movement, and illustrating the effects of variations in their proportions by examples carefully selected from the most recent and successful practice. By JOSHUA ROSE, M. E. Illustrated by 35 engravings; 100 pages; cloth..... .....$1

Twenty Years with the Indicator.

Being a practical text book for the engineer or the student, with no complex formulæ. By THOMAS PRAY, JR., consulting, constructing, civil and mechanical engineer, &c. Newly arranged; complete in one volume; 284 pages; cloth..... .....$2.50

The English and American Mechanic.

An every-day handbook for the workshop and factory, containing several thousand receipts, rules and tables indispensable to the mechanic, the artisan and the manufacturer. By B. FRANK VAN CLEVE. A new enlarged edition by EMORY EDWARDS, M.E. 476 pages, illustrated; cloth $2

A Treatise on Belts and Pulleys

Embracing full explanations on fundamental principles, proper disposition of pulleys, rules for determining widths of leather and vulcanized rubber belts and belts running over covered pulleys; strength and proportions of pulleys, drums, &c.; together with the principles and necessary rules for rope gearing and transmission of power by means of metallic cables. By J. HOWARD CROMWELL, Ph. B., author of a Treatise on Toothed Gearing; 271 pages; cloth...$1.50

Constructive Steam Engineering.

A descriptive treatise, embracing engines, pumps and boilers and their accessories and appendages. By JAY M. WHITHAM, M. E., C.E. 900 pages; 795 illustrations, many of which are full page and folding plates; cloth... .....$10

The American Steam Engineer.

Theoretical and practical, with examples of the latest and most approved American practice in the design and construction of steam engines and boilers of every description. For the use of engineers, machinists, boiler makers and students. By EMORY EDWARDS, M.E. Illustrated by 77 engravings; 419 pages; cloth..... .....$2.50

Modern Steam Engines.

An elementary treatise upon the steam engine, written in plain language, for use in the workshop, as well as in the drawing office, giving full explanations of the construction of modern steam engines, including diagrams, showing their actual operation; together with complete but simple explanations of the operations of various kinds of valves, valve motions and link motions, &c., thereby enabling the ordinary engineer to clearly understand the principles involved in their construction and use, and to plot out their movements upon the drawing board. By JOSHUA ROSE, M.E. Illustrated by 422 engravings; 321 pages, 10 x 12 inches; cloth.....$6

A Treatise on Toothed Gearing,

Containing complete instructions of designing, drawing and constructing spur wheels, bevel wheels, lantern gear, screw gear, worms, &c., and the proper formation of tooth profiles. For the use of machinists, pattern makers, draftsmen, designers scientific schools, &c. With many plates. By J. HOWARD CROMWELL, Ph.B. Third edition; 245 pages; cloth..... .....$1.50

Stationary Steam Engines.

Especially adapted to electric lighting purposes. Treating of the development of steam engines—the principles of construction and economy, with descriptiou of moderate speed and high speed engines. By Prof. R. H. THURSTON. Fourth edition; 177 pages; cloth..... .....$1.50

H. O. CANFIELD,

MOULDED RUBBER GOODS FOR MECHANICAL PURPOSES.

BRIDGEPORT, CONN.

Small moulded work a specialty. Send for estimates for moulds and work.

September 30, 1893.

I am using Dixon's Perfected Lubricating Graphite on a 12 x 22 x 36 Cooper Tandem, feeding it dry by using an old tallow cup, filling it once every day (it holds about 3 oz.); just before starting I open the valve on the cup, and the steam does the rest.

By using graphite I am able to run six days with one quart of cylinder oil of fair quality. We intend putting cups on all the engines, so as to use graphite on them all.

I have not had a chance to see the inside of the cylinder, but as soon as I do you will hear from me again; for, *if there was ever a good thing manufactured, Dixon's Lubricating Graphite is the thing.*

October 25, 1893.

To day I have taken off the heads from our tandem engine, and I find the cylinders are in the finest condition after a run of six months. All the parts are as bright as can be, yet show no signs of wear or cutting—thanks to Dixon's pure flake graphite. I consider this graphite the handiest article in an engine room for anything that sticks or squeaks or needs lubricating. Use Dixon's flake graphite is my advice

Very truly yours, CHAS. N. SHAW,
Asst. Engineer Lowell & Suburban Railway Power House,
Lowell, Mass.

THE WORKS MANAGER'S HANDBOOK

OF

MODERN RULES, TABLES AND DATA

For Civil and Mechanical Engineers, Millwrights and Boiler Makers; Tool Makers, Machinists and Metal Workers; Iron and Brass Founders, etc., etc.

BY

WALTER S. HUTTON,

CIVIL AND MECHANICAL ENGINEER.

The Author having been in the habit of compiling Rules and Data for his own use in the construction of a great variety of modern Engineering Work, and having found his notes extremely useful, decided to publish them, after revising them to date, believing that a practical work, suited to the Daily Requirements of Modern Engineers, would be favorably received by the public.

The rapid sale of the previous Editions, and the continued favor the Work has received, show that it has been of considerable service to Engineers.

In issuing a Fourth Edition, many alterations and improvements have been made, including the following amongst other additions, viz.: New matter relating to Steam Engines—Gas Engines—Pumps—Water Supply, etc., etc.

"The author treats every subject from the point of view of one who has collected workshop notes for application in workshop practice, rather than from the theoretical or literary aspect, and the work contains a great deal of that kind of information which is gained only by practical experience, and is seldom written in books."—*The Engineer.*

"The volume is an exceedingly useful one, brimful with engineers' notes, memoranda and rules, and well worthy of being on every mechanical engineer's bookshelf. There is valuable information on every page. It should be in every workshop manager's library."—*Mechanical World.*

ADMINISTRATION OF WORKSHOPS,

Public and Private.

BY CAPT. HENRY METCALFE.

322 Pages; 6¼ x 9½ inches. **CLOTH, $5.00**

This work is an effort to correct some of the wrong, and consequently unprofitable, methods of conducting manufacturing establishments, and proposes plans for more correct ones. A system of mechanical bookkeeping, based on the card catalogue method, dispensing with the use of books, by which the cost of manufactures may be promptly determined, either in gross or detail, as to component parts and operations thereon. Comprising a simple method of recording all dealings with material which relate to its procurement, expenditure or possession. Applied, with numerous practical illustrations, to the trust, accountability for public property and funds required of the U. S. Ordnance Department, with a review of its present practice. Illustrated with tables, forms of cards, etc.

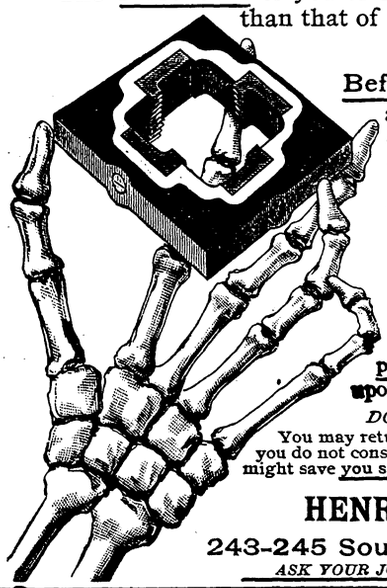
Lightning Die and Collet.

MANUFACTURED BY

Wiley & Russell Mfg. Co., Greenfield, Mass., U. S. A.



New York Agency for Wiley & Russell, 114 Liberty St.

Maule's "Skeleton" Pipe Die

Two "Points" about it—only 2 (There are plenty more, but we only mention these two here.)

1

The First Cost to you of MAULE'S "SKELETON" PIPE DIE is less than that of any other Pipe-Threading Die—and

2

Before it becomes dull from use it will cut as many perfect threads as the best solid die extant, and when it is dull, you don't throw it away and buy a new one—Oh, no! You simply sharpen the cutters on a common grindstone, and so make it practically as good as it was at first, and this sharpening process may be repeated a number of times.

A sample One-inch "Skeleton" Pipe Die, either 2⅜ or 2½ x ¾ thick, by mail, postage prepaid, will cost you **62 cents,** and will be sent upon receipt of a Postal note for that amount.

DO NOT SEND US ANY POSTAGE STAMPS.

You may return such sample to us, at our expense, if, after seeing it, you do not consider it worth the price. Don't the above sound as if it might save you some money—if TRUE?

5-ton Ridgway Crane in Foundry Diamond State Iron Co., Wilmington, Del.

Steam-Hydraulic Elevator.

SAFE, RAPID, SURE

—AND—

Not Costly.

The Crane that is perfection for the exacting requirements of a Foundry is the Crane for all places.

Give full particulars and get circulars and prices.

CRAIG RIDGWAY & SON,
Coatesville, Pa.

Ridgway Balanced Steam-Hydraulic Crane.

The Greatest Foundry Crane Known.

Another Big Foundry Adopts It.

The large, handsome and most modern foundry of the country now being erected by the J. I. Case Co. at Racine, Wis., will be equipped with only the latest and best labor saving machinery to be had.

The Cranes used, of course, will be the Ridgway Steam-Hydraulic. The order for these and a lot of our patent one ton air hoists has been placed with us.

When the best money making establishments in the country are adopting, in this way, the Ridgway Crane, what more need be said?

Read what the finest foundry in Chicago says:

FRASER & CHALMERS,
Mining Machinery.

CHICAGO, ILL., April 11, 1893.

MESSRS. CRAIG, RIDGWAY & SON,
Coatesville, Pa.

Dear Sirs:—Replying to your favor of the 6th, asking whether the Steam-Hydraulic Crane furnished for our new foundry at 12th and Rockwell Streets has been satisfactory or not, we beg to say that we have found the Crane highly satisfactory in every respect. We consider it the best Crane made to-day for general foundry use and it is also well adapted for other uses. We should be glad to have you refer anybody to us who may wish to hear directly from us as to our opinion of the Crane. Yours truly,

FRASER & CHALMERS, C. E. Billin, Supt.

GOODWIN'S

Improved Bookkeeping

AND

Business Manual.

By J. H. GOODWIN.

Sixteenth edition; Forty-first Thousand; Four Thousand Testimonials; Richly bound in cloth, price, $3.00.

"Am especially interested in the article on 'At Houses (wholesale),' and consider it the perfection of elaboration and detail. Even after an experience of nearly thirty-one years with this firm as manager, I find a great deal of valuable information in this article. The price of your book is a mere song when compared with its great value in material."—CHARLES E. BRADY, manager of entry rooms and private accountant for E. S. Jaffray & Co., importers of dry goods, New York City.

"I find that your book contains many important points never brought out before in a work of its kind. I consider it invaluable to the fraternity of bookkeepers in general, and in particular to those who are connected with the offices of large mercantile houses."—W. H. RUSSELL, head bookkeeper for The H. B. Claflin Company, importers and jobbers of dry goods, New York City.

"Through the adoption of your system I have effected a saving in my work of at least one-third."—A. B. MUNN, bookkeeper for Miller, Coleman & Co., planing mill and lumber, Scranton, Pa.

"Am following your directions and have lessened my labor *one-half*. I admire your system in every respect."—JAMES H. LOVELESS, bookkeeper for C. C. McCarthy, wholesale boots and shoes, Columbus, Ohio.

"After a few days' study of your valuable work I changed my books from Single Entry (as they had been kept for 10 years) to your system of Double Entry, and am greatly pleased with it."—W.T. CHANDLER, general merchandise, Ash Grove, Mo.

"'Tis the most complete work I have seen. I strongly recommend it to the accountant, or to anybody who is desirous of mastering the art of bookkeeping. I would not part with the copy now in my possession for **$500**, if I did not know where I could procure another copy of the same work."—N. TOMNEY, bookkeeper for Graham, Horn & Co., Vermillion Bay, Ontario, Canada.

"Your book *far surpasses* my expectations, containing, as it does, so much valuable information."—CHAS. W. SIMMONS, with the Standard Oil Company, Cleveland, Ohio

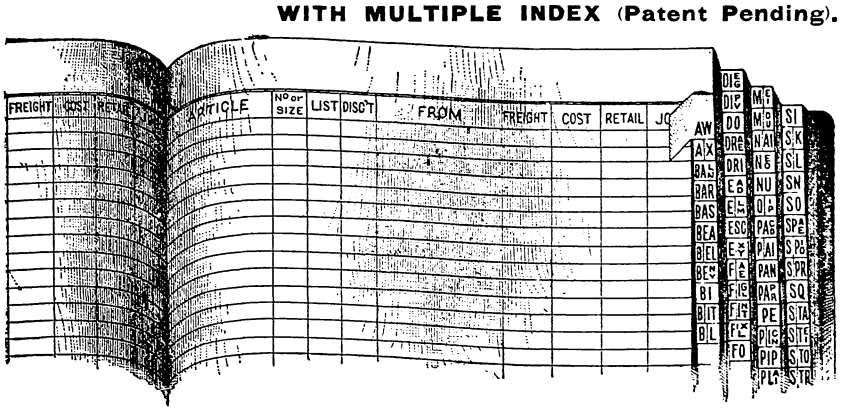
The Iron Age Hardware Price Book E.

SECOND EDITION, REVISED AND ENLARGED, WITH MULTIPLE INDEX (Patent Pending).

AD	GU	SC^{I}_{O}
AN	HA^{L}_{M}	SCR
AU	HAN	SCY
AW	HA^{S}_{T}	SE
AX	HI	SH^{A}_{E}
BA^{L}_{N}	HO^{D}_{L}	SH^{O}_{R}
BA^{R}_{S}	HOO	SI
BE	H^{OS}_{U}	SK



Fac-Simile of Indexing.

SIZE.—The book is 7 x 10 inches (much larger than Price Books A, B, C, or D), 350 pages.
PAPER.—The paper is the celebrated Crane's heavy ledger paper, tough and strong, permitting frequent changes and erasures.
BINDING.—The binding is of the very best quality - flexible seal grained leather.
INDEX.—By means of the arrangement shown in the cut the index applies to every page (except Supplement) and permits reference to any article at a single motion. This greatly facilitates the use of the book, avoiding the troublesome turning from page to page which is necessary in connection with other Price Books. It has been prepared with great care, and it is believed that it provides a place for every article in the Hardware line
ARRANGEMENT.—The book is arranged to keep a complete record of prices on a single page, the width giving sufficient room.
SUPPLEMENT.—A 40-page Supplement is provided to give room for supplemental quotations, memoranda, tables, &c.

THIS BOOK IS ISSUED IN ONLY ONE EDITION, PRICE, $5.00.

The Iron Age Hardware Price Book F.

WITH MULTIPLE INDEX (Patent Pending).

BAR	E^{L}_{M}	PA^{C}_{D}	SP^{I}_{O}
BAS	ESC	PAI	SPR

Fac-Simile of Indexing.

SIZE.—The book is 8¼ x 11 inches (much larger than Price Books A, B, C, D or E), 556 pages.
PAPER.—The paper is the celebrated Crane's heavy ledger paper, tough and strong, permitting frequent changes and erasures.
BINDING.—The binding is of the very best quality—flexible seal grained leather.
INDEX.—By means of the arrangement shown in the cut the four rows of index applies to every page (except Supplement) and permits reference to any article at a single motion. This greatly facilitates the use of the book, avoiding the troublesome turning from page to page which is necessary in connection with other Price Books. It has been prepared with great care, and it is believed that it provides a place for every article in the Hardware line, and gives ample space for recording prices.
Sufficient space has been provided for large lines of goods such as Axes, Bits, Springs, etc., by allowing four pages to such indices, instead of two pages, as for lines of goods requiring less space. This is accomplished, as in AX for example, in Book F by having a short tab with the letter A on the tab on the first leaf, and AX on the tab on the second leaf. The A on the first leaf is directly over the A on the lower leaf, so that the index reads AX whether looking at both leaves together, or at the lower one only.
The four rows of index tabs are printed in gold letters on black Russia leather. The tabs are securely fastened on both sides of each page, making a handsome and durable index.
ARRANGEMENT.—The book is arranged to keep a complete record of prices on a single page, the width giving sufficient room.
SUPPLEMENT.—An 80-page Supplement is provided to give room for supplemental quotations, memoranda, tables, &c.

THIS BOOK IS ISSUED IN ONLY ONE EDITION, PRICE, $7.50.

Advantages of Multiple Index Price Book.

A SPECIAL feature of the books is the arrangement of the index characters, which, instead of being alphabetical, are arranged with special reference to the classification of Hardware goods, each index character giving the first two or three letters of the names of Hardware articles as shown above. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CH^{I}_{U}	For Iron,	turn to	IRO
" Parers, Apple	"	PA^{P}_{R}	" Cutlery,	"	CUT	" Irons,	"	IR'S
" Saws,	"	SAW	" Cartridges,	"	CAR	" Shovels,	"	SH^{O}_{R}
" Pumps,		PU^{M}_{N}	" Rules,	"	RU^{B}_{L}	" Grindstones,	"	GRI
" Bits,	"	BIT	" Locks,	"	LO	" Stones,	"	STO

Special care has been taken to make the classification as indicated in the index correct and comprehensive, making provision for all Hardware articles and giving sufficient space for the keeping and recording of prices. It is thought that every strictly Hardware article has its first two or three letters given, thus permitting immediate reference to it by a single motion.
It is, however, obvious if any articles are not directly designated by the index characters, that the index, being alphabetical in its arrangement, indicates the place where quotations on such articles should be recorded. The supplement, however, may be found useful for quotations on any outside goods which the Hardwareman may desire to keep prices on, while at the same time it may be used if necessary for any overflow of matter from the preceding pages, or to contain list prices or other matter relating to goods.
Hardware Classification.—A pamphlet containing a classification of the leading Hardware articles is furnished with the price books.
Standard Lists —In connection with these price books a set of *The Iron Age* STANDARD HARDWARE LISTS can be used with great advantage Price 25 cents.
These price books, which have been prepared by R. R. Williams, Hardware Editor of *The Iron Age*, are presented to the attention of Hardware men in the confidence that they will be found a most valuable aid in keeping track of prices.

B. & B. Stoves are the Leaders.

B. & B. Combination Oil Heaters and Cook Stoves are a great success, as proven by the many testimonials received from all parts of the country.

Every Stove is mounted on rollers, and can easily be moved from room to room. *They can be used in place of a range in the kitchen or in place of a base-burner in the parlor.* They are thoroughly well adapted to fill all requirements, *combining as they do all the qualities of a first-class Oil Heater and an elegant Parlor Cook Stove.*

If you happen to have one of them upstairs, *the tank can easily be removed and taken down to the kitchen to be filled*, and again replaced in the Stove.

Those who have used the old style Stove with tanks fastened in them as tight as if cast in the iron will appreciate this feature. They can be fitted with our 2-hole, 3-hole or 4-hole Extension Tops for regular 8-inch ware. We want your trade, and if you will give us a chance to quote you prices we will have it.

ASK FOR OUR NEW 80-PAGE CATALOGUE.

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

The Prospector's Field-Book and Guide in the Search for and the Easy Determination of Ores and other Useful Minerals. By Prof. H. S. OSBORN, LL.D. EXTRACT FROM THE PREFACE: In the following pages we have attempted to present such a view of the whole subject of prospecting for the useful minerals that any liberally educated reader may fully comprehend our meaning. We have therefore explained special terms where we have thought it convenient to use them, and where the technically educated student would not need an explanation. The table of contents and index have both been carefully prepared, and being very full, will make reference to any subject in he volume easy and satisfactory. 44 engravings. 175 pages $1.50

DISSTON'S Improved Saw Clamp
AND FILING GUIDE.

ESPECIALLY DESIGNED TO ASSIST THOSE NOT SKILLED IN THE ART OF SAW FILING TO FILE A SAW CORRECTLY.

CUT No. 1.

Cut No. 1 shows a saw and the attachment in proper position for filing the first side; and Cut No. 2 shows the saw and attachment reversed and in position to file the second side. There are three marks on one of the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position No. 1, and the other designates when it is in position as shown in No. 2. The third, or centre, marks show when it is in position for filing Rip Saws.

CUT No. 2.

To obtain the correct position, loosen the wing nut and move the guide around to the point desired; after tightening wing nut, loosen screw in file handle, then turn handle until file gives the shape tooth wanted.

A good way is to select a tooth of correct shape and let file down into it, tighten set screw in handle, then file a tooth to see if the shape suits. If not turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth, see cut No. 1; when one side is filed, reverse saw and attachment and adjust as in No. 2, and file the other teeth. For Rip Saws, place the file at right angles with the saw and file every tooth. Always keep the file as nearly horizontal as possible.

This filing guide is sold only attached to our No. 3 Improved Clamp or Vise, and not sold separately. We recommend this as the best saw clamp on the market, being quickly and easily adjusted, and not liable to get out of order.

Write for price including No. 3 Clamp, Filing Guide, File and Handle complete. Packed one in a wooden box.

Henry Disston & Sons, INCORPORATED, **Philadelphia, Penn.**

THE FILES THAT LEAD THEM ALL.

THE BEST EQUIPPED FILE WORKS IN THE WORLD.

The fact that we alone use the improved File Machinery recently invented by Alfred Weed, and the even heat of natural gas, enables us to produce a file that will cut faster and wear longer than any on the market.

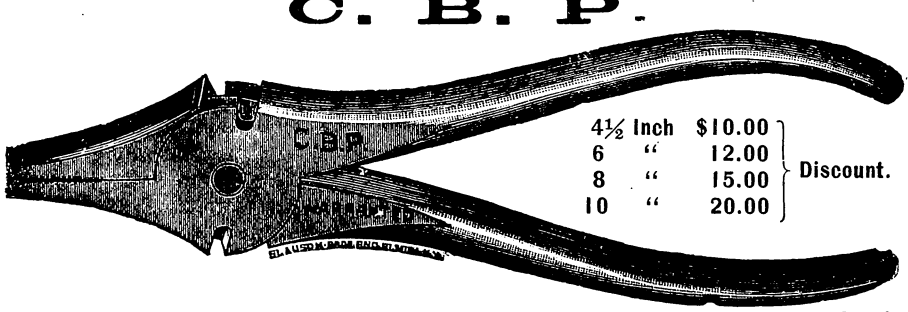
Cronk's Patent Wire Cutter AND Bender.

8 In., $15.00
10 In., 20.00
} Discount,—

This surpasses any Plier in the market for Cutting and Bending Wire, and can also be used in place of Hill's Hog Ringer. Is especially adapted to farmers' use in building Wire Fence, &c.

Our reasons for claiming that we have the best Pliers in the market are:

FIRST.—We use the best Tool Steel and they are nicely finished.



SECOND.—We combine both Flat and Round-Nosed Pliers in one; the concave and convex circles between the handles are used for bending wire in any desired shape.

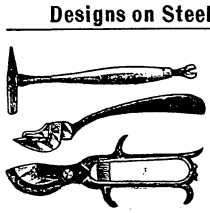
THIRD.—The cupping in the Nose is used for pulling tacks, brads or nails, and can also be used in place of Hill's Hog Ringer.

FOURTH.—We can cut Barbed Wire, Barb Belt or any kind of Wire used for Fencing purposes. We also claim that we have the only Plier made that the Cutting Jaws cannot be broken.

By passing the Wire through the Pliers it makes a very handy cut and also holds the Wire after it is cut.

C. B. P.

4½ Inch	$10.00	
6 "	12.00	Discount.
8 "	15.00	
10 "	20.00	



What we claim for this plier is that it is made from best quality tool steel and is made heavier and stronger than any plier of its kind in the market and the finish is first-class. Also they are made so the jaws are parallel when used on wire from 9 to 14 gauge and will hold the wire solid

Send for Revised Catalogue.

THERE IS NOTHING NEW

TO SAY ABOUT THIS KNIFE EXCEPT

IT IS GROUND SHARP

WE DON'T KNOW HOW TO IMPROVE IT.

Blade is made of steel especially prepared for the purpose, and it is made just right; finish excellent; shape unsurpassed; the handle just fits the hand.

GENERAL APPEARANCE IRREPROACHABLE.

Made in sizes from 5 inch to 8 inch; a strictly first-class butcher knife at a moderate price.

WE HAVE OTHER BUTCHER KNIVES,

4½ to 14 inch blade, that will cut as well, for less money. Also Table Knives and Forks, Carvers, Butcher Steels, Bread Knives, Cheese Knives, Butter Spades, Apple, Kitchen, Putty, Cigar, Shoe Knives, &c., &c., in great variety. We aim to make the best and sell at reasonable prices.

JOHN LOYD,

Machine Knives, Shear Blades, Presses and Dies.

Nos. 558 to 562 Water Street, New York.

LIGHTNING DRAIN CLEANER.

The Drain Cleaner is a hand machine used as a shovel. The dirt pan is made No. 18 Steel 3 inches deep and 12 inches long, with vertical end in rear. It has a decided advantage over other machines in dipping water and dirt. It is also used for letting down tiling in ditches, which is very convenient and saves extra labor of standing and working in muddy ditches. The iron adjusting rod can be used with great rapidity and ease and can be adjusted to pull or push with as quick a motion as may be desired. To use it in any particular shape tighten the set screw.

Petroleum Oil Stove.

AN INTENSE HEAT,
A STEADY HEAT
AT ALL TIMES.

FOR BURNING Crude Petroleum, Torch or Kerosene Oil. Has a stove pipe which carries off the waste products of combustion, so there is no odor, no smoke and no foul air.

Can be changed from an oil stove to one for burning coal by lifting out the top plate of burner and substituting a coal grate which is furnished with each stove. This can be done in a moment and while the stove is red hot, and without allowing the fire to go out. Experiments extending over several months' time show the stove consumes from one-sixth to one-fourth gallon of Crude Oil per hour, according to the amount of heat required. The oil can be bought for from three to four cents per gallon.

Branch Office and Warehouse with J. C. McCARTY & Co., 97 Chambers Street, New York.

"SHUT DOWN!" What's the Matter?"

"BELT BROKE AGAIN!"

"See here, Mr. Foreman, if you don't have fewer stoppages I'll——"

"Stop, Mr. Proprietor, the fault is yours. Quit buying belts that crack, peel, open between plies, stretch and break, and I'll give you a smooth run. You think it economy to buy cheap belts from Worthless & Co. Why! the time lost and trouble and annoyance caused by shut-downs would pay the difference between good and bad belts ten times over. Why don't you buy Cleveland's 'Shield High Grade,' sold by Reliable & Co.? It has an established reputation, has been thoroughly tested, and is in use in all the large mills and elevators here. You take no chances on it. Besides, a strong warrantee is indelibly branded upon it, such as no manufacturer would dare put or a poor belt. You remember that threshing machine man, whose engine we repaired, said he had a Cleveland High Grade Belt in use over five years, and if it will stand such severe work, it certainly will ours."

Trade  Mark.

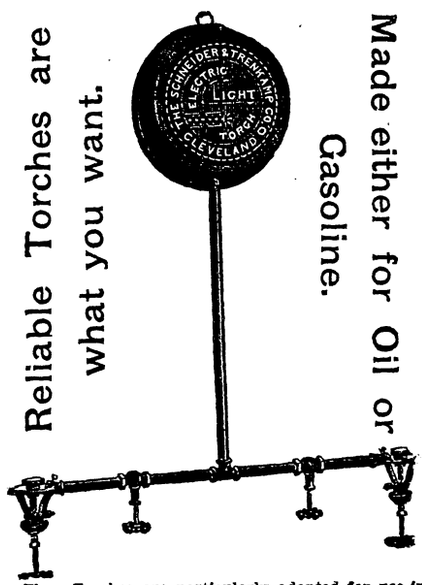
LABEL INDELIBLY STAMPED ON EVERY 30 FEET OF BELT.

We are the only manufacturers who indelibly stamp a warrantee on each and every belt (see copy of label) and it remains as long as the belt lasts; and who give a written guarantee (see fac-simile). Our threshing machine belts have made a wonderful record, and our endless belts have given splendid service, the splice being as strong as the solid part of the belt. Suction Hose for Portable Engines and all other purposes.

We Want Your Trade.
Send for 60-page Catalog.
Write for Prices and Samples.

GUARANTEE.

We Guarantee *our "Shield High Grade" Belt to be made of best long staple, 30 & 32-oz. cotton duck; To be the most durable, because it is made of best materials, by special machinery; To be the best selling belt, because it has the best reputation, a cleaner record of long service, and because its warrantee is stronger, bolder, broader than any other, and is irrevokable, protecting both dealer and consumer. We further guarantee that, should any belt, under fair and reasonable service, fail or give out from any defect in material or manufacture, to replace same free of charge, on return to us.*



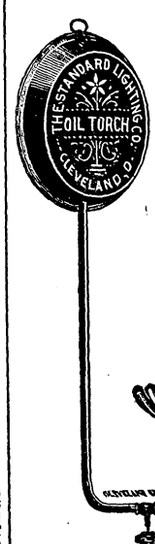
Witness *our hand and seal.*

Cleveland Rubber Works
Of the Mechanical Rubber Co.

CLEVELAND RUBBER WORKS
OF THE MECHANICAL RUBBER CO., CLEVELAND, OHIO.

Reliable Torches are what you want.

Made either for Oil or Gasoline.



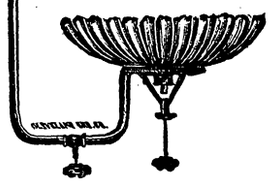
These Torches are particularly adapted for use in Factories, Foundries, Machine Shops, Rolling Mills, Blacksmith Shops, Warehouses, &c. They make a strong white light, are free from smoke and are not affected by wind or rain. They are convenient and portable. These Torches can be run at an expense of about one-half cent to one cent per hour, burning a bright, steady light which is ten times greater than the light of an ordinary gas burner.

Write us for prices. A liberal discount given to the trade. Manufactured by

THE SCHNEIDER & TRENKAMP CO.,
Nos. 479 to 497 Case Ave., Cleveland, Ohio.

LIGHT YOUR DARK SHOPS CHEAPLY.

Give your men plenty of Light and they will do double work.

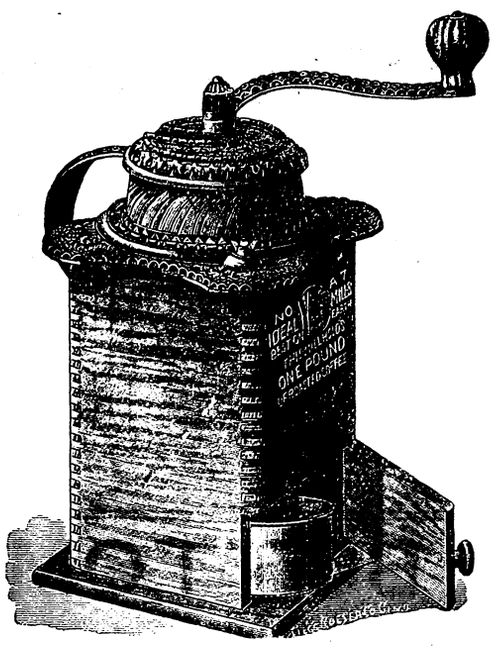


The Wall Torch has been used for several years as a means of illumination in **Mills, Foundries, Machine and Car Shops, Tunnels, Street Stands, Band Stands, Smith Shops,** etc.

While there are many cheap, inferior torches made which injure the sale of a good article, and condemn the **Torch** in general, our "Incandescent" Wall Torches are recognized as the best, and are now in use in the largest manufacturing establishments in the country giving **PERFECT SATISFACTION,** as is evidenced by the **DUPLICATE ORDERS** we receive from year to year.

They burn 150° Coal Oil, or 74° Naphtha, requiring a different burner for each.

In ordering be careful to state which is desired.



Price, for Single Torch, complete, $2 each.

SPECIAL PRICE QUOTED FOR QUANTITIES.

Highest Award

FOR

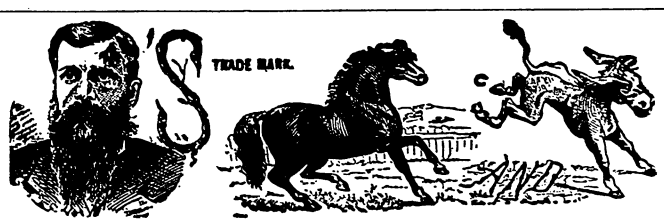
Supreme Excellence

TO

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS,

At the *World's Columbian Exposition* at Chicago. A medal and diploma worded:

"Supreme excellence in material, method in manufacture, and quality of finished product; elasticity and smoothness combined with holding power in clinch.
It allows the use of very small nails."



There is nothing beyond "supreme excellence," nor is there anything comprised in a horse nail, except the "material from which it is made," "the method of manufacture," and "quality of finished product."

Putnam nails, by their "elasticity," give slightly to the expansion and contraction of the hoof while the horse is in motion; by their "smoothness," do not enlarge the nail holes in the hoof, while their "supreme excellence," in "holding power in the clinch," enables them to hold the shoe in the hardest service until worn out.

By the "use of small nails," large holes are avoided and money saved to the smith.

Thus it will be seen that the officials of the *World's Columbian Exposition* recognize what qualities go to make up a good horse nail and that only the "Putnam" contains them all.

STEEL HORSE SHOES.

SHOENBERGER & CO., PITTSBURGH, PA.,

After numerous and costly experiments have succeeded in manufacturing a special quality of soft homogeneous steel, specially adapted to the manufacture of Horse and Mule Shoes, and are now making from this steel Extra Swaged, and Government Pattern Horse and Mule Shoes. They give the best of satisfaction everywhere and we furnish them to the trade at the same prices as the regular iron shoe sold by ourselves and our competitors. We are at present making our Roadster Pattern Horse Shoes out of Iron, but we will make them of Steel also within a short time.

The advantages are that, being made of vastly superior material, they will never show signs of red-shortness or cold-shortness, will never split in the crease and will always show a much finer finish than any iron shoe.

We make the Steel Shoes lighter than the Iron, giving more shoes to the keg, as follows:

No. 1, 15 more shoes to the keg.
" 2, 14 " " " "
" 3, 10 " " " "
" 4, 8 " " " "

And other sizes in proportion.

No. 2 EXTRA SWAGED HIND.

We also beg to say that we have introduced improved machinery into our new factory and have doubled our capacity, and are now prepared to furnish the best shoe, either iron or steel, ever offered to the trade.

We would also call your attention to our Improved Steel Toe Calk, equal to any in the market. To secure the best wearing qualities use sand or borax in welding on a calk and cool off at a dark red, or still better, cool off without plunging in water. We make sizes numbers 1, 2, 3, 4, 5 and 6, packed in 25-pound boxes.

Write to us for information and prices, or apply to jobbers and dealers, who sell them everywhere.

Sheet Iron and Steel, *Manufacturers of.*
Ætna-Standard Iron and Steel Co., Bridgeport, O.
Cambridge Iron & Steel Co., Cambridge, Ohio.
Chess Bros., Pittsburgh, Pa.
Mahoning Valley Iron Co., Livingston, Ohio.
Moorehead-McCleane Co., Pittsburgh,
Pierson & Co., 29 Broadway, N. Y.
Singer, Nimick & Co., Ld., Pittsburgh, Pa.
The Mahoning Valley Iron Co., Youngstown, O.
Alan Wood Co., Philadelphia.
W. Dewees Wood Co., McKeesport, Pa.

Sheet Metal Work.
Clark & Cowles, Plainville, Conn.

Sheet Zinc.
Matthiessen & Hegeler Zinc Co., La Salle, Ill.

Shelf Brackets.
Koch. A. B. & Co., Peoria, Ill.

Sinks.
Douglas, W. & B., Middletown, Conn.

Skates, Ice.
Barney & Berry, Springfield, Mass.
Dame, Stoddard & Kendall, Boston, Mass.
Lovell, Jno. P. Arms Co., Boston, Mass.
Sickels, Sweet & Lyon, 35 Barclay St., N. Y.
Winslow, Saml, Skate Mfg. Co. Worcester, Mass.

Skates, Roller.
Barney & Berry, Springfield, Mass.
Henley, M. C., Richmond, Ind.
Union Hardware Co., Torrington, Conn
Winslow, Saml., Skate Mfg. Co., Worcester, Mass

Smelting Works.
Reeves, Paul S., 760 S. Broad, Phila.

Soldering Coppers.
Clendenin Bros., Baltimore, Md.
Covert Mfg Co., West Troy, N. Y.

Speaking Tubes.
Ostrander, W. R. & Co., 204 Fulton St., N. Y.
Wollensak, J. F., Chicago, Ill.

Specialties, Pat. Articles.
Konigslow, O., Cleveland, O.

Spelter.
Matthiessen & Hegeler Zinc Co., La Salle, Ill.

Spoons and Forks.
Boardman, L. & Son, New Haddam, Conn.
Holmes & Edwards Silver Co., Bridgeport, Conn.
Rogers, The Wm. Mfg. Co., Hartford, Conn.
Rogers & Hamilton Co., Waterbury, Conn.
Upson & Hart Co., Unionville, Ct.

Sporting Goods.
Hartley & Graham, 313-315 B'way, N.Y

Springs.
Cary, Alanson, 240-242 W. 29th St., N.Y
Dunbar Bros., Bristol, Conn.
Miller & Van Winkle, Brooklyn, N. Y
Morgan Spring Co., Worcester, Mass
Roland, Wm. & Harvey, Phila., Pa.
Sabin Machine Co., Montpelier, Vt

GOODWIN'S

Improved Book-keeping and Business Manual,

Revised and Enlarged Edition. BY J. H. GOODWIN. Forty-first Thousand.

The author of this book has sought among bookkeepers of all degrees of ability and business men in various kinds of business for points which would be likely to prove of value either to a bookkeeper or to a business man. In these interviews he has been permitted to inspect the books of some of the largest business houses of the country, and to learn the methods employed by them. The work therefore embodies not only the results of his own experience, but that of at least a hundred other bookkeepers of the highest standing in the profession, from whom there have been received and are here given *a great variety of valuable points.*

A FEW OF THE IMPORTANT MATTERS CONSIDERED ARE AS FOLLOWS:

ADVANCED DOUBLE ENTRY. Describing the peculiarities of the most advanced systems of the present day, and contrasting them with those of antiquated systems. In this article it is shown how a set of books may be kept by Double Entry with an increase in labor of *only three per cent.* beyond that required for the keeping of them by Single Entry. The principles of Single Entry are described, and the objections to that method of keeping books set forth. Complete directions are given for the changing of a set of books from Single Entry to the most advanced system of Double Entry.

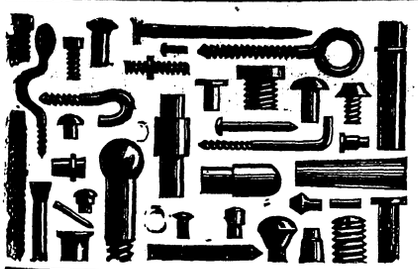
PERPETUAL PROOF. A new method of proving each and every posting, as well as the balance of every account in the Ledger—requiring but little, if any, additional labor, and effecting a saving of *fifty per cent.* in the expense of both Salaries and Ledgers.

NO TEACHER REQUIRED. Many hundreds of purchasers who had no previous knowledge of bookkeeping have secured excellent situations through the knowledge derived from a study of this work.

STOCK COMPANIES. Explaining at length how the books for such are opened and closed; also describing in detail many other pecularities appertaining especially to this class of business concerns.

"A 1" HOUSES. This article was written principally, from points given to the author by nineteen of the largest houses in New York City.

TRIAL BALANCES. A recently discovered method of detecting errors in Trial Balances, also a new method of detecting errors in posting.



BUSINESS MEN. This work contains a large number of valuable hints upon subjects of special interest to all business men.

Printed in two colors, on an excellent quality of paper, and is substantially bound in dark, rich cloth. Sent, post-paid, on receipt of price ($3.00) by

The Leading Authority on Business Law.

PARSONS'

THE LAWS OF BUSINESS,

For all the States and Territories of the Union.

By Theophilus Parsons, LL.D.

864 pages, 6 x 9 inches; full leather $4.50

This is a work almost indispensable to every business man, as a guide in transactions which are occurring constantly.

It constitutes a library of law on daily business affairs and is used for constant reference by many of the leading concerns throughout the country.

The volume treats fully and clearly of contracts, sales, agency, agreements and assessments, stoppage and transitu, considerations, limitations, notes and bills of exchange, interest and usury. Embraces chapters on commercial law in general, bonds, assignments, guaranty, the statute of frauds, receipts and releases, payment, partnership, arbitration, carriage of goods and passengers by railroad and other carriers hotel keepers, patents, copyrights, statute of limitations, the law of place, shipping, marine, fire and life insurance, deeds of land, mortgages of land, mortgages of personal property, leases, liens of mechanics and material men, the recovery of debts, wills, executors and administrators, guardians, and the legal rights of farmers, &c. Also abstracts of the laws of all the States and Territories relating to the collection of debts, usury, the execution and acknowledgment of deeds, witness required to wills, holidays and days of grace, mechanics' liens, chattel mortgages, and nearly 300 approved forms which have been tested in courts.

J.C. SPEIRS & CO. WORCESTER . MASS.

HIGGS WATER VALVE

FOR GAS FURNACES AND PRODUCERS.

Used for reversing the gas from one end of the furnace to the other. It is kept cool by water in an upper and lower chamber, and the butterfly or flapper, which prevents it from burning, warping or leaking and by its use saves from 20 to 25 per cent of fuel, saves wasting of iron in the furnace by the shortage of gas caused by the leaking of the valve. Will last for years.

BOOKS

—ON—

Mechanical and Steam Engineering.

The Slide Valve Practically explained.

Embracing simple and complete practical demonstrations of the operation of each element in a slide-valve movement, and illustrating the effects of variations in their proportions by examples carefully selected from the most recent and successful practice. By JOSHUA ROSE, M. E. Illustrated by 35 engravings; 100 pages; cloth..... .....**$1**

Twenty Years with the Indicator.

Being a practical text book for the engineer or the student, with no complex formulæ. By THOMAS PRAY, JR., consulting, constructing, civil and mechanical engineer, &c. Newly arranged; complete in one volume; 284 pages; cloth..... .....**$2.50**

The English and American Mechanic.

An every-day handbook for the workshop and factory, containing several thousand receipts, rules and tables indispensable to the mechanic, the artisan and the manufacturer. By B. FRANK VAN CLEVE. A new enlarged edition by EMORY EDWARDS, M.E. 476 pages, illustrated; cloth **$2**

A Treatise on Belts and Pulleys

Embracing full explanations on fundamental principles, proper disposition of pulleys, rules for determining widths of leather and vulcanized rubber belts and belts running over covered pulleys; strength and proportions of pulleys, drums, &c.; together with the principles and necessary rules for rope gearing and transmission of power by means of metallic cables. By J. HOWARD CROMWELL, Ph. B., author of a Treatise on Toothed Gearing; 271 pages; cloth...**$1.50**

Constructive Steam Engineering.

A descriptive treatise, embracing engines, pumps and boilers and their accessories and appendages. By JAY M. WHITHAM, M. E., C.E. 900 pages; 795 illustrations, many of which are full page and folding plates; cloth... .....**$10**

The American Steam Engineer.

Theoretical and practical, with examples of the latest and most approved American practice in the design and construction of steam engines and boilers of every description. For the use of engineers, machinists, boiler makers and students. By EMORY EDWARDS, M.E. Illustrated by 77 engravings; 419 pages; cloth..... .....**$2.50**

Modern Steam Engines.

An elementary treatise upon the steam engine, written in plain language, for use in the workshop, as well as in the drawing office, giving full explanations of the construction of modern steam engines, including diagrams, showing their actual operation; together with complete but simple explanations of the operations of various kinds of valves, valve motions and link motions, &c., thereby enabling the ordinary engineer to clearly understand the principles involved in their construction and use, and to plot out their movements upon the drawing board. By JOSHUA ROSE, M.E. Illustrated by 422 engravings; 321 pages, 10 x 12 inches; cloth.....**$6**

A Treatise on Toothed Gearing,

Containing complete instructions of designing, drawing and constructing spur wheels, bevel wheels, lantern gear, screw gear, worms, &c., and the proper formation of tooth profiles. For the use of machinists, pattern makers, draftsmen, designers scientific schools, &c. With many plates. By J. HOWARD CROMWELL, Ph.B. Third edition; 245 pages; cloth.... .....**$1.50**

Stationary Steam Engines.

Especially adapted to electric lighting purposes. Treating of the development of steam engines—the principles of construction and economy, with description of moderate speed and high speed engines. By Prof. R. H. THURSTON. Fourth edition; 177 pages; cloth..... .....**$1.50**

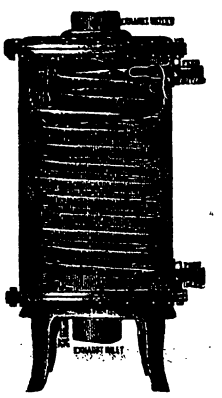
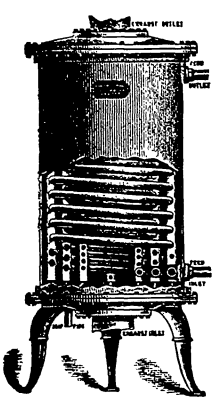
THE AMERICAN FEED WATER HEATER

Received the First Prize at the

Mechanics' Association Fair, - Boston, Mass.



What you get when you buy the AMERICAN HEATERS:



COPPER COILS,	NO RUSTING OUT,
SOLIDLY BRAZED,	NO LEAKY JOINTS,
GUN METAL FITTINGS	NO TROUBLE FROM EXPANSION,
AND CLAMP STAYS,	NO BACK PRESSURE,
STEEL SHELLS,	NO OIL IN BOILER.

We guarantee this Heater to be the Most Durable, Effective and Cheapest

WHITLOCK COIL PIPE CO.,

27 South Street, - - - - - - Elmwood, Conn.

The National Feed Water Heater

is a BRASS COIL HEATER, delivering water to the boilers at 212° Fahrenheit. It is low in price, but unequalled in efficiency. 500,000 H. P. in daily use attests its merits.

Coils and Bends of Iron, Brass, and Copper Pipe.

THE NATIONAL PIPE BENDING CO.,

98 River St., New Haven, Conn.

BONNELL'S NUBIAN

NUBIAN BONNELL'S NUBIAN BONNELL'S NUBIAN BONNELL'S NUBIAN BONNELL'S NUB

FILL YOUR HEADS

with sound sense and your pockets with dollars. No better aid to do this can be offered you than to use **BONNELL'S NUBIAN IRON ENAMEL.** Always reliable, always the same. We do not do like many varnish houses do, who put all stuff that is no good for anything else into their black varnish. We make every lot from a regular formula. For all iron work that you want to paint black it has no equal. As cheap as asphaltum and far better.

77 Warren St., New York, N. Y.
Hall & Carpenter, Philadelphia.
Taylor Goodrich, San Francisco.

The Prospector's Field-Book and Guide in the Search for and the Easy Determination of Ores and other Useful Minerals. By Prof. H. S. OSBORN, LL.D. EXTRACT FROM THE PREFACE: In the following pages we have attempted to present such a view of the whole subject of prospecting for the useful minerals that any liberally educated reader may fully comprehend our meaning. We have therefore explained special terms where we have thought it convenient to use them, and where the technically educated student would not need an explanation. The table of contents and index have both been carefully prepared, and being very full, will make reference to any subject in the volume easy and satisfactory. 44 engravings. 175 pages $1.50

5-ton Ridgway Crane in Foundry Diamond State Iron Co., Wilmington, Del.

Steam-Hydraulic Elevator.

SAFE, RAPID, SURE

—AND—

Not Costly.

The Crane that is perfection for the exacting requirements of a Foundry is the Crane for all places.

Give full particulars and get circulars and prices.

CRAIG RIDGWAY & SON,
Coatesville, Pa.

Ridgway Balanced Steam-Hydraulic Crane.

The Greatest Foundry Crane Known.

Another Big Foundry Adopts It.

The large, handsome and most modern foundry of the country now being erected by the J. I. Case Co. at Racine, Wis., will be equipped with only the latest and best labor saving machinery to be had.

The Cranes used, of course, will be the Ridgway Steam-Hydraulic. The order for these and a lot of our patent one ton air hoists has been placed with us.

When the best money making establishments in the country are adopting, in this way, the Ridgway Crane, what more need be said?

Read what the finest foundry in Chicago says:

FRASER & CHALMERS,
Mining Machinery.

CHICAGO, ILL., April 11, 1893.

MESSRS. CRAIG, RIDGWAY & SON,
Coatesville, Pa.

Dear Sirs:—Replying to your favor of the 6th, asking whether the Steam-Hydraulic Crane furnished for our new foundry at 12th and Rockwell Streets has been satisfactory or not, we beg to say that we have found the Crane highly satisfactory in every respect. We consider it the best Crane made to-day for general foundry use and it is also well adapted for other uses. We should be glad to have you refer anybody to us who may wish to hear directly from us as to our opinion of the Crane. Yours truly,

FRASER & CHALMERS, C. E. Billin, Supt.

OIL HEATERS AND GAS STOVES

WILL INTEREST YOU.

B. & B. Stoves are the Leaders.

B. & B. Combination Oil Heaters and Cook Stoves are a great success, as proven by the many testimonials received from all parts of the country.

Every Stove is mounted on rollers, and can easily be moved from room to room. *They can be used in place of a range in the kitchen or in place of a base-burner in the parlor.* They are thoroughly well adapted to fill all requirements, *combining as they do all the qualities of a first-class Oil Heater and an elegant Parlor Cook Stove.*

If you happen to have one of them upstairs, *the tank can easily be removed and taken down to the kitchen to be filled,* and again replaced in the Stove.

Those who have used the old style Stove with tanks fastened in them as tight as if cast in the iron will appreciate this feature. They can be fitted with our 2-hole, 3-hole or 4-hole Extension Tops for regular 8-inch ware. We want your trade, and if you will give us a chance to quote you prices we will have it.

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

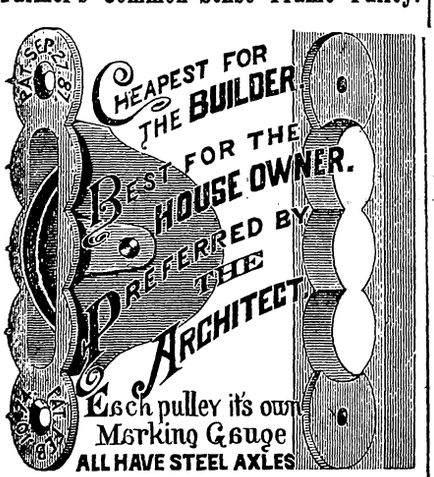
Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.



Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

DISSTON'S Improved Saw Clamp
AND FILING GUIDE.

ESPECIALLY DESIGNED TO ASSIST THOSE NOT SKILLED IN THE ART OF SAW FILING TO FILE A SAW CORRECTLY.

CUT No. 1.

Cut No. 1 shows a saw and the attachment in proper position for filing the first side; and Cut No. 2 shows the saw and attachment reversed and in position to file the second side. There are three marks on one of the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position No. 1, and the other designates when it is in position as shown in No. 2. The third, or centre, marks show when it is in position for filing Rip Saws.

CUT No. 2.

To obtain the correct position, loosen the wing nut and move the guide around to the point desired; after tightening wing nut, loosen screw in file handle, then turn handle until file gives the shape tooth wanted.

A good way is to select a tooth of correct shape and let file down into it, tighten set screw in handle, then file a tooth to see if the shape suits. If not turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth, see cut No. 1; when one side is filed, reverse saw and attachment and adjust as in No. 2, and file the other teeth. For Rip Saws, place the file at right angles with the saw and file every tooth. Always keep the file as nearly horizontal as possible.

This filing guide is sold only attached to our No. 3 Improved Clamp or Vise, and not sold separately. We recommend this as the best saw clamp on the market, being quickly and easily adjusted, and not liable to get out of order.

Write for price including No. 3 Clamp, Filing Guide, File and Handle complete. Packed one in a wooden box.

The fact that we alone use the improved File Machinery recently invented by Alfred Weed, and the even heat of natural gas, enables us to produce a file that will cut faster and wear longer than any on the market.

THIRD REVISED EDITION.

THE IRON AGE STANDARD HARDWARE LISTS

FOR USE IN PRICE BOOKS.

Compiled by R. R. WILLIAMS, Hardware Editor of The Iron Age.

This pamphlet contains the principal standard Hardware price-lists in as clear and compact an arrangement as possible, so as to permit their being advantageously cut out and inserted in the price book. In order to make them adapted to this use they are printed on thin and tough paper of fine quality and on only one side of the paper.

The success of the effort to give the lists in small space is illustrated in many of the lists, in which a clear and condensed arrangement is secured. For instance, the wrench list occupies but 3 inches by ¼ inch, while the list of Stove Hollow Ware, in very small space, gives the list prices on a large and important line of goods which often occupy several pages in catalogues. In several lists, such as Strap and T Hinges and Butts, a new arrangement is adopted, which is regarded as presenting these lists in a very convenient as well as condensed form.

As is obvious from the lists herewith reproduced, the shape and size of the different lists varies greatly, the aim being to give each list the smallest and most convenient arrangement possible. None of the lists are, however, more than 3½ x 6 inches in size, very few of them being as large as this and most of them very much smaller. In use it is intended that they shall be trimmed closely before they are inserted in price books, when they may be attached either by one edge close to the hinge of the book, as will, perhaps, be most convenient with the larger lists, permitting the use of the entire page for memoranda, or the smaller lists may be pasted on the page in connection with the entries in regard to discounts, freights, &c. Many of the lists are so compact in arrangement as when thus inserted to leave ample room for recording quotations.

Fac-Simile of Indexing.

SIZE.—The book is 8¼ x 11 inches (much larger than Price Books A, B, C, D or E), 556 pages.
PAPER.—The paper is the celebrated Crane's heavy ledger paper, tough and strong, permitting frequent changes and erasures.
BINDING.—The binding is of the very best quality—flexible seal grained leather.
INDEX.—By means of the arrangement shown in the cut the four rows of index applies to every page (except Supplement) and permits reference to any article at a single motion. This greatly facilitates the use of the book, avoiding the troublesome turning from page to page which is necessary in connection with other Price Books. It has been prepared with great care, and it is believed that it provides a place for every article in the Hardware line, and gives ample space for recording prices.
Sufficient space has been provided for large lines of goods such as Axes, Bits, Springs, etc., by allowing four pages to such indices, instead of two pages, as for lines of goods requiring less space. This is accomplished, as in AX for example, in Book F by having a short tab with the letter A on the tab on the first leaf, and AX on the tab on the second leaf. The A on the first leaf is directly over the A on the lower leaf, so that the index reads AX whether looking at both leaves together, or at the lower one only.
The four rows of index tabs are printed in gold letters on black Russia leather. The tabs are securely fastened on both sides of each page, making a handsome and durable index.
ARRANGEMENT.—The book is arranged to keep a complete record of prices on a single page, the width giving sufficient room.
SUPPLEMENT.—An 80-page Supplement is provided to give room for supplemental quotations, memoranda, tables, &c.

THIS BOOK IS ISSUED IN ONLY ONE EDITION, PRICE, $7.50.

Advantages of Multiple Index Price Book.

A SPECIAL feature of the books is the arrangement of the index characters, which, instead of being alphabetical, are arranged with special reference to the classification of Hardware goods, each index character giving the first two or three letters of the names of Hardware articles as shown above. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CH! U	For Iron,	turn to	IRO
" Parers, Apple	"	PAP R	" Cutlery,	"	CUT	" Irons,	"	IR'S
" Saws,	"	SAW	" Cartridges,	"	CAR	" Shovels,	"	SHO R
" Pumps,		PUM N	" Rules,	"	RUB L	" Grindstones,	"	GRI
" Bits,	"	BIT	" Locks,	"	LO	" Stones,	"	STO

Special care has been taken to make the classification as indicated in the index correct and comprehensive, making provision for all Hardware articles and giving sufficient space for the keeping and recording of prices. It is thought that every strictly Hardware article has its first two or three letters given, thus permitting immediate reference to it by a single motion.
It is, however, obvious if any articles are not directly designated by the index characters, that the index, being alphabetical in its arrangement, indicates the place where quotations on such articles should be recorded. The supplement, however, may be found useful for quotations on any outside goods which the Hardwareman may desire to keep prices on, while at the same time it may be used if necessary for any overflow of matter from the preceding pages, or to contain list prices or other matter relating to goods.
Hardware Classification —A pamphlet containing a classification of the leading Hardware articles is furnished with the price books.
Standard Lists —In connection with these price books a set of *The Iron Age* STANDARD HARDWARE LISTS can be used with great advantage Price 25 cents.
These price books, which have been prepared by R. R. Williams, Hardware Editor of *The Iron Age*, are presented to the attention of Hardware men in the confidence that they will be found a most valuable aid in keeping track of prices.

Petroleum Oil Stove.

AN INTENSE HEAT,

A STEADY HEAT

AT ALL TIMES.

FOR BURNING Crude Petroleum, Torch or Kerosene Oil. Has a stove pipe which carries off the waste products of combustion, so there is no odor, no smoke and no foul air.

Can be changed from an oil stove to one for burning coal by lifting out the top plate of burner and substituting a coal grate which is furnished with each stove. This can be done in a moment and while the stove is red hot, and without allowing the fire to go out. Experiments extending over several months' time show the stove consumes from one-sixth to one-fourth gallon of Crude Oil per hour, according to the amount of heat required. The oil can be bought for from three to four cents per gallon.

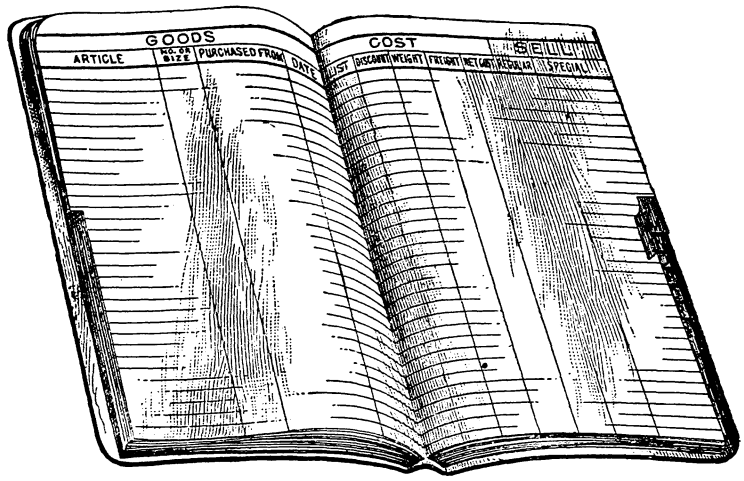
IMPROVED EDITION OF THE IRON AGE

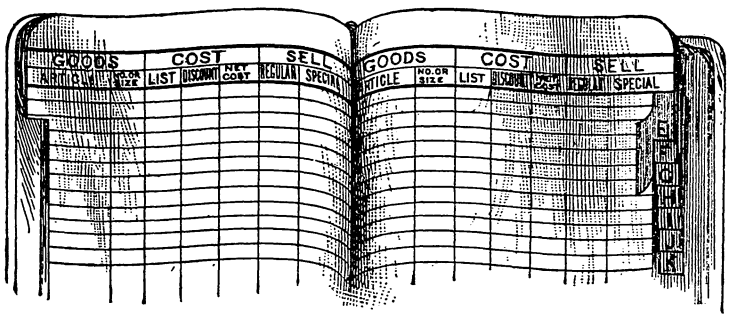
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of the Iron Age.



These Books are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses as an element of cost. Under the heading of selling prices, the regular and any special price, or remarks in regard to the goods are given place. This book goes into considerable detail in describing the goods and cost prices. It has been arranged in accordance with the views of many Hardwaremen whose methods are careful and exact.



Size, 4 x 7 in.; grain seal leather.

FOUR EDITIONS:

A, 200 pages,	$1.00
A F, 200 pages with flap,	1.25
A 2, 400 pages,	1.50
A F 2, 400 pages with flap,	1.75

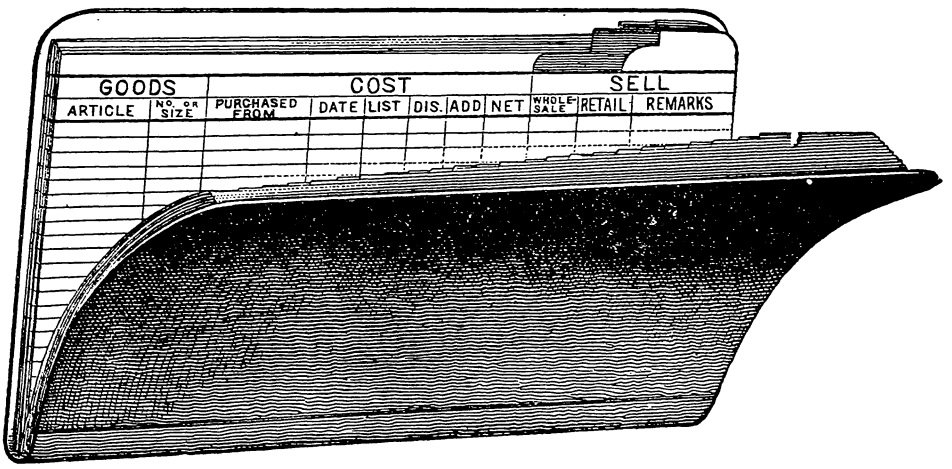
Hardware Price Book A.

Hardware Price Book B.

In this book each page is complete, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. It is adapted for office or store use, and by the use of familiar abbreviations, sufficiently large for the convenient and concise record of prices.

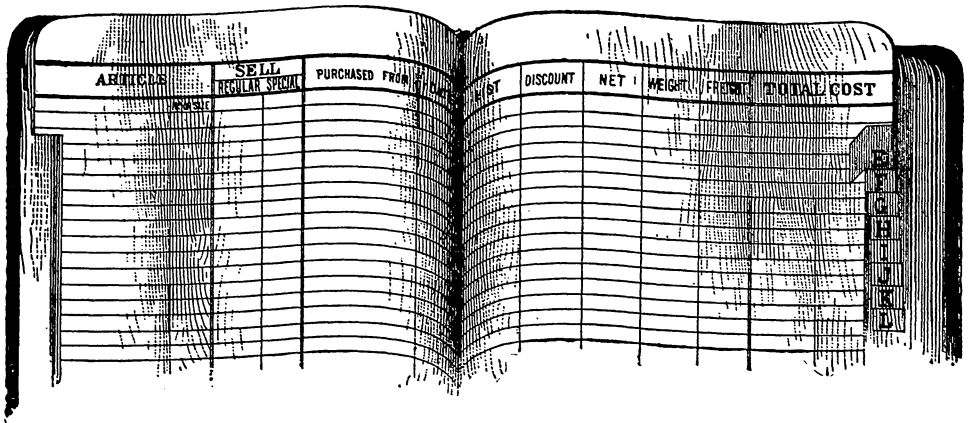
Size, 4 x 7 in.; grain seal leather.

FOUR EDITIONS:



B, 200 pages	$1.00
B F, 200 pages with flap,	1.25
B 2, 400 pages,	1.50
B F 2, 400 pages with flap,	1.75

The headings in Book C run across the top, in a line parallel with the hinge. In this way a very complete record can be kept on a single page. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses which it is desirable to include in the cost. Under the selling prices space is left for the wholesale price, the retail price, and also for any remarks in regard to cost of the goods, desirability of pushing them, or other matters.



Size, 4½ x 7¾ in.; grain seal leather.

FOUR EDITIONS.

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Hardware Price Book C.

Hardware Price Book D.

Price Book D will recommend itself particularly for desk and store use, and for salesmen on the road.

The name of the article, its number or size and the selling price are the first to meet the eye on the left-hand page, as embodying information desired when the selling price is required. The other headings follow in convenient order, by which a detailed memorandum regarding the goods may be kept, the whole being seen at a glance. A number of pages at the back of the book are arranged for memoranda, which will be found a great convenience. This arrangement is adapted to the requirements of the trade in this direction.

Size 5¼ x 8 in.; grain seal leather.

FOUR EDITIONS.

D, 200 pages,	$2.00
D F, 200 pages, with flap,	2.50
D 2, 400 pages.	$3.00
D F 2, 400 pages, with flap,	3.50

Highest Award

FOR

Supreme Excellence

TO

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS,

At the *World's Columbian Exposition* at Chicago. A medal and diploma worded:

"Supreme excellence in material, method in manufacture, and quality of finished product; elasticity and smoothness combined with holding power in clinch.

It allows the use of very small nails."

There is nothing beyond "supreme excellence," nor is there anything comprised in a horse nail, except the "material from which it is made," "the method of manufacture," and "quality of finished product."

Putnam nails, by their "elasticity," give slightly to the expansion and contraction of the hoof while the horse is in motion; by their "smoothness," do not enlarge the nail holes in the hoof, while their "supreme excellence," in "holding power in the clinch," enables them to hold the shoe in the hardest service until worn out.

By the "use of small nails," large holes are avoided and money saved to the smith.

Thus it will be seen that the officials of the *World's Columbian Exposition* recognize what qualities go to make up a good horse nail and that only the "Putnam" contains them all.

STEEL HORSE SHOES.

SHOENBERGER & CO., PITTSBURGH, PA.,

After numerous and costly experiments have succeeded in manufacturing a special quality of soft homogeneous steel, specially adapted to the manufacture of Horse and Mule Shoes, and are now making from this steel Extra Swaged, and Government Pattern Horse and Mule Shoes. They give the best of satisfaction everywhere and we furnish them to the trade at the same prices as the regular iron shoe sold by ourselves and our competitors. We are at present making our Roadster Pattern Horse Shoes out of Iron, but we will make them of Steel also within a short time.

The advantages are that, being made of vastly superior material, they will never show signs of red-shortness or cold-shortness, will never split in the crease and will always show a much finer finish than any iron shoe.

We make the Steel Shoes lighter than the Iron, giving more shoes to the keg, as follows:

No. 1, 15 more shoes to the keg.
" 2, 14 " " " "
" 3, 10 " " " "
" 4, 8 " " " "

And other sizes in proportion.

No. 2 EXTRA SWAGED FRONT.

We also beg to say that we have introduced improved machinery into our new factory and have doubled our capacity, and are now prepared to furnish the best shoe, either iron or steel, ever offered to the trade.

We would also call your attention to our Improved Steel Toe Calk, equal to any in the market. To secure the best wearing qualities use sand or borax in welding on a calk and cool off at a dark red, or still better, cool off without plunging in water. We make sizes numbers 1, 2, 3, 4, 5 and 6, packed in 25-pound boxes.

Write to us for information and prices, or apply to jobbers and dealers, who sell them everywhere.

ADMINISTRATION OF WORKSHOPS,

Public and Private.

BY CAPT. HENRY METCALFE.

322 Pages; 6¼ x 9½ inches. **CLOTH, $5.00**

This work is an effort to correct some of the wrong, and consequently unprofitable, methods of conducting manufacturing establishments, and proposes plans for more correct ones. A system of mechanical bookkeeping, based on the card catalogue method, dispensing with the use of books, by which the cost of manufactures may be promptly determined, either in gross or detail, as to component parts and operations thereon. Comprising a simple method of recording all dealings with material which relate to its procurement, expenditure or possession. Applied, with numerous practical illustrations, to the trust, accountability for public property and funds required of the U. S. Ordnance Department, with a review of its present practice. Illustrated with tables, forms of cards, etc.

N. J. Wire Cloth Co., Trenton, N. J.
Reliance Wire & Iron Wks. Milwaukee Wis.
Scheeler & Sons, Buffalo, N. Y.
Wickwire Bros., Cortland, N. Y.
Wright & Colton Wire Cloth Co., Worcester, Mass.
W. S. Tyler Wire Works Co., Cleve'd.

Wire Cutters.
King., J. M. & Co., Watertown, N. Y.

Wire Dies.
McFarland, Wm., Trenton, N. J.
Newton & Shipman, 83 John, N. Y.

Wire Fences.—*See Fencing, Iron and Wire.*

Wire Goods, *Manufacturers of.*
Darby, Edward & Sons, Phila.
Gilbert & Bennett Mfg. Co., 42 Cliff St. N. Y.
Ludlow-Saylor Wire Co., St. Louis.
Ossawan Mills Co., Norwich, Conn.
Scheeler & Sons, Buffalo, N. Y.
Wickwire Bros, Cortland, N. Y.
Williamson, C. T. Wire Novelty Co. Newark, N. J.

Wire Machinery.
Am. Tool Wks., Cleveland, O.
Manville, E. J. Mch. Co., Waterbury, Ct.
Morgan Construction Co., Worcester Mass.
Waterbury Mch. Co., Waterbury, Conn

Wire Straightening and Cutting Machinery.
Adt, John & Son, New Haven, Conn

Wire Nails.
Bond Nail Co., Raynham, Mass.
Indiana Wire Fence Co., Crawfordsville, Ind.
Kilmer Mfg. Co., Newburg, N. Y.
New Castle Wire Nail Co., New Castle Pa.
Phillips, Townsend & Co., Phil., Pa.
Salem Wire Nail Co., Salem, O.
Whitney, A. R. & Co., New York City

Wire Rods, Steel.
New Castle Wire Nail Co., New Castle Pa.
Washburn & Moen Mfg. Co., Worcester, Mass.
Whitney, A. R. & Co., 17 B'way, N. Y.
Wolff, R. H. & Co., Ltd., 118th Street and Harlem River, N. Y

Wire Rope, Iron and Steel *Makers.*
Broderick & Bascom Rope Co., St. Louis, Mo.
California Wire Works, San Francisco
Hazard Mfg. Co., Wilkesbarre, Pa.
A. Leschen & Sons Rope Co., St. Louis
Trenton Iron Co., Trenton, N. J.
Washburn & Moen Mfg. Co., Worcester Mass.
Williamsport Wire Rope Co., Williamsport, Pa.

Wood-Working Machinery.
Fay, J. A. & Egan Co., Cincinnati, O.
Seneca Falls Mfg. Co., Seneca Falls, N. Y.

Wrenches, *Manufacturers of.*
Bemis & Call Hardware & Tool Co Springfield, Mass.
Billings, Spencer & Co., Hartford. Conn
Coes Wrench Co., Worcester, Mass.
Keystone Mfg. Co., Buffalo, N. Y.
Trimont Mfg. Co., Roxbury, Mass
Williams, J. H., Brooklyn, N. Y.

Wringers.
Colby Wringer Co., Montpelier.
